B. Submitting Comments

The NRC encourages electronic comment submission through the **Federal rulemaking website** (<https://www.regulations.gov>). Please include Docket ID NRC-2024-0211, in your comment submission.

The NRC cautions you not to include identifying or contact information in comment submissions that you do not want to be publicly disclosed in your comment submission. All comment submissions are posted at <https://www.regulations.gov> and entered into ADAMS. Comment submissions are not routinely edited to remove identifying or contact information.

If you are requesting or aggregating comments from other persons for submission to the NRC, then you should inform those persons not to include identifying or contact information that they do not want to be publicly disclosed in their comment submission. Your request should state that comment submissions are not routinely edited to remove such information before making the comment submissions available to the public or entering the comment into ADAMS.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized as follows.

1. *The title of the information collection:* Cooperation with States at Commercial Nuclear Power Plants and Other Nuclear Production and Utilization Facilities.
2. *OMB approval number:* 3150-0163.
3. *Type of submission:* Extension.
4. *The form number, if applicable:* Not applicable.
5. *How often the collection is required or requested:* On occasion, when a State or Federally recognized Indian Tribe wishes to observe NRC inspections or perform inspections with the NRC or when a State or Federally recognized Indian Tribe wishes to negotiate an agreement to observe or perform inspections. States with an instrument of cooperation or a State Resident Engineer have both regular reporting and occasion-specific reporting.
6. *Who will be required or asked to respond:* States and Federally recognized Tribes interested in observing or performing inspections.
7. *The estimated number of annual responses:* 203.
8. *The estimated number of annual respondents:* 30.
9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 1,255.
10. *Abstract:* Abstract: States and Federally recognized Indian Tribes are involved and interested in monitoring the safety status of nuclear power plants and other nuclear production and utilization facilities. This involvement is, in part, in response to the States' and Tribes' public health and safety responsibilities and, in part, in response

to their citizens' desire to become more knowledgeable about the safety of nuclear power plants and other nuclear production and utilization facilities. States and Tribes have identified NRC inspections as one possible source of knowledge for their personnel regarding NRC licensee activities, and the NRC, through the policy statement, "Cooperation with States at Commercial Nuclear Power Plants and Other Nuclear Production or Utilization Facilities" (57 FR 6462; February 25, 1992), has been amenable to accommodating States' and Tribes' needs in this regard. The NRC uses the information collected under this information collection requirement to allow States and Federally recognized Indian Tribes to participate in or observe inspections at NRC-licensed facilities. The types of information collected include written requests identifying specific inspections States and Tribes wish to observe; identification-related information required for site access to NRC-licensed facilities; training and qualifications of State and Tribal personnel participating in inspections; information required to define inspection roles for States and Tribes; and information to coordinate NRC and State and Tribal inspections.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.
2. Is the estimate of the burden of the information collection accurate? Please explain your answer.
3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?

4. How can the burden of the information collection on respondents be minimized, including the use of automated collection techniques or other forms of information technology?

Dated: September 23, 2025

For the Nuclear Regulatory Commission.
