ADVANCE Act Sec 208 Alternative Conceptual Reactor Licensing Strategy Brief Nuclear ROSE Consulting LLC.pdf

Good afternoon,

I write in follow-up to our conversations about proposals for NRC's consideration in implementing the ADVANCE Act, particularly as it relates to Section 208, "Regulatory requirements for micro-reactors," and other provisions of the Act as well.

I respectfully submit the attached alternative proposal for NRC staff's consideration. The alternative is conceptual in nature, written in brief to convey a departure from conventional thinking.

I look forward to discussing it during future meetings and request an opportunity to present this concept during the February 13, 2025, workshop planned by NRC staff to discuss microreactor licensing and deployment activities.

Kind regards,

Rani
