**NRC Staff Met with EPRI to Discuss Status of the Review and Request for Additional Information Associated with the NRC Review of EPRI Topical Report 3002025288, “Enhanced Risk-Informed Categorization Methodology for Pressure Boundary Components”**

On March 6, 2025, U.S. Nuclear Regulatory Commission (NRC) staff met with the Electric Power Research Institute (EPRI) to discuss status of the review and request for additional information (RAI) (Agencywide Documents Access and Management System (ADAMS) Accession No. [ML24352A469](#)) associated with the NRC review of EPRI Topical Report 3002025288, “Enhanced Risk-Informed Categorization Methodology for Pressure Boundary Components” ([ML24211A073](#)). Staff discussed their main concern with the methodology and the potential uncertainty associated with the failure rates of certain non-code repairs that could be implemented after categorization of high-consequence structures, systems, and components (SSCs) as low safety significance (LSS). EPRI will be providing responses to the RAI in April.

**The Federal Register Notice for NRC Draft Regulatory Issue Summary, Applicability of Title 10 of the Code of Federal Regulations Part 71 Requirements During the Movement of Radioactive Material Within a Temporary Jobsite Has Been Published for Public Comment in the Federal Register**

The *Federal Register* Notice for *NRC Draft Regulatory Issue Summary, Applicability of Title 10 of the Code of Federal Regulations Part 71 Requirements During the Movement of Radioactive Material Within a Temporary Jobsite* ([90 FR 11391](#)) ([ML24206A139](#)) has been published for public comment in the *Federal Register*. The purpose is to clarify that, during movement of radioactive materials for the purpose of transport by an NRC licensed service provider within a temporary jobsite (as defined by the applicable section of 10 CFR), the regulations at [10 CFR 71.5\(a\)](#) and [10 CFR 71.5\(b\)](#) are not applicable so long as the activities are within an area established as a temporary jobsite pursuant to the service provider's license.

**List of Approved Spent Fuel Storage Casks: List of Approved Spent Fuel Storage Casks: HI-STORM 100, Certificate of Compliance No. 1014, Renewed Amendment No. 19; Direct Final Rule; 10 CFR 72 (NRC-2024-0215; RIN 3150-AL24)**

On March 13, 2025, the U.S. Nuclear Regulatory Commission (NRC) published a notice in the *Federal Register* (90 FR 11891) amending its spent fuel storage regulations by revising the Holtec International HI-STORM 100 Cask System listing within the “List of approved spent fuel storage casks” to include Renewed Amendment No. 19 to Certificate of Compliance No. 1014. Renewed Amendment No. 19 revises the certificate of compliance to update the acceptance criteria and method of evaluation (MOE) for the HI-STORM 100 system tipover accident for equipment combinations involving multi-purpose canisters (MPCs) with Metamic-HT baskets. This involves applying a new stress-based criteria and completing new evaluations consistent with the new tipover acceptance criteria and MOE and involves some adjustments of the existing deflection criteria. Comments are requested by April 14, 2025. The companion proposed rule was also published in the *Federal Register* on March 13, 2025 (90 FR 11906). The direct final rule is effective May 27, 2025.

**NMSS Staff Released “Vision and Strategy: Regulating Fusion Machines Across the National Materials Program” to the Public**

On March 11, 2025, Office of Nuclear Material Safety and Safeguards (NMSS) staff released “Vision and Strategy: Regulating Fusion Machines Across the National Materials Program” to the public (Agencywide Documents Access and Management System (ADAMS) Accession No. [ML25069A706](#)). The Vision and Strategy document provides the plans for a regulatory framework that will enable clear, efficient, independent, and reliable licensing and oversight of fusion machines across the National Materials Program. The document will be posted on the NRC website on the “Fusion Machines” page this week.
