Solomon Sahle, State Regulation Review Coordinator
Agreement States Program Branch
Division of Materials Safety, Security, State, and Tribal Programs
Office of Nuclear Materials Safety and Safeguards
U.S. Nuclear Regulatory Commission

Dear Mr. Sahle:

Kansas requests review of the following nonstandard license condition. The intent of this condition is to place a license condition for the proper disposal or transfer of older sources. This would not allow the licensee an exemption from any other regulations or license requirements that would compromise the reciprocal nature of our licenses with the NRC or other Agreement States.

The licensee shall not store the following unused sources **[insert isotope, chemical/physical form, model]** for a period greater than two years from **[insert date]**.

Please contact me if you have any questions at david.lawrenz@ks.gov.

Sincerely,

A handwritten signature in black ink, appearing to read "David Lawrenz".

David Lawrenz
Senior Health Physicist
KDHE Radiation Control Program
