Hello Ojeta,

My apologies for my delay on getting back to you – I have been out quite a bit during the last two weeks on both planned and unplanned leave.

Yes, we can amend the license to only add the plated sources at this time. Please provide a brief signed and dated letter confirming that you would like to withdraw the request to add new authorized users at this time, and for the Am-241 plated sources please provide the total activity requested in microcuries.

Please let me know if you have any questions.

Thank you,
Laura

I was wondering if it were possible to just amend the license for the standards and we will add the names to the license at a later date? My priority is the acquisition of the efficiency plates. The goal is to have 16 plates in total. Here is the details:

Am-241 Alpha Reference Source
1.00 kBq (27.03 nCi)
Activity Tolerance: +30% / -30%
Drawing: VZA-2076-001
Anodized Aluminum Foil
Active Diameter: 44 mm
Overall Dimensions: Ø 47 mm x 0.8 mm
Activity and Emission Calibrated
Calibrated, NIST Traceable

Thanks again for all your help.

Hello Ojeta,

This case was just assigned to me on Monday so I am taking a first look at it now. It appears that you submitted a full license renewal application – is the only actual requested change the addition of the new Am-241 electroplated sources?

Thank you,
Laura

Good afternoon, Ojeta,

Laura Cender is the technical reviewer working on your request (CN 646091).

I have included Laura on this email.

Thank you,
Tammy

Hello Tammy, just circling back to see if our amendment has been processed. We have some calibration efficiencies that are pending purchase .

Thanks for your time again.

Good afternoon, Ojeta,

Attached is acknowledgement of your amendment request.

Please note our office has moved. Our new address is now displayed on the bottom of the attached form.

Future correspondence can be emailed to R3-DRSSMail.Resource@nrc.gov.

Please let me know if you have any questions, or require any additional information.

Thank you,

Tammy Tomczak
