SUBJECT: SALEM NUCLEAR GENERATING STATION, UNITS 1 AND 2 – OPERATOR  
LICENSING RETAKE EXAMINATION APPROVAL

Dear Charles McFeaters:

The purpose of this letter is to provide U.S. Nuclear Regulatory Commission (NRC) approval of the proposed written retake examination under Title 10 of the *Code of Federal Regulations* 55.40(b)(4) and to confirm the final arrangements for the retake examination at the Salem facility.

The NRC has approved the subject examination, and you may administer the written retake examination during the week of June 16, 2025, in accordance with Revision 12 to NUREG-1021, "Operator Licensing Examination Standards for Power Reactors," issued September 2021. The NRC has provided the list of the applicants approved to take the examination to William Muffley, Senior Director Nuclear Training. The examination has undergone extensive review by my staff and representatives responsible for licensed operator training at your facility. Based on this review, I have concluded that the examination meets the guidelines of NUREG-1021 for content, operational, and discrimination validity. By administering the written retake examination, you also agree that the examination meets NUREG-1021 guidelines and is appropriate for measuring the qualifications of licensed operator applicants at your facility. If you determine that this examination is not appropriate for licensing operators at your facility, do not administer the examination and contact me at (610) 337-6916.

Please contact your NRC chief examiner, Manan Patel, at (610) 337-5304, if you have questions or identify any errors or changes in the license level or type of examination specified for the applicant approved to take the examination.

Sincerely,

Sarah H. Elkhiamy, Chief  
Operations Branch  
Division of Operating Reactor Safety
