Detroit, MI 48202

SUBJECT: AMENDMENT NO. 15 TO RADIOACTIVE MATERIALS LICENSE FOR HENRY FORD HEALTH SYSTEM, D/B/A HENRY FORD HEALTH, U.S. NRC MATERIALS LICENSE NO. 21-32740-01

Dear Mr. Jackson:

Enclosed is Amendment No. 15 to your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 21-32740-01 in accordance with your letters dated May 2, 2025 and May 13, 2025.

This amendment accounts for the following requests:

- changes the legal name from Premier Cardiovascular Specialists to Henry Ford Health System, d/b/a Henry Ford Health;
- changes the mailing address;
- designate you as the Radiation Safety Officer (RSO);
- adds Mayur Vaya, B.S., CNMT, NMTCB(RS), RT(N) as the Associate RSO;
- references the consummation of the direct transfer of control; and
- removes the former location of use at 39000 W. Seven Mile Rd., Ste. 3800, Livonia, MI.

I have reviewed the submitted closeout survey report, along with the accompanying leak test records for the licensed sealed sources. Based on this review, along with your statement identifying the transfer of all sealed sources, I have concluded that all licensable radioactive material has been removed from your facility and residual radioactive material attributable to licensed activities does not exceed current NRC criteria. Based on this conclusion and your statement, the former location of use in Livonia, Michigan, is suitable for release to unrestricted use.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

An environmental assessment for this action is not required because this action is categorically excluded under [10 CFR §51.22\(c\)\(14\)](#).

You will be periodically inspected by the U.S. NRC. Failure to conduct your program in accordance with U.S. NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with U.S. NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the U.S. NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with U.S. NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that U.S. NRC expects of its licensees.

The U.S. NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on U.S. NRC's safety culture website at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. I encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in U.S. NRC-regulated activities.

In accordance with 10 CFR §2.390 of the U.S. NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the U.S. NRC Public Document Room or from the U.S. NRC's ADAMS, accessible from the U.S. NRC website at <https://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Jason M. Kelly, MPH, CPH
Health Physicist
Materials Licensing Branch
