---

Tate,

As discussed, after the Crow Butte facility inspection on August 5 and 6, 2025, Kevin Hayes, Lifeng Gao, and I will be conducting a review of facility documents/data (maintained only at the facility) on August 7, 2025 for both the alternate decommissioning schedule request and the license renewal. Additionally, during part of the day on August 7, 2025, we will need you or a Crow Butte representative to show one or two of us the Crow Butte Marsland Satellite facility for the License Renewal. As I previously informed you, the Crow Butte alternate decommissioning schedule request was accepted May 21, 2024. NRC expects to complete the licensing action for the alternate decommissioning schedule request on October 17, 2025.

Regards,

*Tom Lancaster*
