

## Materials Inspection Report

ADAMS Accession # ML25169A245

## 1. Licensee/Location Inspected:

Grow Generation Corporation  
Remote Inspection  
5619 DTC Parkway, Suite 900  
Greenwood Village, CO 80111

Report Number(s) 2025-001

## 2. NRC/Regional Office

Region IV  
U. S. Nuclear Regulatory Commission  
1600 E. Lamar Boulevard  
Arlington, TX 76011-4511

## 3. Docket Number(s)

030-39201

## 4. License Number(s)

05-35557-01E

## 5. Date(s) of Inspection

April 10 -17, 2025

## LICENSEE:

The inspection was an examination of the activities conducted under your license as they relate to radiation safety and to compliance with the Nuclear Regulatory Commission (NRC) rules and regulations and the conditions of your license. The inspection consisted of selective examinations of procedures and representative records, interviews with personnel, and observations by the inspector. The inspection findings are as follows:

- ☐ 1. Based on the inspection findings, no violations were identified.
- ☐ 2. Previous violation(s) closed.
- ☒ 3. During this inspection, certain of your activities, as described below and/or attached, were in violation of NRC requirements, and were assessed at Severity Level IV, in accordance with the NRC Enforcement Policy.
- A. The violation(s), specifically described to you by the inspector as non-cited violations, are not being cited because they were self-identified, non-repetitive, corrective action was or is being taken, and the remaining criteria in the NRC Enforcement Policy were satisfied.  
(Non-cited violation(s) was/were discussed involving the following requirement(s))

- B. The following violation(s) is/are being cited in accordance with NRC Enforcement Policy. This form is a NOTICE OF VIOLATION, which may be subject to posting in accordance with 10 CFR 19.11.

(Violations and Corrective Actions)

10 CFR 32.15(d)(1) requires, in part, labels or marks on each unit so that the byproduct material in the product can be identified. Contrary to the above, until April 10, 2025, the licensee failed to label or mark each unit so that the byproduct material in the product could be identified. Specifically, the light bulbs containing Krypton-85 initially distributed by Grow Generation Corporation did not have markings to identify that Kr-85 was contained within. The licensee committed to marking each light bulb to identify that Kr-85 was contained within, for any new bulbs that were ordered or produced for initial distribution following this inspection.

## Statement of Corrective Actions

I hereby state that, within 30 days, the actions described by me to the Inspector will be taken to correct the violations identified. This statement of corrective actions is made in accordance with the requirements of 10 CFR 2.201 (corrective steps already taken, corrective steps which will be taken, date when full compliance will be achieved). I understand that no further written response to NRC will be required, unless specifically requested.

---

Good morning Tony,

Attached is the NRC inspection report, one violation of NRC requirements was identified and is documented within. Please review that the corrective actions are accurate, sign and date the report, and email it back to me.

My branch chief will review the report then sign it, and after that it will become a publicly available safety record available at the NRC's Agencywide Documents Access and Management System ([ADAMS](#)) online database.

Please give me a call or email if you have any questions,

Thank you,

Jason Dykert
