Re: Phase I Environmental Site Assessment
DJT - Advanced Energy and Intelligence Campus
NEC of Highway 60 and FM 683
Panhandle, Carson County, Texas
Terracon Project No. AR257120

Dear Mr. Braudt:

Terracon Consultants, Inc. (Terracon) is pleased to submit the enclosed Phase I Environmental Site Assessment (ESA) report for the above-referenced subject property (hereinafter known as the 'site'). This assessment was performed in accordance with our proposal/work authorization PAR257120 dated May 6, 2025.

We appreciate the opportunity to be of service to you on this project. In addition to ESA services, our professionals provide other environmental, geotechnical, construction materials, and facilities services on a wide variety of projects locally, regionally, and nationally. For more detailed information on all of Terracon's services please visit our website at www.terracon.com. If there are any questions regarding this report or if we may be of further assistance, please do not hesitate to contact us.

Sincerely,

Terracon Consultants, Inc.

Executive Summary

This Phase I Environmental Site Assessment (ESA) was performed in accordance with our proposal/work authorization PAR257120 dated May 6, 2025, and was conducted consistent with the procedures included in ASTM E2247-23, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property*. The purpose of this ESA was to assist the client in developing information to identify recognized environmental conditions (RECs) in connection with the site as reflected by the scope of this report. The ESA was conducted under the supervision or responsible charge of Rachelle K. Christian, P.G., Environmental Professional, who also performed the site reconnaissance on May 7, 2025.

Findings and Opinions

A summary of the findings is provided below. It should be recognized that details were not included or fully developed in this section, and the report must be read in its entirety for a comprehensive understanding of the items contained herein.

Site Description and Use

According to the Carson County Tax Assessor, site observations, and information provided by the Client, the site consists of approximately 6,000 acres of land, located at the northeast corner (NEC) of Highway 60 and FM 683 in Amarillo, Texas. The site is currently maintained by Mr. Jason and Mrs. Jody Green. No other occupants are present on the site. The current on-site operations consist of maintaining the vacant land (pastureland) and agricultural land (wheat crop) of the site as part of the larger Texas Tech Farm Operation. Please refer to Exhibit 2 in Appendix A for a diagram of the site.

Historical Information

Based on a review of the historical information, the site consisted of agricultural and/or vacant, undeveloped land from at least 1937 through the present, with several playa lakes and surface water drainages. Multiple residences were located on the site from 1937 through 1954, and most residences were removed sometime between 1967 and 1973, with the former Pantex officer housing removed or demolished by 1985. Mr. Green's residence remains through to the present. The site was part of the U.S. Army Pantex Ordnance Plant from 1942 through 1945 with related development on the site dedicated to the World War II (WWII) effort, and then was operated under the Texas Tech University Research Farm (TTRF) subsequent to WWII through the 1990s, when the site was then referenced as Texas Tech Farm Operations (TTFO).

A circular feature (like an upside down spy-glass) is located on the east-central portion of the site on the 1954 through 1967 historical aerial photographs, and is

faded/apparently out-of-use by 1973. This area is located within a present-day wheat field. Based on the military-use nature of the site, and the fact that this feature appears outside former investigations, this unknown feature and its possible military-related usage constitutes a REC for the site.

Agricultural land and/or vacant, undeveloped land, surface waters, rural residences, FM 2373, railroad tracks and Highway 60, FM 683 have been located adjacent to the site since at least 1937, when some residences to the north were removed between 1942 and 1954, due to the development of the Pantex Ordnance Plant during WWII (1942-1945). The Pantex office building was constructed east of the site by 2018.

Two areas are covered by a Soil Deed Certification (further discussed in Section 3.4) and are associated with Playa 4 on the eastern portion of the site and the area referenced as Zone 9 on the northern portion of the site. Based on the Deed Certification, these areas constitute a controlled REC (CREC). Based on the future development plans of the site, the Soil Deed Certification areas constitute a REC for the site, as site soils in these areas will be disturbed.

An area described by the Groundwater Deed Certification (further discussed in Section 3.4) is located on the northern boundary of the site. Based on the magnitude of the constituents of concern (COC) and distribution in groundwater, the Groundwater Deed Certification area constitutes a CREC for the site. Any groundwater monitoring wells within this area would need to remain undisturbed until regulatory closure is achieved. Correspondence with the Pantex Plant, United States Department of Energy (USD OE), and the Texas Commission on Environmental Quality (TCEQ) would be required prior to any developments at the site in this area.

Based on the material buried, the Affidavit to the Public (further discussed in Section 3.4) regarding the documented buried asbestos building debris on the TTRF property does not constitute a REC for the site. If the material is to be disturbed during construction activities, the buried asbestos material should be handled in accordance with applicable regulations.

Records Review

Selected federal and state environmental regulatory databases as well as responses from state and local regulatory agencies were reviewed. The site and adjacent property to the north of the site were identified in the regulatory database report, and are discussed in detail in Section 4.1.

Terracon ordered available regulatory files from the TCEQ as part of this assessment. These reports have not been received at the issuance of this report but do not represent a significant data gap. Reviewing these reports, upon receipt, may provide valuable information in developing future assessment and response plans to streamline the proposed future development across the site.

Site Reconnaissance

The following items were identified as RECs associated with historical uses of the site:

- Two remnant inground hydraulic lifts [former garage building (Building 2-6) of Zone 2].
- A sub-grade mechanic pit [central portion of the former garage building (Building 2-6) of Zone 2].
- An apparent former wash bay [western portion of the former garage building (Building 2-6) of Zone 2].
- Interior floor drains and unknown effluent connection at the following site locations: Kilgore (or also known as Killgore) Building, former garage building (Building 2-6), Maintenance and Repair slab (locomotive and machine shop – Building 2-4), and former Boiler House (Building 2-3) of Zone 2.
- Trash and debris were observed in several areas on the site, including: Playa 5 Trash Pits; Dunnage Mill Trash Pit; West of the Dunnage Mill; South of the Dunnage Mill; Northern portion of the site; Rock Pile; Zone 9; Zone 2; Railroad spurs southwest of Zone 3; several documented landfill areas associated with Playa 4; and, the Carbon Black Pits.
- The construction debris related to several of the areas discussed in Section 4.1.
- The hide pits and associated brine pits at Zone 9.
- Numerous groundwater monitoring wells and documented affected groundwater on the site.
- Munitions bunkers located on the central portion of the site (Zone 3).

Adjoining Properties

The site is bordered by the following: Pantex and agricultural/vacant land to the north; Pantex office building, FM 2373 and agricultural/vacant land east of the site; railroad tracks and Highway 60 to the south; and FM 683, followed by rural residences and agricultural/vacant land to the west. Pantex was previously discussed above and is discussed further in Section 4.1. RECs associated with the site originating from current off-site operations were not identified except for the environmental impacts noted to be associated with the Pantex Plant operations.

Significant Data Gaps

Significant data gaps (SDGs) were not identified.

Additional Services

Per the agreed scope of services, additional services as outlined in the proposal, including items described in Section 13.0 (Non-Scope Considerations) of ASTM E2247-23, were not conducted.

Conclusions

We have performed a Phase I ESA consistent with the procedures included in ASTM Practice E2247-23 at NEC of Highway 60 and FM 683, Amarillo, Carson County, Texas, the site. The following RECs, CRECs and/or SDGs were identified in connection with the site:

- Based on the military-use nature of the site, and the fact that a circular feature (like an upside down spy-glass) located on the east-central portion of the site appears outside former investigations, this unknown feature and its possible military-related usage constitutes a REC for the site.
- Based on the future development plans of the site, the Soil Deed Certification areas (Carbon Black Pits, Burning Pits, Lake Mound Areas, Landfill Area, and Zone 9) constitute a REC for the site, as site soils in these areas may be disturbed.
- An area described by the Groundwater Deed Certification (further discussed in Section 3.4) is located on the northern boundary of the site. Based on the magnitude and extent of the COCs in groundwater, the Groundwater Deed Certification area constitutes a CREC for the site.
- Based on their presence and unknown maintenance after WWII, the inground hydraulic lifts, the on-site sub-grade mechanic pit, and wash bay in Zone 2 constitute a REC for the site.
- Based on the unknown effluent connection from the floor drains/sumps and the historical activities on the site, releases to the floor drains in the Kilgore Building and floor drains/sumps in the Zone 2 buildings affecting site media constitute a REC for the site.
- Based on the amount of trash and debris and construction debris buried on the site, and the historical operations discussed in Section 4.1, the on-site debris constitutes a REC for the site.
- Based on the presence of multiple explosive compounds detected during the phases of soil and groundwater investigations and the unclear resolution of their presence, and based on the nature and duration of agricultural, brine hide lagoon operations, and carbon black operations, the historic presence of munitions manufacturing

activities, carbon black, and the industrial agricultural activities constitute a REC to the site in Zone 9.

- Based on the lack of assessment to address the potential releases from sources not associated with DoD activities within Zone 9 historically, the noted discharge of waters from Zone 9 historic tenant operations to the Rockpile Area constitutes a REC to the site.
- The monitoring wells are associated with historical and ongoing groundwater monitoring on the site, and the affected groundwater constitutes a REC for the site.
- Based on the nature of usage and duration of operations and absence of documented investigation, the storage of pesticides, fertilizers, fuel storage and welding operations, and application of waters from Playa 5 broadly across the Zone 2 area constitute a REC for the site.
- Based on the detected COCs in soil and groundwater during historic investigation activities being unresolved or resolution not being known in the available documentation, the presence of COCs that appear to remain present or not investigated fully to define the magnitude and extent of impacts are considered a REC for the site.
- Based on the presence of the sewage line on the site and overflow portions on the site, the documented affected groundwater, and the potential future site media management plan (MMP), the potential presence of heavy metals in site media from the sewer line constitutes a REC for the site.
- Based on the absence of environmental investigation and likelihood for the presence of explosives and unexploded ordnance (UXO) materials remaining proximate to the munitions bunkers and the potential future site media management plan (MMP), the munitions bunkers of Zone 3 constitute a REC for the site.
- The historic (Northeast Pistol Range) and on-going shooting range (Firing Range No. 3) operations on the northeast portions of the property constitutes a REC for the site.

Recommendations

Based on the scope of services, limitations, and conclusions of this assessment, Terracon recommends conducting additional investigation to evaluate subsurface conditions associated with the identified RECs.

1.0 Introduction

1.1 Site Description

Site Name	DJT - Advanced Energy and Intelligence Campus
Site Location/Address	NEC of Highway 60 and FM 683, Panhandle, Carson County, Texas
Parcel Number	7876, 8690, 7881, 7878, 8166, 8167, 8693, 8689, 3841
Land Area	Approximately 6,000 acres
Site Improvements	Single-family residence, Kilgore Building, Farm Shop Building, residences and/or structures from the WWII era that have since been demolished; however, some building materials, rights-of-way and sidewalks remain. Additionally, barbed wire fencing, overhead electrical lines, a carport, security gates, Pantex siren structures, former sewer line, stock tanks, buried water lines, windmills, former barn-type structure with remnant scrap metal and nails, remnant railroad grades, ranchland, crop land and vacant grass land, and numerous monitoring well. Remnant Zone 9 and 3 structures.
Anticipated Future Site Use	Redevelopment for commercial use
Reason for the ESA	Due Diligence

The location of the site is depicted on Exhibit 1 of Appendix A, which was reproduced from a portion of the United States Geological Survey (USGS) 7.5-minute series topographic map. The site and adjoining properties are depicted on the Site Diagram, which is included as Exhibit 2 of Appendix A.

1.2 Scope of Services

This Phase I Environmental Site Assessment (ESA) was performed in accordance with our proposal/work authorization PAR257120 dated May 6, 2025, and was conducted consistent with the procedures included in ASTM E2247-23, *Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process for Forestland or Rural Property*. The purpose of this ESA was to assist the client in developing information to identify RECs in connection with the site as reflected by the scope of this report. Recognized environmental conditions are defined by ASTM E2247-23 as "(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment." This ESA includes

consideration of the movement of hazardous substances and petroleum products in any form, including migration of vapor in the subsurface. A de minimis condition is not a REC.

This purpose was undertaken through user-provided information, a regulatory database review, historical and physical records review, interviews (including local government inquiries, as applicable), and a visual noninvasive reconnaissance of the site and adjoining properties. Limitations, ASTM deviations, and significant data gaps (if identified) are noted in the applicable sections of the report.

Review of Perfluoroalkyl and Polyfluoroalkyl Substances (PFAS)

PFAS are a family of compounds which are considered emerging contaminants of concern due to their mobility and longevity in the environment. PFAS has been used in many products, including but not limited to fire-fighting foam, anti-stick coatings, stain and water-repellent coatings, electroplating, and paper products, among others. On July 8, 2024, US EPA designated two PFAS compounds, perfluorooctanoic acid (PFOA) and perfluorooctanesulfonic acid (PFOS), including their salts and structural isomers, as hazardous substances under CERCLA; accordingly, PFOA and PFOS was evaluated within the scope of E2247-23. Please note that PFAS compounds are ubiquitous in the environment and this limited review is not to be construed as confirmation that PFAS compounds are not present in, at or under the site.

1.3 Standard of Care

This ESA was performed in accordance with generally accepted practices of this profession, undertaken in similar studies at the same time and in the same geographical area. We have endeavored to meet this standard of care, but may be limited by conditions encountered during performance, a client-driven scope of work, or inability to review information not received by the report date. Where appropriate, these limitations are discussed in the text of the report, and an evaluation of their significance with respect to our findings has been conducted. No limitations significantly impacted our ability to identify RECs for the site.

Phase I ESAs, such as the one performed at this site, are of limited scope, are noninvasive, and cannot eliminate the potential that hazardous, toxic, or petroleum substances are present or have been released at the site beyond what is identified by the limited scope of this ESA. In conducting the limited scope of services described herein, certain sources of information and public records were not reviewed. It should be recognized that environmental concerns may be documented in public records that were not reviewed. No ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Performance of this practice is intended to reduce, but not eliminate, uncertainty regarding the potential for RECs. No warranties, express or implied, are intended or made. The limitations herein must be considered when the user

of this report formulates opinions as to risks associated with the site or otherwise uses the report for any other purpose. These risks may be further evaluated – but not eliminated – through additional research or assessment. We will, upon request, advise you of additional research or assessment options that may be available and associated costs.

1.4 Additional Scope Limitations, ASTM Deviations, and Data Gaps

Based upon the agreed-on scope of services, this ESA did not include subsurface or other invasive assessments, vapor intrusion assessments or indoor air quality assessments (i.e., evaluation of the presence of vapors within a building structure), business environmental risk evaluations, or other services not particularly identified and discussed herein. Credentials of the company (Statement of Qualifications) have not been included in this report but are available upon request. Pertinent documents are referred to in the text of this report, and a separate reference section has not been included. Reasonable attempts were made to obtain information; however, in some instances, the information requested is not, or was not, received by the issuance date of the report. Information obtained for this ESA was received from several sources that we believe to be reliable; nonetheless, the authenticity or reliability of these sources cannot and is not warranted hereunder. This ESA was further limited by the following:

- At the time of the site reconnaissance, the basement areas were not observed due to unsafe structural condition.
- Access onto the Rockpile Area was not available due to the recent rains and the muddy conditions; hence, current observations were made from the crop field nearby. Details on the rock pile were not visible due to dense vegetation.
- The wheat fields on the site were about knee-height, limiting visibility of the ground surface.
- During the site reconnaissance, portions of Zone 2 could not be observed due to farm equipment/storage obstructions.

These limitations did not significantly impact our ability to identify RECs.

An evaluation of the significance of limitations and missing information with respect to our findings has been conducted, and no significant data gaps were identified based on the information available at the time of report issuance.

This report represents our service to you as of the report date and constitutes our final document; its text may not be altered after final issuance. Findings in this report are based upon the site's current utilization, information derived from the most recent reconnaissance and from other activities described herein; such information is subject to change. Certain indicators of the presence of hazardous substances, petroleum products

or PFAS compounds may have been latent, inaccessible, unobservable, or not present during the most recent reconnaissance and may subsequently become observable (such as after site renovation or development). Further, these services are not to be construed as legal interpretation or advice.

1.5 Reliance

This ESA report is prepared for the exclusive use and reliance of FERMI SPE, LLC and Parkhill. Use or reliance by any other party is prohibited without the written authorization of Parkhill and FERMI SPE, LLC and Terracon Consultants, Inc. (Terracon).

Reliance on the ESA by the client and all authorized parties will be subject to the terms, conditions and limitations stated in the proposal, ESA report, and Terracon's Master Services Agreement. The limitation of liability defined in the Master Services Agreement is the aggregate limit of Terracon's liability to the client and all relying parties.

Continued viability of this report is subject to ASTM E2247-23 Section 4.6. If the ESA will be used by a different user (third party) than the user for whom the ESA was originally prepared, the third party must also satisfy the user's responsibilities in Section 6 of ASTM E2247-23.

1.6 Client Provided Information

Prior to the site visit, Mr. Jacobo Ortiz, client's representative, was asked to provide the following user questionnaire information as described in ASTM E2247-23 Section 6.

Client Questionnaire Responses

Client Questionnaire Item	Client Did Not Respond	Client's Response		
		N/A*	Yes	No
Actual Knowledge of Environmental Liens that may encumber the site.				X
Actual Knowledge of Activity Use Limitations (AULs) that may encumber the site.			X	
Specialized Knowledge or Experience that is material to a REC in connection with the site.				X
Actual Knowledge of a Lower Purchase Price because contamination is known or believed to be present at the site.				X
Commonly Known or Reasonably Ascertainable Information that is material to a REC in connection with the site.			X	
Obvious Indicators of Releases at the site.			X	

*N/A = Not Applicable

Mr. Ortiz reported the site's former military use is well known and an indicator of potential/actual releases at or near the site. The adjacent Pantex property is listed on the NPL. Additionally, Mr. Ortiz referenced title search documents, including groundwater and soil deed restrictions, were provided for Terracon's review. The site areas of concern are further discussed throughout the report. A copy of the questionnaire is included in Appendix C.

2.0 Physical Setting

Physical Setting Information		Source
Topography		
Site Elevation	Approximately 3,500 to 3,565 feet above sea level	USGS Topographic Map, Sevenmile Basin, Texas Quadrangle, dated 2019 (Appendix A)
Topographic Gradient	Variable towards playa lakes with general gradient toward the south.	
Closest Surface Water	Playa lakes are located on the site.	
Soil Characteristics		
Soil Type and Description	<p>Estacado clay loam, 1 to 3 percent slopes - The parent material is calcareous loamy eolian deposits. A typical soil profile is 0 to 80 inches (depth) of clay loam. This soil is well drained; has low runoff; moderately high to high available water capacity; and is non-saline to very slightly saline.</p> <p>Lofton clay loam, 0 to 1 percent slopes, occasionally ponded - The parent material is clayey lacustrine deposits. A typical soil profile is 0 to 9 inches of clay loam; 9 to 52 inches of clay; and 52 to 80 inches silty clay. This soil is moderately well drained; negligible runoff; very low to moderately low available water capacity; and non-saline to very slightly saline.</p> <p>McLean clay, 0 to 1 percent slopes, occasionally ponded - The parent material is clayey lacustrine deposits. A typical soil profile is 0 to 80 inches of clay. This soil is somewhat poorly drained; negligible runoff class; very low to moderately low available water capacity; and non-saline to very slightly saline.</p>	Carson County, TX UDA NRCS Web Soil Survey*, issued August 30, 2024

Physical Setting Information		Source
Soil Type and Description (cont.)	<p>Pep clay loam, 3 to 5 percent slopes – The parent material is calcareous, loamy eolian deposits from the Blackwater Draw Formation of Pleistocene age. A typical soil profile is 0 to 80 inches of clay loam. This soil is well drained; low runoff class; moderately high to high available water capacity; and non-saline to very slightly saline.</p> <p>Pullman clay loam, 0 to 1 percent slopes - The parent material is clayey eolian deposits. A typical soil profile is 0 to 5 inches clay loam; 5 to 33 inches silty clay loam; 33 to 52 inches of clay loam; and 52 to 80 inches of clay. This soil is well drained; medium runoff class; moderately low available water capacity; and non-saline to very slightly saline.</p> <p>Pullman clay loam, 1 to 3 percent slopes – The parent material is clayey eolian deposits. This soil is 0 to 4 inches clay loam; 4 to 32 inches of silty clay loam; 32 to 51 inches of clay loam; and 51 to 80 inches of clay. This soil is well drained; high runoff class; moderately low available water capacity; and non-saline to very slightly saline.</p> <p>Randall clay, 0 to 1 percent slopes, frequently ponded – The parent material is Quaternary age clayey lacustrine deposits. This soil is 0 to 80 inches of clay. This soil is poorly drained; negligible runoff; very low to moderately low available water capacity; and non-saline.</p>	Carson County, TX UDA NRCS Web Soil Survey*, issued August 30, 2024
Geology/Hydrogeology		
Formation and Description	<p>Blackwater Draw Formation - Windblown silt</p> <p>Playa Deposits – clay and silt, sandy, gray in shallow depressions, usually covered by thin deposit of recent sediment; weathers light gray.</p>	Texas Water Development Board (TWDB**) Water Data Interactive viewer
Estimated Depth to First Occurrence of Groundwater	Approximately 260-280 feet below ground surface (bgs)	TWDB**
*Hydrogeologic Gradient	Not known - may be inferred to be parallel to topographic gradient (variable toward playa lake, generally to the south).	

* <https://websoilsurvey.nrcs.usda.gov/app/WebSoilSurvey.aspx>

** <https://www3.twdb.texas.gov/apps/waterdatainteractive/groundwaterdataviewer#>

*** The groundwater flow direction and the depth to shallow, unconfined groundwater, if present, would likely vary depending upon seasonal variations in rainfall and other hydrogeological features. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site cannot be directly ascertained.

3.0 Historical Use Information

Terracon reviewed the following historical sources to develop a history of the previous uses of the site and surrounding area. Copies of selected historical documents are included in Appendix C.

3.1 Historical Topographic Maps, Aerial Photographs, and Sanborn Maps

Readily available historical USGS topographic maps and selected historical aerial photographs (at approximately 10-to-15-year intervals) were reviewed to evaluate land development and obtain information concerning the history of development on and near the site. Reviewed historical topographic maps and aerial photographs are summarized below.

Historical fire insurance maps produced by the Sanborn Map Company were requested from Environmental Risk Information Services (ERIS) to evaluate past uses and relevant characteristics of the site and surrounding properties. Based upon inquiries to the above-listed Sanborn provider, Sanborn maps were not available for the site.

- Topographic maps:
 - Sevenmile Basin, Texas, dated 1953, 1967, 1973, 2016, 2019 (1:24,000)
- Aerial photographs: 1937, 1942, 1954, 1967, 1973, 1985, 1997, 2004, 2005, 2006, 2008, 2010, 2012, 2014, 2016, 2018, 2020, and 2022 (1" = 3,200')

Historical Maps and Aerial Photographs

Direction	Description
Site	Agricultural and/or vacant, undeveloped land (1937-2022); several playa lakes and surface water drainage (1937-2022); multiple apparent rural residences (1937-2022); development associated with governmental activities, remaining remnant debris / Texas Tech Research Farm (TTRF) (1954-2022).
North	Agricultural and/or vacant, undeveloped land (1937-2022); surface water drainage (1937-2022); rural residence (1937-1942); Pantex and associated development (1954-2022).

Direction	Description
East	FM 2373 (1937-2022); agricultural and/or vacant, undeveloped land (1937-2022); playa lake (1937-2022); apparent gravel pit (2012-2022); Pantex office building (2018-2022).
South	Railroad tracks and Highway 60 (1937-2022); agricultural and/or vacant, undeveloped land and rural residences (1937-2022).
West	FM 683 (1937-2022), followed by agricultural and/or vacant, undeveloped land with surface water drainage (1937-2022); various rural residences (1937-2022).

Features associated with the former governmental activities, Texas Tech Research Farm (TTRF), and Pantex are discussed further in Sections 3.7, 4.1 and 5.4.

A circular feature (like an upside down spy-glass) is located on the east-central portion of the site on the 1954 through 1967 historical aerial photographs, and is faded/apparently out-of-use by 1973. This area is located within a present-day wheat field. Based on the military-use nature of the site, and the fact that this feature appears outside former investigations, this unknown feature and its possible military-related usage constitutes a REC for the site.

3.2 Historical City Directories

The Digital Business Directory and Cole city directories used in this study were made available through ERIS (selected years reviewed: 1970-2023) and were reviewed at approximate five-year intervals, if readily available. City directory listings were not available or were not listed for the years prior to, between, or after the city directory listings included in the table below. The current street address for the site was identified as 688 FM 683.

Historical City Directories

Direction	Description
Site	688 FM 683: <u>Research Farm / Texas Tech University Farm</u> (2008-2023); John Smith (2012-2023); Jody Green (2016-2023).
North	FM 2373: No Listings in Range.
East	FM 2373: No Listings in Range.
South	Railroad tracks followed by Highway 60.
West	665 FM 683: Residential (2012-2023). 707 FM 683: Residential (2012-2023). 711 FM 683: Residential (2012-2023). 773 FM 683: Residential (2012-2023). 789 FM 683: Residential (2020-2023). 795 FM 683: Residential (2012-2023). 863 FM 683: Residential (2016-2023).

The Texas Tech Research Farm is discussed further in Section 4.1.

3.3 Site Ownership

Based on a review of information obtained from the Carson County Appraisal District (CCAD) assessor's records, the current site owner for most of the site is Texas Tech University. Parcel No. 8167 identified Pantex – US Government as a prior owner. Prior ownership for the remaining parcels were not included in the online information. A small portion on the southwestern portion of the site is identified as being associated with Parcel No. 3841, which is currently owned by Tray Cattle Company. Prior owners of this parcel include various individuals. The site owner information reviewed is included in Appendix C.

3.4 Title Search

At the direction of the client, a title search was not included as part of the scope of services.

The client received the title search report dated April 25, 2025, which included copies of Soil Deed Certification, Groundwater Deed Certification, Industrial Solid Waste Disposal Site Deed Recordation, and an Affidavit to the Public for specific areas on the TTRF property. These documents were provided for Terracon's review, are provided in Appendix C, and a summary is provided below.

- Soil Deed Certification (dated September 21, 2009 and executed by Guy Bailey, President of Texas Tech University System). This document was executed and recorded following investigation and remediation of contaminant releases from [the United States Department of Energy/National Nuclear Security Administration] USDOE/NNSA's Pantex Plant that impacted the Site [Texas Tech Research Farm (TTRF)]. It includes a list of mostly shallow soil contaminants in excess of background levels in Tracts 17 & 22 (see Figures 3 & 4 depicting approximately 500 acres total in the eastern portion of the [TTRF]), but deemed to be protective of human health and the environment as long as the identified portions of were used in a non-residential fashion across the impacted areas (as opposed to in just one particular place) through recordation of institutional controls.

The institutional controls include: (1) restriction of land use in Tracts 17 & 22 to industrial/commercial purposes; and (2) restriction of continuous anthropogenic release of water to the ditches or playa in Tracts 17 & 22, unless allowed by an existing permit or approval by [Texas Commission on Environmental Quality] TCEQ and [United States Environmental Protection Agency] USEPA.

The two areas covered by the Soil Deed Certification are associated with Playa 4 on the eastern portion of the site and a triangle-shaped area on the northern portion of the site. Based on the Deed Certification, these areas constitute a controlled REC

(CREC). Based on the future development plans of the site, the Soil Deed Certification areas constitute a REC for the site, as site soils in these areas may be disturbed.

- Groundwater Deed Certification (dated September 21, 2009 and executed by Guy Bailey, President of Texas Tech University System). This document was executed and recorded following investigation and as part of remediation of contaminant releases from DOE/NNSA's Pantex Plant that impacted the [TTRF Property]. It includes a list of contaminants in perched groundwater on the [TTRF Property] including volatile organic compounds (VOCs), metals, and contaminants associated with explosive manufacturing. It notes that the groundwater contaminants are being remediated by USDOE/NNSA in accordance with a state and federally approved remediation plan that requires post-closure care and institutional controls.

The institutional controls include: (1) restriction of all perched groundwater use is described area (see Figures 1 & 2); (2) restriction on drilling to depths greater than 180 feet within the described restriction zone (see Figures 1 & 2) unless authorized by USDOE/NNSA (authorization process requires 60 days' notice; (3) access shall be given at reasonable times and with reasonable notice to USDOE/NNSA, USEPA, and TCEQ for purposes consistent with cleanup actions and controls generally recognized herein; and (4) use of the land described in Figures 1 & 2 shall be consistent with maintaining the integrity of the components of the remedy (i.e., monitoring wells, conveyance lines, in situ remediation vaults, injection wells, and associated utilities located almost exclusively in the far eastern portion of the [TTRF Property]), including 10 days prior notice to and coordination with USDOE/NNSA for any excavations in the areas identified in Figure 3.

The area described by the Groundwater Deed Certification is located on the northern boundary of the site. Based on the depth to groundwater, the Groundwater Deed Certification area constitutes a CREC for the site. Any groundwater monitoring wells part of this area would need to be left undisturbed until regulatory closure is achieved or unless other arrangements are made. Correspondence with the TCEQ, Pantex Plant representatives, and the USDOE is recommended to evaluate next steps in this area.

- Industrial Solid Waste Disposal Site Deed Recordation (executed March 25, 1991 by Samuel E. Curl, Texas Tech University). This document indicates that an approximately 256-acre tract was used for disposal of industrial waste by the USDOE/Pantex Plant at or around March 25, 1991. The document indicates that it includes the area known as Pantex Plant Playa 4, which is the playa lake located on the far eastern portion of the [TTRF Property] that was subsequently investigated and remediated by NNSA/USDOE as part of the soil/groundwater work described above.

The Playa 4 area is located on the eastern portion of the site, and is discussed further in Section 4.1.

- Affidavit to the Public (executed August 28, 1991 by Pat Campbell, General Counsel and VP, Texas Tech University). This affidavit indicates that between May and October 1990, a solid waste disposal site owned by Texas Tech was operated in an area referred to as the Old Maintenance Area at the location of the Texas Tech University Pantex Farm Shop ("1 mile east of [FM] 683 and 1.6 mile north of Highway 60") near the center of the [TTRF]. In that area, three burial pits appear to have been used to dispose of solid waste including asbestos containing material (ACM) and asbestos contaminated building debris. The affidavit notes that yellow signs were used to mark the boundaries of the [burial] sites and that "[n]otice is hereby provided to any future owner or user of the site to consult with the Texas Department of Health prior to planning or initiating any activity involving the disturbance of the landfill cover or monitoring system."

Based on the material buried, the Affidavit to the Public regarding the documented buried asbestos building debris in Zone 2 on the TTRF property does not constitute a REC for the site. If the material is to be disturbed during construction activities, the buried asbestos material should be handled in accordance with applicable regulations.

3.5 Environmental Liens and Activity and Use Limitations

The ERIS regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases. Please note that in addition to these federal and state listings, AULs can be recorded at the county and municipal level that may not be listed in the regulatory database report. Environmental lien and activity and use limitation records recorded against the site were provided by the client, and were reviewed in Section 3.4.

3.6 Interviews Regarding Current and Historical Site Uses

The following individual was interviewed regarding the current and historical use of the site.

Interview

Interviewer	Name / Phone #	Title	Date/Time
Rachelle Christian	Jason Green / 806-223-6943	On-site Farmer/Property Manager	04/25/2025 @ 10:30 am 05/07/2025 @ 9:30 am

Terracon interviewed Mr. Green during the site reconnaissance. Mr. Green has been familiar with the site since April 1, 2013, when he and his wife, Jody Green, moved onto the Texas Tech Farm Operation (TTFO) property. Mr. Green reported the site was previously a cattle ranch until 20 years prior to his moving to the site, which had deteriorated in quality prior to his tenure. He reported that his directive was to make a cattle operation productive and profitable again for Texas Tech. He operated 200 to 350 head of cattle on native and improved grasses with a rotational grazing system; however, he has been out of the cattle business for the past four months. Additionally, he cultivates the TTFO and 6,000-acres off the TTFO property with wheat and grain sorghum production.

Mr. Green reported the history on the site included former apartments, a movie theater and grocery store, residential properties, and agricultural land on the Former Pantex Ordnance Plant in 1942. The Former Pantex Ordnance Plant closed on August 16, 1945, one day after the announcement of surrender by Japan in World War II (WWII). The land acquired to build the Pantex Plant was leased to Texas Technological College for \$1 with a recapture clause. In 1951, the federal government reclaimed the land from Tech facilities that now make up the Pantex Plant (north of the site) and started a building campaign to create a foundation of the nuclear weapons complex. The Pantex mission continued to grow over the decades as other facilities closed and responsibilities for modification, surveillance, assembly and high explosives operations were moved to the site and the remaining portions of the Texas Tech Research Farm (TTRF). Since 1975, Pantex has been the nation's primary assembly and disassembly point for the nation's nuclear weapons. Research was discontinued on the TTRF, now Texas Tech Farm Operations, since the installation of 911 addressing for heightened security reasons.

A former railroad spur (off the Chicago – Santa Fe line) entered the southwestern portion of the TTRF property, then north-northwestward to the northwestern portion of the TTRF property for moving supplies and products on and off the Pantex property. Mr. Green reported another railroad entered the northern Pantex Plant property from the west and is located farther north of the current site, as part of the Rock Island line between New York and Tucson.

Mr. Green reported that for his time on the TTFO property, that he was not aware of new environmental concerns specifically on the site; however, he noted prior residences and commercial structures associated with a portion of the former Pantex Village on the western portion of the site, an underground water line, a former sewage line, and remnant structure foundations, scrap metal, water well/windmill locations, and the environmental concerns previously noted by Stoller (see Section 4.1).

Mr. Green additionally reported that his on-site residence (presently off-site) is equipped with water supply from Pantex Water Supply (via Ogallala wells to the north of Pantex), a septic system (since the 1990s, when the Pantex lift station no longer serviced the few

buildings on the former TTRF property), electric heat provided by Xcel Energy, and Atmos natural gas.

Additional information from Mr. Green is provided in subsequent sections of the report.

3.7 Prior Report Review

Terracon requested the client provide any previous environmental reports they are aware of for the site. Portions of a *Summary Report of Sites and Investigations on the Texas Tech Research Farm at the Former Pantex Ordnance Plant, prepared for Texas Tech University and prepared by The S.J. Stoller Corporation, dated May 23, 2007*, and the *Final Remedial Investigation Report for Department of Defense Sites, Former Pantex Ordnance Plant, Amarillo, TX prepared by URS, dated April 2005*, were provided by the client to Terracon for review, and is discussed further in Section 4.1.

Terracon previously conducted a Phase I ESA on 322.3 acres of the site (draft dated April 29, 2025), of which relevant information from the prior Phase I ESA is provided in the appropriate sections of this report, as applicable.

4.0 Records Review

Regulatory database information was provided by ERIS, a contract information services company in a report dated May 6, 2025. The purpose of the records review was to identify RECs in connection with the site. Information in this section is subject to the accuracy of the data provided by the information services company and the date at which the information is updated. The scope herein did not include confirmation of facilities listed as "unmappable" by regulatory databases.

In some of the following subsections, the words up-gradient, cross-gradient, and down-gradient refer to the topographic gradient in relation to the site. As stated previously, the groundwater flow direction and the depth to shallow groundwater, if present, would likely vary depending upon seasonal variations in rainfall and the depth to the soil/bedrock interface. Without the benefit of on-site groundwater monitoring wells surveyed to a datum, groundwater depth and flow direction beneath the site may be inferred but cannot be directly ascertained.

4.1 Federal and State/Tribal Databases

Terracon reviewed standard federal, state, and tribal environmental record sources within the approximate minimum search distances as required by ASTM E2247-23 and presented in Table 2 of Section 8.0 of The Standard (Types of Government Records to be Reviewed). Further, to enhance and supplement the standard environmental record sources, Terracon reviewed additional federal, state, tribal, local, and proprietary

environmental record sources, provided by the database firm, if potentially useful and reasonably ascertainable. Please refer to Appendix D (the environmental regulatory database report) for the number of listings within each database reviewed and database definitions and descriptions.

Due to conversion of address data to location coordinates and the accuracy of government records, the facility locations depicted in the environmental regulatory database report may not match actual physical locations. As such, Terracon attempted to field-verify the actual distances of facilities of concern from the site.

The following table summarizes the site-specific information provided by the database and/or gathered by this office for identified facilities. Facilities are listed in order of proximity to the site. Additional discussion for selected facilities follows the summary table.

Listed Facilities

Facility Name and Location	Estimated Distance / Direction / Gradient	Database Listings	Findings Summary
Pantex Ordnance Plant (TX Tech) No City TX	On-site	FUDS	See discussion below
Texas Tech University Research Farm Panhandle 688 FM 683	On-site	FRS (2), IHWCA (2), GWCC (2) (metals and SVOCs),	See discussion below
Pantex Plant (USDOE) 2000 S Houston	Adjacent North / up-gradient	NPL	
Pantex Ordnance Plant / US DOE National Nuclear Security Administration Pantex Plant / US DOE NNSA Pantex Plant 955 FM 2373	Adjacent North / up-gradient	LPST (#), AST, UST, IHWCA, NOV, SHWS, ORD, IHW, AST, PFAS TRI	
Pantex Plant / US DOE Pantex Plant Panhandle, TX	Adjacent North / up-gradient	PFAS FED Sites, PFAS IND	

Pantex Ordnance Plant (TX Tech) and Texas Tech University Research Farm

Pantex Ordnance Plant (TX Tech)/Texas Tech University Research Farm (TTRF) facility was identified on the Formerly Used Defense site (FUDS), Facility Registry Service (FRS), Industrial Hazardous Waste Corrective Action (IHWCA), and Groundwater Contamination Cases (GWCC) databases. Available online IHWCA file documents were

reviewed. Additionally, the IHWCA files were ordered from the TCEQ Central Office in Austin, Texas. Receipt of the Central Office IHWCA files remains pending at the issuance of this report. The summary below was provided in the "2007 Summary Report of Sites and Investigations on the Texas Tech Research Farm at the Former Pantex Ordnance Plant" by The S.M. Stoller Corporation (Stoller), dated May 23, 2007.

The site is currently part of the Texas Tech Research Farm (TTRF) [5,855 acres] and was formerly part of the U.S. Army Pantex Ordnance Plant until its closure at the end of World War II (WWII), when it was turned over to the U.S. Army Corps of Engineers (USACE). Prior to 1942, the 16,000 plus acres were owned by small farmers for cattle grazing and crop cultivation (mainly wheat).

The original U.S. Army Pantex Ordnance Plant was 16,094 acres, and was operated by Certain-Teed Products Corporation. The Department of Defense (DoD) utilized the Former Pantex Ordnance Plant (FPOP) from 1942 to 1945 for the assembly of bombs, boosters, and shells to support the World War II effort. The facility formerly produced trinitrotoluene (TNT) pellets, 105-millimeter howitzer shells, 23-pound fragmentation bombs, 250-pound bombs, 500-pound bombs, adapter boosters, and auxiliary boosters. Some ordnance material was stored and other ordnance was demilitarized. The 16,000-acre property was originally divided into thirteen functional areas, of which four are located on the current TTRF, and the remaining areas are located on the present-day USDOE Pantex Plant facility. The four TTRF areas are: Zone 1 - Administration and Residential Area, Zone 2 - Shop and Maintenance Area, Zone 3 - an Ammunition Storage Area, and Zone 9 - a Bomb Loading Line area.

The War Department declared the plant to be surplus and the Reconstruction Finance Corporation began trying to dispose of the property by placing it for sale on September 28, 1945. No bids were received, and in mid-1946 the facility was transferred to the War Assets Administration (WAA). In 1947, Texas A&M and Texas Tech (formerly Texas Technological College) entered into a seven-year lease with the WAA to use the property. On April 1, 1949, the entire installation was sold to TTU for use as an experimental farm. The deed without warranty had stipulations that were set to expire 20 years later. The 1949 deed was rendered void and deed free of stipulations to TTU in 1955 for the current 5,855 acres south of the present Pantex Plant. During the late 1940s and early 1950s, many of the buildings were torn down or converted into livestock shelters and classrooms. In 1951, following a survey of former WWII ordnance plants, the U.S. Atomic Energy Commission (AEC) selected the northern portion of the FPOP for expansion of its nuclear weapons assembly facility. The Army Ordnance Corps reclaimed approximately 10,240 acres north of TTRF for the AEC, and portions were rehabilitated and became the present-day Pantex Plant. Operation of the plant was awarded to Proctor and Gamble Defense Corporation in March 1951. Mason and Hangar – Silas Mason Company, Inc. took over operations on October 1, 1956 and continued operation until 2000, when a new operator, BWXT Pantex, LLC, took over (through at least 2007).

Environmental investigations have been conducted on the TTRF portion of the FPOP, and the former four zones have been subdivided into 19 differently named areas of potential concern. The 19 areas include: Zone 1 – Administration and Residential Area, Kilgore Building, Sewage Pipeline, Playa 5, Playa 5 Trash Pits, Zone 2 – Former FPOP Maintenance Area, Dunnage Mill Trash Pits, Zone 3 – cattle grazing, Zone 3 Mounds, Zone 9 – Bomb Loading Line No. 1, Zone 9 Brine Pits, Rock Pile Area, Playa 4 (aka Metcalf Lake), Playa 4 Landfill (aka Playa 4 Trash Pits and Debris Mounds), Lake Mounds, Burning Grounds, Carbon Black Pits, Northeast Pistol Range and Firing Range No. 3.

- Zone 1 is located on the west TTRF boundary, and “contained an administration building, personnel building, hospital, telephone building, cafeteria with assorted warehouses, transportation building with a bus terminal, fire and police headquarters, recreation building, gate and guard houses. In addition, the residential area (portions also known then as Pantex Village) included 20 single-family homes, two 156-person dormitories, a 360-unit apartment complex, a shopping center, housing administration building, and a school. Buildings were later leased to businesses for commercial uses. By 1985, the structures had been removed except for the TTRF farm manager’s residence, a nearby mobile home installed in 1989 (not present during Terracon’s site reconnaissance), and the former Telephone Building. It is reported that remnants of WWII landscaping remain visible in the Zone 1 area, along with several building foundations, pieces of pavement and sidewalk, a metal jungle gym, a basketball court, and drainage ditches.”

A 2005 URS Group, Inc. *Final Remedial Investigation Report* did not recommend further action for Zone 1. Texas Center for Applied Technology (TCAT) reviewed the URS 2005 report and provided comments to the TCEQ Corrective Action Section. TCAT reported that although no chemicals of concern (COCs) were identified in Zone 1 and “No Further Action” was recommended; however, according to the TCEQ conditional approval letter (date unknown), sampling was requested in Pantex Village and the Administration Areas to verify no sources of contamination exist. If this sampling was not performed, it appears additional soil sampling may be necessary in these areas per the TCEQ letter. No groundwater samples were collected from Zone 1. Monitor well installation and sampling may be warranted if additional soil sampling identifies COCs.

In Terracon’s review of the 2005 URS Group, Inc. *Final Remedial Investigation Report for Department of Defense Sites*, the report details an investigation of shallow soils and groundwater to evaluate potential releases from the DoD operations. Ten 10-ft soil borings (SB-80 through SB-89) were advanced proximate to the former telephone building and hospital locations. Samples from the surface to 2 ft bgs, 4 to 6 ft bgs, and 9 to 10 ft bgs intervals were analyzed for the presence of volatile organic compounds (VOCs) and semi volatile organic compounds (SVOCs). Surface samples collected proximate to the former hospital

were additionally analyzed for the presence polychlorinated biphenyls (PCBs) and silver to evaluate potential releases to soil from the historic storage of a large number (unknown quantity) of electric transformers associated with the hospital.

The report indicated that laboratory data for the analyzed constituents did not result in detections of COCs above applicable Risk Reduction Standard 1 (RRS 1) or 95% Upper Threshold Limit (UTL) standards.

Based on the residential and retail (movie theater and grocery store) usage of the site in Zone 1 and absence of groundwater and soil impacts, historical activities associated with Zone 1 do not constitute a REC for the site.

- According to the 2007 Stoller Summary Report, "Abandoned sewage pipe (believed to be 24-inch diameter) traverses the TTRF from the southwest corner (from residential area and the former Amarillo Air Force Base [AFB – off-site to the southwest]) to a Lift Station located northeast of Playa 5 and then onto the northeast to the Old Sewage Treatment Plant area (Zone 13) on the current Pantex Plant property. The Amarillo AFB closed in 1968 and was decommissioned for use by the Texas State Technical College (TSTC). After 1968, wastewater from the TSTC and associated 300-unit residential complex were discharged to Playa 5 via overland flow from an intentional opening in the sewage pipeline. Additionally, the nearby Highland Park School and subdivision were connected to the sewage line. TSTC also leased warehouses to businesses, notably a Bell Helicopter assembly plant, and sewage and wastewaters were discharged under permit from those facilities to the pipeline leading to Playa 5. This discharge continued until 1992, when the wastewater was rerouted to the City of Amarillo treatment facilities. In this time period, the facilities generating the discharged waste were residential, commercial and light industrial concerns." The Stoller's 2006 RCRA Facility Investigation Report (RFIR) recommended no further action and the Sewage Pipeline receive a RRS 1 closure because no residual sludge (was observed in the pipeline at its entrance beneath the TTRF during an inspection in 2003) and therefore no contamination [was] found. Stoller reported "No further action is known to be either required or contemplated for the sewage pipeline at this time." According to Mr. Green, there may be residual heavy metals in the ground related to the former sewer overland flow or in Playa 5. Based on the presence of the sewage line on the site and overflow portions on the site, and potential future site media management plan (MMP), the potential presence of heavy metals in site media constitutes a REC for the site.
- Zone 2 is located in the west central region of the TTRF. According to the 2007 Stoller Summary Report, "Former FPOP maintenance area consisting in part of a paint shop, laundry, gasoline depot, and locomotive repair buildings. Modern buildings and former building slab foundations currently [~2007] used for farm supply and equipment storage."

A previous investigation by URS in 2005 identified “several VOCs, [arsenic] AS and [chromium] CR above [Risk Reduction Standard 2] RRS2 in the perched aquifer well. One SVOC [bis-(2-Ethylhexyl)phthalate (BIS2EHP)] was detected in Ogallala well Z2-MW-16, AS in Z2-MW-18, and CR in both of these Ogallala wells above RRS 1.” URS reported that the “...contaminant exceedances [in groundwater] were not accepted as resulting from past DOD activities and it was recommended that long-term monitoring for metals and VOCs be undertaken by TTU. TCAT and Stoller opined that additional groundwater investigation was recommended in Zone 2. Additionally, based on Terracon’s review of additional information available from online regulatory file information, groundwater wells were installed northeast and southwest of the former dry-cleaning building; however, none were installed in the inferred down-gradient south/southeast direction. Based on the exceedances of COCs in groundwater and absence of groundwater evaluation in the down-gradient position, the previous activities in Zone 2 constitute a REC for the site.

Based on the review of the presented data in the URS report, barium, cadmium and lead were detected at concentrations above RRS 1 and 2 and applicable 95% Upper Threshold Limits (UTLs) in soil in numerous soil sample locations and at varying depths. It should be noted that regarding the metal’s evaluation, the RRS 1 decision criteria are the depth-specific background 95% UTLs that were established for the Pantex Plant. The UTLs used in this investigation are from the Department of Energy Pantex Plant, Amarillo, Texas (Batelle Pantex, June 1999). URS recommended the removal of the lead affected soil to meet RRS 1 standards. Terracon does not have record of the remediation activity being completed. Based on the exceedances of COCs in soils and the unknown resolution of remedial activities taken, the detected concentrations of COCs in soil above RRS 1 standards in Zone 2 constitute a REC for the site.

The 2005 URS report indicates that between 1949 and 1969, Texas Tech stored pesticides in some buildings in Zone 2. The Phillips Chemical Company also stored fertilizers on the property in the 1950s under their lease with Texas Tech. Adair Grain and Levi Strauss rented warehouse space in Zone 2 from Texas Tech during the 1950s and 1960s.

Water from Playa 5 (detailed further below) was reportedly pumped to Zone 2 for irrigation for crop production by Texas Tech between 1974 and 1992. Farm equipment storage, welding operations and fuel storage in support of agricultural equipment were operated in the Zone 2 shop since the 1980s.

The investigation of the Texas Tech or associated lease operations within Zone 2 were not included in the scope of services for the 2005 URS report to evaluate the environmental impacts from the DoD operations.

Based on the nature of usage and duration of operations and absence of documented investigation, the storage of pesticides, fertilizers, fuel storage and welding operations, and application of waters from Playa 5 broadly across the Zone 2 area constitute a REC for the site.

- Playa 5 (a.k.a. Sewage Playa) is located in the southwestern corner of the TTRF, south/southeast of Zone 1. "Periodically received sewage and wastewater discharge from former Amarillo AFB residential areas, as well as post-WWII commercial/light industrial occupants of former AFB facilities. As of 1992, discharge from these facilities was permanently rerouted to City of Amarillo sewage treatment facilities."

Additional information provided by Stoller indicated that sewage and wastewaters were also routed to Playa 5 from the Iowa Beef Packers plant for a period of several years (early- to mid-1970s). IBP was no longer documented as sending wastewaters to Playa 5 under permit in 1978.

A Phase I Remedial Investigation at Playa 5 was conducted by Ebasco Services, Inc. in 1994 under direction of the USACE. Field activities included collecting 19 surface soil samples and 18 soil borings to 10 feet bgs around Playa 5. In addition, 10 sediment and 5 surface water samples were collected from within the playa boundary. Analyses conducted on the soil, sediment, and surface water included metals, nitrate/nitrite, pesticides, PCBs, pH, SVOCs and VOCs. Three groundwater monitoring wells were also installed around Playa 5 into the first-encountered water. At the time of installation, the depth to water was 236 to 250 feet bgs. The monitoring well samples were analyzed for metals, pesticides, PCBs, SVOCs, VOCs, nitrate/nitrite, pH, and other water quality parameters. Ebasco indicated that chemicals of concern were those that exceeded Risk Reduction Standard 1 (RRS 1) action levels, and included chlordane in surface soils, chromium in surface water and sediment, and mercury in groundwater. Ebasco "recommended no further remedial action at Playa 5, but suggested continued monitoring of the groundwater wells due to the presence of low levels of mercury in two of three monitoring wells."

Stoller in 2006 reported that "surface soil exceedances for chlordane were considered possibly associated with anthropogenic use related to past farming operations, and it was not detected in other media. ...based on its [chromium] tendency to partition strongly to particulate matter, [it] was not considered likely to migrate further into the subsurface or groundwater. The TTRF RCRA Facility Investigation Report (Stoller 2006) stated that closure recommendations within its scope only took into consideration those [COCs] attributed to TTU and its tenants. Therefore, closure of Playa 5 would be subject to USACE findings from its then-ongoing [Remedial Investigation] RI and any associated corrective actions." No other information has been received on this subject. Based on the

documented affected groundwater and the potential use of site soils for construction purposes, the historical sewage disposal into Playa 5 constitutes a REC for the site.

- Zone 3 is located in the south-central region of the TTRF. "Zone 3 contains partially demolished and/or deteriorated remains of 102 former munitions storage bunkers known as "igloos" located in 15 evenly spaced parallel north/south rows." Earthen berms surround each bunker on three sides. "Zone 3 also held two ammunition loading platforms, two guard houses, and six guard towers. Railroad lines led from the shipping building at each FPOP industrial zone to the loading platforms in Zone 3. The finished ammunition was placed in the storage igloos until taken to the railroad loading dock area for shipment. There are no current farm operations in Zone 3. Previous farm activity was limited to cattle grazing. No source abatement measures have been conducted at Zone 3 other than termination of activities. At the time of closure, there was no known regulatory requirement for action or investigation at Zone 3 proper at this time other than the TCEQ's June 7, 2002 request for sampling as part of the USACE RI. Based on the lack of environmental investigation and likelihood for the presence of explosives and UXO materials remaining proximate the munitions bunkers, the munitions bunkers constitute a REC for the site.
- Zone 9 is located on the northwest portion of the site. The area encompasses approximately 100 acres and was historically improved with 39 buildings. The area was not utilized by the DoD after 1945, and several buildings were burned in a grass fire in the early 1990s resulting in Texas Tech tearing down these buildings. Foundations, concrete and support structures remain. There are a number of concrete washout sumps associated with historic operations that remain and lead to a concrete-lined drainage channels leading away from the buildings. The 2005 URS report notes that there are 5 lagoons with earthen berms which contain brine water from hide rendering operations conducted during the 1970's and 1980's (TCT, 1990; USACE, 2001).

The 2005 URS report indicates the area was utilized for the manufacturing of bombs and pellets. "During the WWII era, 23 buildings in Zone 9 may have been involved in the use, storage, or disposal of hazardous materials or waste (USACE, 2001)."

Following Texas Tech's acquisition of the property in 1949, Zone 9 was utilized for a research project regarding a herd of 1,000 sheep until approximately 1963. Hay and grain were stored in various buildings.

"In the early 1950s [through 1969], Texas Tech leased some of the Zone 9 buildings to Phillips Chemical Company for Carbon Black and ammonium nitrate storage" (URS 2005).

Between 1972 and 1988, Texas Tech leased Zone 9 buildings to three different hide rendering operations (GENESCO (1972-1973), Consolidated Packers Hide Company (1973-1978), and Dreiling Hide Company (1978-1988)). Dreiling constructed 5 lagoons at the north end of Zone 9 to prevent brine water from contaminating adjacent agricultural areas (Environmental Science and Engineering, 1995). Texas Tech requested that Dreiling vacate the property in 1988.

URS reported that the post-WWII operations (storage and packaging of fertilizers, pesticide storage, grain storage, and hide rendering) were not investigated as part of their evaluation. Based on the nature and duration of these operations in Zone 9, the agricultural activities constitute a REC to the site.

To address the WWII activities in Zone 9, environmental investigations of surface and subsurface soil and both Perched Zone and Ogallala Aquifer groundwater were conducted. Investigation activities were conducted in 1990, 1994, and between September 2002 and June 2004. The investigation activities included the advancement of the following:

Investigation Phase	Media and Frequency	COCs
Preliminary Assessment TCT - 1990	Soil Borings - 11 Soil Samples - 15 Depth - 4 ft bgs Visual and Magnetometer Survey	Explosives Metals
Soil Assessment RI - 2004	Soil Borings - 22 Soil Samples - 22 Depth - 10 ft bgs Sediment (Central Drainage) Monitoring Wells - 3 (Perched Zone)	Explosives Metals
Phase I Soil Investigation URS - Sep-Nov 2002	Soil Borings - 64 Depth - 30 ft bgs Caprock Boring - 4 Depth - 70 ft bgs Water Table Soil Borings - 4 Depth - 250+ ft bgs Surface Sample - 10	VOCs, SVOCs, Explosives, Metals Surface Samples - PCBs
Phase I Groundwater Investigation URS - Sep 2002-April 2003	Perched Well - 4 Depth - Unknown Ogallala Well - 3 Depth - Unknown	VOCs, SVOCs, Explosives, Metals
Phase II Groundwater Investigation URS - Sep-Dec 2003	Ogallala Well - 3 Depth - Unknown	VOCs, SVOCs, Explosives, Metals

Investigation Phase	Media and Frequency	COCs
Phase II Soil Investigation URS – May-June 2004	Near Surface Boring – 12 Depth – 5 ft bgs Soil Boring – 9 Depth – 30 ft bgs Caprock Boring – 3 Depth – 50-70 ft bgs	Specific COCs based on previous investigation

The 2005 URS report provides a detailed account of the analytical findings for each building source, which was investigated followed by a summary of findings for the investigations conducted in Zone 9.

The Conclusions and Recommendations section for Zone 9 caveated that operations associated with Texas Tech occupancy following 1949 detailed above were not specifically evaluated. The findings of the investigations indicate the presence of multiple explosive compounds at concentrations above RRS 1 and RRS 2 standards in the areas primarily proximate to the washout racks located at Buildings 9-13, 9-17, 9-26, 9-36, and 9-39, the Central Drainage Ditch, and the area adjacent to Building 9-14. A host of VOCs were detected above RRS 1 and RRS 2 standards. The report caveated that “because of the long history of land use within Zone 9 by entities other than DoD, unlike explosive compounds, the party or parties responsible for the VOCs cannot be determined with certainty.”

The report indicates that metals concentrations were detected in soils but did not exhibit patterns consistent with a release from potential DoD sources and suggested that the distribution indicates the former brine lagoons were the sources for the elevated metals concentrations observed. Barium and Lead were present above applicable UTLs in surface soils. The barium concentrations were considered outliers due to their presence surficially and random distribution. Lead concentrations were similarly dismissed due to their minimal occurrence and distribution.

The groundwater evaluation findings indicate no association with impacts from DoD operations in the shallow Perched Zone. Two explosive compounds, 4-amino-2,6-DNT and 2-amino-4,6-DNT, were consistently detected above RRS 1 but below RRS 2 standards in the Ogallala Aquifer well Z9-MW-08. URS recommends long-term monitoring in Zone 9 for the presence of these constituents. Terracon does not have access to the results of on-going evaluation of groundwater in the Zone 9 groundwater wells.

Based on the presence of multiple explosive compounds detected during the phases of soil and groundwater investigations and the unclear resolution of their presence, and based on the nature and duration of agricultural, brine hide lagoon operations, and carbon black operations, the historic presence munitions

manufacturing activities, carbon black, and the industrial agricultural activities constitute a REC to the site in Zone 9.

- The Burning Grounds Area is located east-northeast of Playa 4 and covers approximately 4 acres. There is an inner burning mound, and two east-west trenches located north and south of the mound. These areas are visible on the 1944, 1953, and 1956 aerials as indicated by the 2005 URS report.

Between 1942 and 1945, the Burning Grounds Area was utilized to burn ordnance and explosives. The URS indicated that the Burning Grounds may have been used to burn TNT and/or dispose of ordnance litter generated from burning. Based on the topography of the area, it is noted by URS that surface runoff from the Pantex facility accumulates in the Burning Grounds Area due to a depression from the settling or lack of backfill following the operation. Since 1989, the Burning Grounds Area has been included in the Pantex Plant Buffer Zone area designated by DOE (same as Groundwater Ded Certification area).

A preliminary assessment was conducted by TCT in 1990 and a Remediation Investigation/Feasibility Study by CH2M Hill in 1999 prior to URS's investigation activities conducted in three phases in August to October 2003 (Phase I), May to August 2004 (Phase II) and January 2005 (Phase III).

The TCT investigation comprised of a visual inspection, electromagnetic (EM) survey, magnetometer, and metal detection surveys, excavation test pits, and collection and analysis of seven soil samples to a maximum depth of 4 ft bgs. Unexploded Ordnance (UXO) materials were observed in the upper 18 inches of soil, a layer of burned TNT was observed along with significant metallic objectives within the southern and central mound area and burrow pit. TNT and TNB were detected above practical quantitation limits (PQLs) and seven metals were reported above UTLs in the soil samples (URS, 2005).

CH2M Hill's investigation consisted of advancing 12 soil borings to 10 to 15-ft bgs. Bis(2-ethylhexyl)phthalate, 1,2,3-trichloropronae and several inorganics were reported above the PQL or UTL in soils.

Groundwater and soil delineation efforts were not conducted during the TCT or CH2M Hill investigation phases. The table below summarizes the URS's soil and groundwater investigation activities at the Burning Ground Area.

Investigation Phase	Media and Frequency	COCs
Phase I URS – Aug-Oct 2003	Soil Borings – 1 Depth – 31.5 ft bgs Caprock Borings – 3 Depth – 70 ft bgs Water Table Soil Borings – 1 Depth – 279 ft bgs Perched Well – 2 Depth – 279 ft bgs	Soil - VOCs, SVOCs, Explosives, Metals - Upper 20 ft bgs Dioxins/Furans Groundwater - VOCs, SVOCs, Explosives, Metals
Phase II URS – May-Aug 2004	Caprock Borings – 6 Depth – 70 ft bgs Water Table Soil Borings – 1 Depth – 279 ft bgs Perched Well – 1 Depth – 279 ft bgs	Soil - VOCs, Explosives, Metals Groundwater - VOCs, SVOCs, Explosives, Metals
Phase III URS – Jan 2005	Groundwater Sampling BG-MW-20	VOCs, SVOCs, Explosives, Metals

No SVOCs, dioxins, or furans were detected at concentrations above the RRS 1 standards in the analyzed soil samples proximate to the Burning Ground Area. Barium, copper, lead and zinc were detected above applicable UTLs in one or more soil samples analyzed. An anomalous VOC was identified and dismissed based on potential laboratory contamination and a lack of presence of the constituent in subsequent assessments. The explosive constituents 2,4,6-TNT, 1,3,5-TNB, 2-Amino-4,6-DNT and 4-Amino-2,6-DNT exhibited concentrations above applicable RRS 1 standards but did not exceed applicable RRS 2 criteria with the exception of 2,4,6-TNT in soil sample SB-170 (7 to 8 ft bgs) with a concentration of 14,000 micrograms per kilogram (ug/kg).

The SVOC and VOC detected constituents were dismissed as laboratory or field contamination and were not deemed to potential COCs associated with the site. Similarly, the chromium detection was considered anomalous in nature and was not replicated in subsequent sampling events.

Explosive compounds were not detected above applicable RRS 1 and the extent of the detected constituents are considered to be defined horizontally to the north and south.

In URS's recommendations section, it is indicated that an estimated 10% or less of the Burning Grounds Area has been surveyed for the presence of unexploded ordnance/munitions and explosives of concern (UXO/MEC). While the data does indicate the potential for the constituent to leach to groundwater determining the leachability of the constituent by the Synthetic Precipitation Leaching Procedure (SPLP) would allow the material to remain onsite. The recommended course of

action would be to conduct removal actions at the site or analyze for SPLP to determine if the material could remain on-site.

Based on the presence of a Deed Recorded Ordinance for the Burning Grounds Area, it is inferred (unclear based on the information available at the time of this review) that the potential and likely presence of UXO/MEC materials buried at the Burning Grounds remain at the site.

Based on the potential and likely presence of UXO/MEC at an unknown quantity and magnitude, the historic operations at the Burning Grounds Area constitutes a REC to the site.

- The Carbon Black Pits Area covers approximately 1.4 acres in size and is evidenced by two black, denuded U-shaped bermed areas per the TCT 1990 report. The area is located approximately 800 ft south of the Burning Grounds Area and was noted to be 15 to 20 ft in depth in the USACE 2001 report.

The pits were presumed to be used by the DoD and WAA for demolition, flashing, or disposal pits. Following the purchase of the property by Texas Tech in 1949, the pits were used to burn trash generated by the Research Farm during the 1950s and 1960s. The area was used by Phillips Chemical Company to dispose of carbon black. Since 1989, the area has been used by the DOE as part of the Pantex Plant buffer zone and by Texas Tech as part of its Conversation Research Program (CRP).

A preliminary assessment was conducted by TCT in 1990 and a Remediation Investigation/Feasibility Study by CH2M Hill in 1999 prior to URS's investigation activities conducted in three phases in August to September 2003 (Phase I), May to August 2004 (Phase II) and March 2005 (Phase III).

The TCT investigation comprised of a visual inspection, electromagnetic (EM) survey, magnetometer, and metal detection surveys, excavation test pits, and collection and analysis of three soil samples to a maximum depth of 5 ft bgs. No UXO materials were observed in the test pits; however, construction and building debris, and carbon black were present. Geophysical anomalies were identified in each of the Carbon Black Pits and were inferred to be construction debris, buried waste, flashing or carbon black (TCT, 1990).

CH2M Hill's investigation consisted of advancing 6 soil borings to 20-ft bgs. Monitoring well CB-MW-8 was installed in the Ogallala Aquifer and was sampled for five quarters. Soil and groundwater samples were analyzed for VOCs, SVOCs, pesticides, PCBs, explosives, and metals. Near surface soils were additionally analyzed for the presence of dioxin and furans. Bis(2-ethylhexyl)phthalate and lead were identified as COCs. Three VOCs, 4-amino-2,6-DNT, arsenic, chromium, and silver were detected above the PQL or UTL in the analyzed groundwater

samples, but the detections did not exceed the maximum contaminant level (MCL) for the detected COCs.

Groundwater and soil delineation efforts were not conducted during the TCT or CH2M Hill investigation phases. The table below summarizes the URS's soil and groundwater investigation activities at the Burning Ground Area.

Investigation Phase	Media and Frequency	COCs
Phase I URS – Aug-Sept 2003	Surface Soil – 7 Depth – 0 to 2 ft bgs Soil Borings – 4 Depth – 30 ft bgs Caprock Borings – 1 Depth – 70 ft bgs Water Table Soil Borings – 1 Depth – 279 ft bgs Ogallala Well* – 1 Depth – Unknown	Surface Soil - Explosives Soil - VOCs, SVOCs, Explosives, Metals - Upper 20 ft bgs Dioxins/Furans Groundwater - VOCs, SVOCs, Explosives, Metals
Phase II URS – May-Aug 2004	Soil Borings – 4 Depth – 30 ft bgs Ogallala Well* – 1 Depth – Unknown	Soil - VOCs, SVOCs, Explosives, Metals Groundwater - VOCs, SVOCs, Explosives, Metals
Phase III URS – March 2005	Groundwater Sampling CB-MW-19	VOCs, SVOCs, Explosives, Metals

* The Ogallala Aquifer was the first encountered groundwater bearing unit zone encountered during soil boring advancement. The Perched Zone Unit was not present in this area.

No UXO constituents were detected in the analytical results; however, MEC items were identified during soil boring advancement. Ten SVOCs were detected above applicable RRS 1 standards in six soil samples, but were dismissed as valid analytical results due to low Matrix Spike (MS) recoveries. 1,2-DCA was dismissed as a valid analytical result due to laboratory contamination.

Per the 2005 URS report, soil impacts associated with DoD activities are limited to explosive compounds. The other COCs detected above RRS 1 standards in soil are associated with carbon black (1,1-DCE, chloroform, PAHs, octachlorodibenzodioxin (OCDD), and metals) or are associated with laboratory contamination.

The report noted that three exceedances of bis(2-ethylhexyl)phthalate are interpreted as artifacts of sampling or laboratory contamination and are not

representative of site conditions. Arsenic and one explosive compound were detected in the analyzed groundwater samples at concentrations above the applicable RRS 1 standards.

In URS's recommendations section, it is indicated that an estimated 10% or less of the Carbon Black Pits Area has been surveyed for the presence of UXO/MEC. The URS report indicates that the DoD is not responsible for the presence of carbon black at the site, neither is it responsible for the contaminants associated with it.

Based on the presence of a Deed Recorded Ordinance for the Carbon Black Pits Area, it is inferred that the potential and likely presence of UXO/MEC materials, carbon black, and miscellaneous buried debris remain at the Carbon Black Pits Area.

Based on the potential and likely presence of UXO/MEC, carbon black, and miscellaneous buried debris, the historic operations at the Carbon Black Pits Area constitutes a REC to the site.

- The Lake Mounds Area is identified as an approximately 410 ft by 40 ft area (0.4-acres) of partially denuded land on the north shore of Playa 4 as described in the CH2M Hill 1999 report.

Between 1942 and 1949, the DoD and WAA operated at the site and likely used the area for the disposal of explosive wastes resulting from the disassembly of bombs and other munitions (TCT, 1990). Since 1989, the area has been used by the DOE as part of the Pantex Plant buffer zone and by Texas Tech as part of its CRP.

A preliminary assessment was conducted by TCT in 1990 and a Remediation Investigation/Feasibility Study by CH2M Hill in 1999 prior to URS's investigation activities conducted in August to October 2003.

The TCT investigation comprised of a visual inspection and collection and analysis of one surface soil sample analyzed for explosives. Chunks of bulk TNT were observed on the ground, and the analyzed surface soil sample exhibited elevated concentrations of TNT and TNB.

CH2M Hill's investigation consisted of advancing 3 soil borings to less than 10-ft bgs. One monitoring well CB-MW-8 was installed in the Ogallala Aquifer. COCs were not detected above applicable RRS 1 standards and investigation was ceased.

Groundwater and soil delineation efforts were not conducted during the TCT or CH2M Hill investigation phases. The table below summarizes the URS's soil and groundwater investigation activities at the Lake Mounds Area.

Investigation Phase	Media and Frequency	COCs
Phase I URS – Aug-Oct 2003	Soil Borings – 6 Depth – 30 ft bgs	Soil - Explosives, Metals Groundwater - VOCs, SVOCs, Explosives, Metals

No UXO constituents were detected in the analytical results. Barium was detected in two soil samples from soil boring SB-102 at concentrations above the applicable RRS 1 UTL.

In URS’s recommendations section, it is indicated that an estimated 10% or less of the Lake Mounds Area has been surveyed for the presence of UXO/MEC. The magnitude and extent of the elevated barium concentrations appear to be limited in nature, and URS recommends No Further Action (NFA) be taken in response to the presence of barium in soils. It is inferred that the potential and likely presence of UXO/MEC materials as well as other buried materials remain at the Lake Mounds Area.

Based on URS’s conclusions regarding the potential and likely presence of UXO/MEC and potential for miscellaneous buried debris, the historic operations at the Lake Mounds Area constitutes a REC to the site.

- The Landfill Area is located approximately 460 ft east of the Lake Mounds Area of Playa 4 and is approximately 6 acres in size. The area was utilized by Texas Tech for the disposal of metal scrap and trash. A drainage ditch that originates from Zone 12 of the DOE Pantex Plant flow around the north side of the Landfill Area and discharges into Playa 4 (URS, 2005).

Between 1942 and 1947, the DoD and WAA operated the landfill, and there is little information available regarding the types of waste disposed of in the area. CH2M Hill identified UXO-related materials during the UXO/OE avoidance procedures prior to commencing investigation. Since 1989, the area has been used by the DOE as part of the Pantex Plant buffer zone and by Texas Tech as part of its CRP.

A preliminary assessment was conducted by TCT in 1990 and a Remediation Investigation/Feasibility Study by CH2M Hill in 1999 prior to URS’s investigation activities conducted in August to October 2003.

The TCT investigation was comprised of a visual inspection and collection and analysis of one surface soil sample analyzed for explosives. Chunks of bulk TNT

were observed on the ground, and the analyzed surface soil sample exhibited elevated concentrations of TNT and TNB.

CH2M Hill's investigation consisted of advancing 15 soil borings to 15-ft bgs. Soil samples were collected from the surface at 5 ft intervals. Monitoring well LF-MW-07 was installed in the Ogallala Aquifer. Soil and groundwater samples were analyzed for VOCs, SVOCs, pesticides, PCBs, explosives, metals and several screening parameters. Lead and total recoverable petroleum hydrocarbons were present above applicable RRS 1/UTL standards and their horizontal and vertical extents were not defined. The remaining COCs were not in soil and groundwater analysis above applicable RRS 1 standards.

The table below summarizes the URS's soil and groundwater investigation activities at the Landfill Area.

Investigation Phase	Media and Frequency	COCs
Phase I URS – Aug-Oct 2003	Sediment – 3 Soil Borings – 3 Depth – 29 to 31.5 ft bgs Caprock Soil – 1 Depth – 69 ft bgs Monitoring Well - 1	Surface Soil - Explosives, Metals Subsurface Soil - VOCs, SVOCs, Explosives, Metals - Upper 20 ft Dioxins/Furans Groundwater - VOCs, SVOCs, Explosives, Metals
Phase II URS – May 2004	Soil Borings – 5 Depth – 27 to 30 ft bgs Caprock Soil – 1 Depth – 69 ft bgs Monitoring Well - 1	Soil - COCs identified in Phase I Groundwater VOCs, SVOCs, Explosives, Metals

No VOCs, SVOCs, explosives, dioxins, or furan were detected at concentrations above the RRS 1 standards in the soil samples analyzed. Antimony, copper, lead and zinc exhibited concentrations above the RRS 1 standards for the sediment samples collected within the drainage ditch. The soil sample concentrations of these constituents in subsurface soil that exceed the UTL also exceed the RRS 2 standards per the 2005 URS report.

The 2005 URS concludes that the lead exceedance is the only potential constituent that the DoD could be considered contributor to the magnitude or presence of lead in the soils. URS also concluded that as Texas Tech operated the landfill after the DoD ceased operations, the DoD could only be considered partially responsible for the presence of lead in the soils.

Chromium was detected at an estimated value concentration above the applicable RRS 1 in groundwater. Based on the estimated value of the chromium detection, the presence of chromium is not considered worthy of further investigation.

In URS's recommendations section, it is stated that while no UXO/MEC was observed, an investigation to address any UXO/MEC will be performed. Based on the information available at the issuance of this report, it is unclear if this evaluation has been conducted.

URS recommended localized soil removal to address the lead concentrations noted in the shallow soils and the ditch segment proximate to the Landfill Area. URS indicates that the presence of lead is not the sole responsibility of the DoD and is the responsibility of Texas Tech.

URS additionally opined that the 4-amino-2,6-DNT detection in the Ogallala Aquifer unit warrants long-term monitoring. This constituent is also found to be present in Ogallala Aquifer above the RRS 1 standard during groundwater evaluation of the Carbon Black Pits Area and monitoring should be managed programmatically to address the presence of the constituent at both locations.

Based on the magnitude of the elevated 4-amino-2,6-DNT concentration detected above the RRS 1 standard in groundwater, the unknown resolution of the lead concentrations in shallow soils and the change in use of the property regarding the presence of buried waste, the Landfill Area constitutes a REC to the site.

- The Rockpile Area is located approximately 200 ft east of Zone 9 and directly east of Building 9-5. The area is approximately 1 acre in size characterized by a shallow depression with a 3-ft high mound (measuring 20 ft by 50 ft) in the center. A drainage ditch from Zone 9 discharges into the south end of the depression. The 2005 URS report indicates that flow in the ditch during the WWII period may have transported explosive compounds release for the DoD activities in Zone 9 to this area. This area was also noted to receive hide brine waters during overflow events during the hide brine operations in Zone 9 by Texas Tech's lease. Additionally, the Rockpile Area is within the DOE Pantex Plant buffer zone.

A preliminary assessment was conducted by TCT in 1990 prior to URS's investigation activities conducted in August to October 2003.

The TCT investigation comprised of a visual inspection and collection and analysis of two surface soil sample analyzed for explosives and metals. No UXO/MEC were observed on the surface in the Rockpile Area. The analytical results indicated trace concentrations of TNT and barium. The sampling frequency was not deemed to be representative of the subject area.

The table below summarizes the URS's soil and groundwater investigation activities at the Rockpile Area.

Investigation Phase	Media and Frequency	COCs
Phase I URS – Aug-Oct 2003	Soil Borings – 5 Depth – 29 ft bgs Caprock Soil – 1 Depth – 69 ft bgs Monitoring Well - 1	Surface Soil - Explosives, Metals Subsurface Soil VOCs, SVOCs, Explosives, Metals

No VOCs, SVOCs, or explosives were detected at concentrations above the RRS 1 standards in the soil samples analyzed. Copper, lead and zinc exhibited concentrations slightly above the RRS 1 standards for the analyzed surface soil samples

In URS's recommendations section, the detected metals concentrations are only slightly elevated above applicable RRS 1 UTLs and that No Further Action (NFA) is required associated with the Rockpile Area.

It should be noted that the area was not analyzed to address the reported hide brine lagoon operations collecting in the Rockpile Area during overflow discharges. Additionally, the historic storage and handling of pesticides and fertilizers in Zone 9 were not considered for evaluation by URS in their evaluation of impacts from DoD operations.

Based on the lack of assessment to address the potential releases from sources not associated with DoD activities within Zone 9 historically, the noted discharge of waters from Zone 9 historic tenant operations to the Rockpile Area constitutes a REC to the site.

Pantex Plant (USDOE)

The Pantex Plant (USDOE) was identified to the adjacent north of the site in a topographic up-gradient position relative to the site and was identified as an NPL facility. The regulatory database further identified this facility to be proposed as an NPL facility on July 29, 1991, and actually listed on the NPL as of May 31, 1994. The Pantex Plant (DOE) was identified with an area of 9,031 acres. The corresponding EPA program is "Superfund Remedial", and the NPL facility remains open. A long-term remedy was selected in 2008 addressing 47 contaminated soil units and perched groundwater. In the 2023 five-year review report, the EPA concluded that the remedy remains short-term protective.

Based on a review of a *Pantex Neighborhood Environmental Project News*, September 2023 publication, Pantex has identified PFAS compounds in the perched groundwater at

the Pantex plant and in the northeastern portion of the TTRF property (the site). Potential sources of PFAS at Pantex included historical use of aqueous film-forming foam (AFFF) by the Fire Department and possible PFAS containing materials in legacy high explosive releases. Pantex reported that through monitoring over 100 perched groundwater wells and 30 Ogallala Aquifer wells, monitoring results from the Ogallala wells continue to indicate that drinking water for neighboring domestic wells and Pantex production wells is safe and protected. Pantex reported that PFAS detected in perched groundwater does not affect the protectiveness of Pantex remedial actions because of existing deed restrictions that prevent the use of perched groundwater (See Section 3.4). PFAS monitoring of the groundwater continues through the present via pump and treat systems and in situ bioremediation, according to the *Pantex Quarterly Progress Report Remedial Action Progress, First Quarter 2024*. The Southeast Pump and Treat System and the Southeast ISB System are located on the northeast portion of the site.

Based on the cross-utilization of the site (former TTRF) and the Pantex Plant northeast of the site, the historical Pantex Plant operations constitute a REC for the site. Pertinent information regarding operational areas of concern with respect to the current site boundary were discussed previously in this Section.

The remaining facilities listed in the database report do not represent RECs to the site at this time based upon regulatory status, apparent topographic gradient, and/or distance from the site.

Unmapped facilities are those that do not contain sufficient address or location information to evaluate the facility listing locations relative to the site. The report did not list facilities in the unmapped section.

4.2 Local Agency Inquiries

Agency Contacted/ Contact Method	Response
Panhandle Fire Dept / by letter	At the issuance of this report, a response had not been received from the Fire Department.
Railroad Commission of Texas (RRC) / by website review	<p>No on-site oil/gas wells or pipelines were identified.</p> <ul style="list-style-type: none"> ■ One dry hole was identified 2,010 feet west of the site. ■ The closest pipeline is located 340 feet southeast of the site, which is two crude oil transmission pipelines operated by Phillips 66 Pipeline LLC. <p>Based on distance, the dry hole and closest pipeline do not constitute a REC for the site.</p>
Texas Water Development Board (TWDB) / by website review	Numerous wells and soil borings are depicted on the site and are discussed in various sections of this report.
Panhandle Regional Planning Commission Closed Landfill Inventory / website search	Closed landfills were not identified on the site or within 0.5 mile from the site.

Agency Contacted/ Contact Method	Response
TCEQ Groundwater Contamination Map / Website	No groundwater contamination cases were depicted on the site. The USDOE Pantex Plant Amarillo was identified with a Groundwater Contamination Case. The USDOE Pantex Plant was previously discussed in Section 4.1.
EPA PFAS Analytical Tools Map / Website	The Pantex Plant USDOE facility northeast of the site is a PFAS facility, and was discussed previously in Section 4.1.

5.0 Site Reconnaissance

5.1 General Site Information

Information contained in this section is based on a visual reconnaissance conducted while walking through the site and the accessible interior areas of structures, if any, located on the site. The site and adjoining properties are depicted on the Site Diagram, which is included in Exhibit 2 of Appendix A. Photo documentation of the site at the time of the visual reconnaissance is provided in Appendix B. Credentials of the individuals planning and conducting the site visit are included in Appendix E.

General Site Information

Site Reconnaissance	
Field Personnel	Rachelle K. Christian, P.G.
Reconnaissance Date	May 7, 2025
Weather Conditions	Overcast to mostly cloudy, 55°F - 58°F
Site Contact/Title	Jason Green / Property Manager
Site Utilities	
Drinking Water	Pantex Water Supply (via Ogallala wells to the north of Pantex)
Wastewater	Septic System
Electric	Xcel Energy
Natural Gas	Atmos Energy

Building Description				
Building Identification	Building Use	Approx. Construction Date	Number of Stories	Approx. Size (ft ²)
Residence	Residence	1967	1	2,300
Carport	Vehicle parking	Unk.	1	Unk.
Kilgore Building	Pantex Sample Analysis	Pre-1967	2	
Farm Shop	Farm Shop	Pre-1945	1	

5.2 Overview of Current Site Occupants

The site is currently maintained by Mr. Jason and Mrs. Jody Green. No other occupants are present on the site.

5.3 Overview of Current Site Operations

The current on-site operations consist of maintaining the vacant land (pastureland) and agricultural land (wheat crop) of the site as part of the larger Texas Tech Farm Operation.

5.4 Site Observations

The following table summarizes site observations and interviews. Affirmative responses (designated by an "X") are discussed in more detail following the table.

Site Characteristics

Category	Item or Feature	Observed or Identified
Site Operations, Processes, and Equipment	Emergency generators	
	Elevators	
	Air compressors	x
	Hydraulic lifts	X
	Dry cleaning	
	Photo processing	
	Ventilation hoods and/or incinerators	
	Waste treatment systems and/or water treatment systems	
	Heating and/or cooling systems	X
	Paint booths	

Category	Item or Feature	Observed or Identified
	Sub-grade mechanic pits	X
	Wash-down areas or carwashes	X
	Pesticide/herbicide production or storage	
	Printing operations	
	Metal finishing (electroplating, chrome plating, galvanizing, etc.)	
	Salvage operations	
	Oil, gas, or mineral production	
	Other processes or equipment	X
Aboveground Chemical or Waste Storage	Aboveground storage tanks	X
	Drums, barrels, and/or containers ≥ 5 gallons	X
	MSDS or SDS	
Underground Chemical or Waste Storage, Drainage or Collection Systems	Underground storage tanks or ancillary UST equipment	
	Sumps, cisterns, French drains, catch basins, and/or dry wells	X
	Grease traps	
	Septic tanks and/or leach fields	X
	Oil/water separators, clarifiers, sand traps, triple traps, interceptors	
	Pipeline markers	X
	Interior floor drains	X
Electrical Transformers/PCBs	Transformers and/or capacitors	X
	Other equipment	
Releases or Potential Releases	Stressed vegetation	X
	Stained soil	
	Stained pavement or similar surface	X
	Leachate and/or waste seeps	
	Trash, debris, and/or other waste materials	X
	Dumping or disposal areas	X
	Construction/demolition debris and/or dumped fill dirt	X
	Surface water discoloration, odor, sheen, and/or free-floating product	
	Strong, pungent, or noxious odors	

Category	Item or Feature	Observed or Identified
	Exterior pipe discharges and/or other effluent discharges	
Other Notable Site Features	Surface water bodies	X
	Quarries or pits	X
	Wastewater lagoons	
	Wells	X

Site Operations, Processes, and Equipment

Air compressors

One upright air compressor was observed in the southeast portion of the farm shop during the site reconnaissance. The air compressor was located on the concrete floor, and surficial staining or releases were not observed in the vicinity of the air compressor at the time of the visual reconnaissance. Based on site observations, the air compressor does not constitute a REC for the site.

Hydraulic lifts

One aboveground hydraulic lift unit was observed in the farm shop during the site reconnaissance. The lift was not currently in use at the time of the site reconnaissance. The unit did not appear to have subsurface components, and the hydraulic fluid reservoir was observed on one of the upright posts. Staining and/or hydraulic fluid releases was not observed in the vicinity of the lift or hydraulic fluid reservoir at the time of the site visit. Based on its aboveground nature and absence of evidence of previous releases, the aboveground hydraulic lift does not constitute a REC for the site.

Two remnant inground hydraulic lifts were observed in the former garage building (Building 2-6) of Zone 2 during the site reconnaissance. The lifts were observed in the central western portion of the building and appeared out-of-use at the time of the site reconnaissance. Staining and/or hydraulic fluid releases were not observed in the vicinity of the lifts at the time of the site visit. Based on their presence, age, and unknown maintenance after WWII, the inground hydraulic lifts constitute a REC for the site.

Heating and/or cooling systems

The on-site residence is heated via natural gas, and the farm shop is heated with mobile electric heaters.

Sub-grade mechanic pits

A sub-grade mechanic pit was observed in the central portion of the former garage building (Building 2-6) of Zone 2 during the site reconnaissance. The sub-grade

mechanic pit was filled in with apparent soil and was vegetated at the surface. No staining was observed around the surface perimeter of the mechanic pit during the site reconnaissance. The depth of the pit or other historic features (i.e., floor drains, other contents) in the pit are unknown. Based on its presence and unknown maintenance after WWII, the on-site sub-grade mechanic pit constitutes a REC for the site.

Wash-down areas or carwashes

An apparent former wash bay was observed in the western portion of the former garage building (Building 2-6) of Zone 2 during the site reconnaissance. A remnant grate drain was centrally located in the former bay, and appeared to contain fluid. No noxious odors was noted in the vicinity of the drain, and no evidence of surficial staining or overflow occurrences was observed in the vicinity of the grate drain at the time of the site visit. The wash bay was formerly in use during the WWII effort, and historical usage information of the wash bay was not readily available for the report. Additionally, based on a review of the historical aerial photography, the superstructure of Building 2-6 appears to have been removed sometime between 1973 and 1985. Based on its presence and former garage activities in this building, the on-site historical wash bay constitutes a REC for the site.

Other processes or equipment

Zone 2 is the current storage area and farm shop for Mr. Green's maintaining the vacant land (pastureland) and agricultural land (wheat crop) on the site. Farm equipment supplies are stored inside the farm shop and on the adjacent building slabs or ground around the former development area. Mr. Green did not report spills or releases in this area.

Aboveground Chemical or Waste Storage

Aboveground storage tanks

Five ASTs were observed on the site during the site reconnaissance. The following describes the ASTs observed:

- One 480-gallon gasoline AST was observed on stilts over the concrete slab of the former maintenance and repair (locomotive and machine shop) building of Zone 2.
- One 1,500-gallon diesel AST was observed east of the gasoline tank, located on the former asphalt/gravel surface north of the former maintenance and repair (locomotive and machine shop) building of Zone 2.
- One 400-gallon propane AST was observed east of the diesel AST, within the footprint of the former maintenance and repair (locomotive and machine shop) building of Zone 2.

- One 500-gallon waste oil AST skid was observed off the northwest corner of the farm shop over a concrete slab of Zone 2.

Staining or releases were not observed in the vicinity of the fuel ASTs during the site reconnaissance. According to Mr. Green, the waste oil AST is serviced through a Texas Tech contract service, and the new fuels were provided by West Texas Gas and Gooden Fuels (local vendors).

One bulk water AST was observed east of Zone 2, inside of a perimeter fence with two pump houses, a former transformer fenced area and a sprinkler system. According to Mr. Green, the bulk water AST has not been used since the 1980s. Staining, releases or other environmental concerns were not noted in the vicinity of the bulk water AST or ancillary structures. Based on its former contents and current observations, the bulk water AST and ancillary structures do not constitute a REC for the site.

Drums, barrels, and/or containers ≥ 5 gallons

One 55-gallon drum of new oil on wood pallet, and six 5-gallon buckets over a plastic pallet (secondary containment) were observed in the west-central portion of the farm shop in Zone 2. Surficial staining or a floor drain was not observed in the vicinity of the drum and 5-gallon buckets.

Additional drums or plastic totes were observed in Zone 2 for the containerization of bone pile parts or trash. Surficial staining was not observed in the vicinity of the containers.

A plastic tote was observed outside the north side of the Kilgore Building, and contained waste from the laboratory analysis. According to Mr. Green, Pantex currently leases the building for their analyses, and are responsible for the tote and its disposal. Staining or releases were not observed in the vicinity of the tote during the site reconnaissance.

Based on observations, the drums, buckets and containers do not constitute a REC for the site. The current in-use items should be removed and disposed in accordance with applicable regulations.

SDS

Safety Data Sheet binders were observed in the Kilgore Building and farm maintenance shop during the visual reconnaissance. Matching of SDS to the chemical storage observed on site was not performed as part of the scope of services.

Underground Chemical or Waste Storage, Drainage or Collection Systems

Sumps, cisterns, catch basins, and/or dry wells

Sumps were observed in the southeast corner of the former woodworking building (building name was garage – Building 2-6) and in the former Boiler House (Building 2-3)

of Zone 2 during the site reconnaissance. The sump of the former woodworking building had been filled with concrete approximately six years ago by Mr. Green. Staining or releases were not observed in the vicinity of the sumps during the site visit. The former use and plumbing connection (if any) is unknown with respect to the former woodworking building; hence, the sumps constitute a REC for the site.

Septic tanks and/or leach fields

Two septic tanks were observed during the site reconnaissance; one at the Green residence and the other at the Kilgore Building. Mr. Green's residence septic tank is located west of the residence, within the pasture field. The Kilgore Building's septic tank is located north of the office building, with the leach field extending northeastward off-site Kilgore Building fenced area. Based on the apparent non-industrial effluent to the septic systems, the current on-site septic systems do not represent a REC to the site.

If the on-site septic systems are no longer intended for future use, the systems should be removed or properly closed in accordance with applicable regulations.

Oil/water separators, clarifiers, sand traps, triple traps, interceptors

An apparent sand trap was observed associated with the apparent former wash bay in the western portion of the former garage building (Building 2-6) of Zone 2 during the site reconnaissance. The sand trap was previously discussed in this Section.

Pipeline markers

According to Mr. Green, a natural gas pipeline enters the property from the west of FM 683 on the northwestern portion of the site and then either goes around or through Zone 9, and then off-site to Pantex. This pipeline is not depicted on the Railroad Commission of Texas or the National Pipeline Mapping System websites. Based on the properties of natural gas (not a liquid at standard temperature and pressure), the on-site natural gas pipeline does not represent a REC. The location of the pipeline should be taken into consideration during the proposed construction activities.

Water and sewer lines, sewer manholes or other utilities remain on the site associated with the former developmental areas of the site that have been disassembled or are fallen/demolished. Some of the brick-outlined manhole covers of the Pantex Village were filled with dirt/gravel. Future construction activities should take this into consideration when clearing the site.

Interior floor drains

Interior floor drains were observed at the following site locations: the restrooms of the Kilgore Building and the northeastern portion of the former garage building (Building 2-6), in the western portion of the Maintenance and Repair slab (locomotive and machine shop – Building 2-4), and in the former Boiler House (Building 2-3) of Zone 2 during the

site reconnaissance. The effluent connection for the floor drains is unknown, or is assumed to be connected to the sanitary sewer system. Staining and/or releases to the floor drains were not observed during the site reconnaissance. Based on the unknown effluent connection from the floor drains and the historical activities on the site, releases to the floor drains affecting site media constitutes a REC for the site.

Electrical Transformers/PCBs

Transformers and/or capacitors

Terracon observed three pole-mounted transformers north of the Kilgore Building, owned and serviced by Xcel Energy; however, no information with regard to PCB content of the transformer fluids was observed. Some transformers contain mineral oil which may contain PCBs. Additional pole-mounted transformers may be present on the site.

Xcel Energy maintains responsibility for the transformers, and if the transformers were "PCB contaminated," Xcel Energy is not required to replace the transformer fluids until a release is identified. However, evidence of current or prior releases was not observed in the vicinity of the electrical equipment during the site reconnaissance, and the on-site transformers do not constitute a REC.

Releases or Potential Releases

Stressed vegetation

Numerous areas of stressed vegetation were observed on the site associated with the previously identified environmental concern areas by Terracon and Stoller. These areas are included in or considered as part of the RECs identified by Terracon in this report.

Stained pavement or similar surfaces

A piece of construction equipment was located on the northeast portion of the former locomotive shop slab foundation, and there was an approximate 50-sf oil stain in the vicinity of the equipment. The pavement in the area of the staining was in good condition. Based on the condition of the pavement, the staining appeared to be a *de minimis* condition; hence, not a REC.

Trash, debris, and/or other waste materials

Two solid waste disposal dumpsters, serviced by Diversified Waste Management, were observed on the western portion of the site, north of the current residence. Two additional trash dumpsters were located north of the Kilgore Building (contracted through Pantex). Staining, noxious odors or hazardous waste disposal was not observed in the vicinity of the on-site dumpsters; hence, not a REC.

Trash and debris were observed in several areas on the site:

- Playa 5 Trash Pits - consisted of metal, ceramic tile, glass, brick, concrete debris at the surface.
- Dunnage Mill Trash Pit – wire, concrete, brick, scrap metal, shingles, and brush at the surface or in the depression with water.
- West of the Dunnage Mill – strapping and wire are visible at the ground surface.
- South of the Dunnage Mill – wire at the ground surface and reported hog manure.
- Northern portion – wood pallets, sheet and scrap metal, wood timber, brick, brush, and livestock bones.
- Rockpile – although Terracon could not access the rock pile area during the site reconnaissance, Mr. Green reported that he has observed bricks, clay bricks and construction debris in the central mound of the rock pile.
- Zone 9 – three large piles of wood pallets were observed on the west side of the northern structure. Additionally, a debris area was observed on the central-east side, which contained wood posts, brush, metal water stock tanks, bricks and additional scrap metal.
- Zone 2 – four buried to partially buried asbestos piles, which are mostly covered with vegetation. One pile had an exposed area, and bricks, soil and other building debris was observed on the surface of the pile.
- Railroad spurs southwest of Zone 3 – wood, concrete poles, cross-ties.
- Several documented landfill areas are associated with Playa 4, which were previously discussed in Section 4.1.
- Carbon Black Pits – carbon black was observed on the ground surface within the knee-high vegetation.

According to Mr. Green, the public was formerly allowed to bring their trash to the site and may have been placed in any number of the documented or undocumented buried trash pit areas on the site.

Staining, releases or noxious odors were not observed in the vicinity of the on-site trash and debris. Based on the amount of debris buried on the site, and the historical operations discussed in Section 4.1, the on-site trash and debris described above constitutes a REC for the site.

Dumping or disposal areas

Three areas of brine pits were observed adjacent east and west of the northern structure on Zone 9. The brine pits were discussed in Section 4.1.

Construction/demolition debris and/or dumped fill dirt

Construction/demolition debris was observed in the former Pantex Village area, the former officer's residential area, Kilgore Building – former Feed Mill and feed lot, Zone 9, northern portion, and Zone 2.

Several of the remnant structures in the Pantex Village are noted on the Stoller report to have bomb shelters/basements. According to Mr. Green, the officer's houses likely didn't have basements, as his house, a former officer's house, does not have a basement, and these structures were likely cookie-cutter. Terracon did not enter the basements of the remnant structures due to safety concerns. The police and fire headquarters building is noted to have an asbestos boiler in the one of the basement structures. Mr. Green has placed a heavy tree branch over the entrance to prevent disturbance of the asbestos material. Some of the other basements were covered with a mesh/wire fence to limit access.

A former feed mill was located on the east end of the Kilgore Building's metal covered cattle pens, and the feed mill base remains with remnant concrete rubble nearby.

The former Dunnage Mill has remnant building slabs, as well as most of the former structures in Zone 2.

The Zone 9 structures are somewhat demolished or fallen, and the northern building reportedly was part of a fire in the 1990s. Building construction debris was observed around most of the structures. The southern change house had a boiler in the southwest room, which is reported to be asbestos-containing.

The Zone 3, former ammunition storage igloos (aka bunkers), remain in place. The igloos are constructed of three concrete walls with a concrete floor, and three of the walls are surrounded by earthen berms. The east wall is left open, and the structures observed did not have roofs. Several of the igloos observed by Terracon exhibited debris within the igloos (i.e., tires and wood), and several had building' debris adjacent to the structure.

The former apparent homestead on the eastern-central portion of the site reported to have two windmills and concrete debris.

Additionally, there are numerous railroad grades remaining on the site; most have had the rails and cross-ties removed. Some of the cross-ties are stored east of the current farm shop.

Based on the historical use of the site, the construction debris related to several of the areas discussed in Section 4.1 represents a REC.

Other Notable Site Features

Surface water bodies

The site contains two large playas, Playa 4 and Playa 5, which were both moist from the recent rainfall, and very little water was observed ponding on the playa lake beds during Terracon's site reconnaissance. The site also contains several smaller playa-ettes. A number of stormwater drainage features were observed around the playas.

A stormwater drainage was observed crossing through the southwestern portion of the site from the east toward Playa 5. Mr. Green mentioned that Pantex had placed concrete materials in the drainage to help prevent erosion of the drainage channel. No evidence of noxious odors were noted in this area. The on-site drainage is not a REC for the site.

Two flood irrigation tail water ponds were observed on the southeastern portion of the site, and one was observed south of the western Zone 3 igloos.

A stormwater drainage system was installed on the eastern boundary, south of the Pantex office building (aka JCDC Building) to assist with stormwater runoff from their parking lots during heavy rain events. The runoff then traverses westward along the southern boundary of the site to a culvert, where the water crosses under Highway 60.

Playas 4 and 5 was previously discussed in Section 4.1.

Quarries or pits

Nine hide pits were observed or are located in the foundation of the northern structure on Zone 9. The chemical process associated with the hide processing was likely corrosive, as the concrete of the pits appeared eroded. Based on the historical operation, the hide pits and associated brine pits constitute a REC for the site.

Wells

A windmill was observed on the southwest portion of the site during the site reconnaissance. An associated water well was not observed on the Texas Water Development Board website. No staining or releases were observed in the vicinity of the windmill; hence, the windmill does not constitute a REC for the site.

It is reported that two windmills were located on the central-eastern portion of the site (former apparent homestead location), and only one former windmill location was observed during the site reconnaissance. Additionally, it is reported that the railroad operated two water wells on the southwestern portion of the site, near the stormwater inlet from the highway, for their St. Francis Railroad Station farther west of the site.

Based on a review of the 1967 and 1973 topographic maps, a windmill was located on the northeastern portion of the site, in the section of land east of the carbon black pits/burning grounds and in the former residential area on the central-eastern portion of the site.

Numerous groundwater monitoring wells are located throughout the site, with the majority located on the northeast portion of the site. The groundwater monitoring wells observed by Terracon were upright monitoring wells with locks. The monitoring wells are associated with historical and ongoing groundwater monitoring on the site being conducted by DOE/NNSA in coordination, and the affected groundwater constitutes a REC for the site.

6.0 Adjoining Property Reconnaissance

Visual observations of adjoining properties (from site boundaries) are summarized below.

Adjoining Properties

Direction	Description
North	Pantex and agricultural and vacant land.
East	Pantex office building, FM 2373, and agricultural and vacant land.
South	Railroad tract and Highway 60.
West	FM 683 followed by residences and agricultural and vacant land.

The operations associate with Pantex were previously discussed in Section 4.1. RECs associated with the site originating from current off-site operations were not identified.

7.0 Additional Services

Per the agreed scope of services specified in the proposal, additional services (asbestos sampling, lead-based paint sampling, wetlands evaluation, lead in drinking water testing, radon testing, vapor encroachment screening, etc.) were not conducted.

8.0 Declaration

I, Rachelle K. Christian, P.G., declare that, to the best of my professional knowledge and belief, I meet the definition of Environmental Professional as defined in Section 312.10 of 40 CFR 312; and I have the specific qualifications based on education, training, and

experience to assess a property of the nature, history, and setting of the site. I have developed and performed the All Appropriate Inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

A handwritten signature in blue ink, reading 'Rachelle K. Christian', is positioned above a horizontal line.

Rachelle K. Christian, P.G.

Environmental Department Manager

APPENDIX B
SITE PHOTOGRAPHS

Photo #1 View of the site from the southwest corner looking east.

Photo #2 View of the culvert and waterway south of Playa 5.

Photo #3 View of the waterway looking toward Playa 5.

Photo #4 View of the railroad area on the southern boundary.

Photo #5 View of the former structure in the northwest portion of the railroad area of the southern boundary.

Photo #6 View of the site from the southwest corner looking north.

Photo #7 Typical view of some of the on-site groundwater monitoring wells on the site.

Photo #8 View of a groundwater monitoring well on the southwestern portion of the site.

Photo #9 View of the on-site Killgore Building located on the southwest side of the site.

Photo #10 View of the former cattle pens ready for auction east of the building.

Photo #11 View of the former feedlot area south of the Killgore Building, looking east.

Photo #12 View of the former Feed Mill and concrete rubble east of the Killgore Building.

Photo #13 Additional view of the former Feed Mill area east of the Killgore Building.

Photo #14 View of a lab space inside the Killgore Building.

Photo #15 View of a restroom facility in the Killgore Building.

Photo #16 View of a restroom floor drain inside the Killgore Building.

Photo #17 View of a kitchenette in the Killgore Building.

Photo #18 View of a classroom in the Killgore Building.

Photo #19 View of the former Killgore Building Arena.

Photo #20 View of the garage and former scale east of the Arena.

Photo #21 View of the septic system north of the Killgore Building.

Photo #22 View of the sewer manhole in FM 683 before the Sewer Pipeline enters the site.

Photo #23 View of the Playa 5 Trash Pit metal debris on the surface.

Photo #24 View of ceramic tile and glass at the surface of the Playa 5 Trash Pit area.

Photo #25 View of the Playa 5 Trash Pit area.

Photo #26 View of Mr. Green's residence (a former officer's residence).

Photo #27 View of the septic tank location west of the residence.

Photo #28 View of the proposed west entrance to the site.

Photo #29 View of the western portion of the site, looking west from the residential gravel drive.

Photo #30 View of a typical sidewalk area.

Photo #31 View of a filled in sewer manhole on the former residential area.

Photo #32 View of the storage area and dumpsters on the central-southern portion of the site.

Photo #33 View of former officer's residential area and remnant debris.

Photo #34 View of a former dormitory building.

Photo #35 View of a dormitory with basement.

Photo #36 View of a former government building with basement in the Pantex Village.

Photo #37 Additional view of a remnant government building in the Pantex Village.

Photo #38 View of remnant windmill east of the Pantex officer's residences.

Photo #39 View of a sewer access conduit of the sewage pipeline in the pastureland east of the Pantex Village.

Photo #40 On-site water tank.

Photo #41 View of the drainage on the leading to Playa 5, looking west.

Photo #42 View of pastureland north of the Pantex Village.

Photo #43 View of the former Police and Fire Headquarters building. Tree stump over entrance to basement with asbestos-containing boiler.

Photo #44 View of the Dunnage Mill Trash Pit.

Photo #45 View of the former Dunnage Mill southern building slab.

Photo #46 View of the former Dunnage Mill northern building slab.

Photo #47 View of the reported landfill area east of the Dunnage Mill.

Photo #48 View of the formerly irrigated land with sewage water on the northern portion of the site.

Photo #49 Typical view of a remnant railroad grade.

Photo #50 View of a feature associated with the natural gas line crossing through the northern portion of the site.

Photo #51 View of the site from the northwest corner looking south.

Photo #52 View of a former guard tower base on the northern portion of the site.

Photo #53 View of the Soil Deed Certification area on the northern portion of the site.

Photo #54 View of the vegetated area between barbed wire fences for prairie dog town control on the northern portion of the site.

Photo #55 View of the trash pile on the northern portion of the site, adjacent to a former structure.

Photo #56 View of the site from the northeast corner looking south on the northern portion of the site.

Photo #57 View of the remnant cattle pens on the northern portion of the site.

Photo #58 View of the Rock Pile area on the northern portion of the site.

Photo #59 View of a former structure on Zone 9.

Photo #60 View of a former Change House on Zone 9.

Photo #61 Interior view of the Change House.

Photo #62 View of the boiler in the Change House.

Photo #63 View of the drainage hole on Zone 9 that empties to Playa 2 (Pantex side).

Photo #64 View of trash pile inside Zone 9.

Photo #65 View of the former East Cooling structure on Zone 9.

Photo #66 View of the former Melt and Pour structure on Zone 9.

Photo #67 View of the east Brine Pits.

Photo #68 View of the former ammonia nitrate storage building.

Photo #69 View of the northern structure on Zone 9, looking north.

Photo #70 View of a former processing pit within the structure.

Photo #71 View looking south of the two processing pits.

Photo #72 View of the former brine pit on the west side of the northern structure.

Photo #73 View of a pallet pile west of the northern structure in Zone 9.

Photo #74 View of the crop land north and west of Zone 2.

Photo #75 Interior view of the western portion of the Farm Shop (former building 2-7).

Photo #76 View of chemical containers in the Farm Shop.

Photo #77 View of the aboveground hydraulic lift in the Farm Shop.

Photo #78 View of the air compressor in the Farm Shop.

Photo #79 View of the SDS book in the Farm Shop.

Photo #80 View of the gas AST on the foundation of former building 2-4.

Photo #81 View of the diesel AST north of the former building 2-4.

Photo #82 View of the propane tank on the former building 2-4 foundation.

Photo #83 View of former rails within the foundation of former building 2-4.

Photo #84 View of leaking equipment with oily stained concrete on building foundation 2-4.

Photo #85 View of the former floor drain in building 2-4.

Photo #86 View of the former Boiler House.

Photo #87 View of the sumps in the Boiler House.

Photo #88 View of a buried asbestos area south of the Boiler House.

Photo #89 Monitoring well and former Laundry and Dry Cleaning Shop.

Photo #90 View of the former machine area in the former Laundry and Dry Cleaning Shop.

Photo #91 View of the former Laundry Storage building (building 2-24).

Photo #92 View of the former Garage (Lubrication and Storage) building 2-5.

Photo #93 View of the former wash bay and remnant sand trap.

Photo #94 View of the remnant inground hydraulic lift components.

Photo #95 View of the remnant mechanic pit.

Photo #96 View of a remnant floor drain.

Photo #97 View of the former Gasoline Station Office area with tanks (Former Building 2-21).

Photo #98 Buried asbestos area north of former Building 2-6.

Photo #99 View of former Woodworking building (Building Name was Garage – 2-6).

Photo #100 View of the filled in pit in Building 2-6.

Photo #101 View of the former sump in Building 2-6.

Photo #102 View of the waste oil tank on the northeast corner of the Farm Shop.

Photo #103 View of the former Paint Shop (Building 2-18).

Photo #104 View of the former Truck Repair Shop (Building 2-25) location.

Photo #105 View of the former Oil Tank Pump House (Building 2-8).

Photo #106 View of the Bulk Water Tank on the central portion of the site.

Photo #107 View of the two pump houses and former transformer fenced area adjacent to the bulk water AST.

Photo #108 View of an igloo in Zone 3.

Photo #109 View of a debris pile adjacent to an igloo in Zone 3.

Photo #110 Close-up view of the berm and igloo exterior wall.

Photo #111 View of the Zone 3 mounds.

Photo #112 View of the crop land on the south-central portion of the site.

Photo #113 View of the concrete debris in the former residential area on the southeast-central portion of the site.

Photo #114 View of one of the flood irrigation tail water pits on the southeast portion of the site.

Photo #115 View of the southeast portion of the site, looking east.

Photo #116 View of the concrete portion of the stormwater drainage south of the Pantex office building on the eastern boundary.

Photo #117 Continuation of the stormwater drainage south of the Pantex office building on the eastern boundary.

Photo #118 View of the crop land south of the Pantex office building.

Photo #119 View of the irrigation wells on the northeast portion of the site, with the Pantex office building in the background.

Photo #120 View of the former pistol range, looking west.

Photo #121 View of the Firing Range No. 3 backstop (fill from pit in foreground) from the west.

Photo #122 View of the Firing Range No. 3 backstop from the east.

Photo #123 View of a carbon black mound in the Carbon Black Pits area.

Photo #124 View of the Burning Grounds area with central burning mound in the foreground, looking south.

Photo #125 View of debris associated with the Playa 4 landfill.

Photo #126 View of the Playa 4 mounds from the northeast.

Photo #127 View of the Playa 4 mounds from the southeast.

Photo #128 View of Playa 4 from the north and Lake Mounds.

Photo #129 View of two concrete structures on the west side of Playa 4, looking south.

Photo #130 View of the former loading area (mound) and borrow area north of the mound, looking south.

Photo #131 View of Playa 5 from the southeast.

Photo #132 View of the railroad grade (spur) adjacent to the southern boundary.

Photo #133 View of the concrete and debris on the west side of the western spur on the southern portion of the site.

Photo #134 Additional view of the debris on the west side of the western spur.

Photo #135 View of the vacant land and monitoring well in the Ogallala north of the northwestern corner of the site.

Photo #136 View of the vacant land and Pantex (distance) north of the northern portion of the site.

Photo #137 View of FM 2373 east of the site, followed by vacant land east of the site.

Photo #138 View of the railroad south of the site, followed by Highway 60.

Photo #139 View of FM 683 west of the southwest corner, followed by crop land.

Photo #140 View of a residence west of the site.

Photo #141 View of rural residence property west of the central-northern portion of the site.

Photo #142 View of FM 683 and agricultural land west of the northwest site corner.

ASTM E2247-23 User Questionnaire

Date Completed	5/13/25		
Person Completing Questionnaire	Name: Jacobo Ortiz Company: FERMI SPE, LCC	Phone: 1-787-246-6555 Email: jacobos@fermiamerica.com	
Site Name	DJT - Advanced Energy and Intelligence Campus		
Site Address	NEC of Highway 60 and FM 683, Carson County, TX		
Point of Contact for Access	Name: Mr. Jason Green Company: Texas Tech	Phone: Provided separately Email: to Terracon	
Access Restrictions or Special Site Requirements?	<input type="checkbox"/> No <input checked="" type="checkbox"/> Yes (If yes, please explain) Access should be coordinated with Texas Tech		
Confidentiality Requirements?	<input type="checkbox"/> No <input checked="" type="checkbox"/> Yes (If yes, please explain) Provided separately to Terracon		
Current Site Owner	Name: Company: Texas Tech	Phone: Provided separately Email: to Terracon	
Current Site Operator	Name: Company: Texas Tech	Phone: Provided separately Email: to Terracon	
Reasons for ESA (e.g., financing, acquisition, lease, etc.)	Lease		
Anticipated Future Site Use	Potential commercial/industrial redevelopment		
Relevant Documents?	Please provide Terracon copies of prior Phase I or II ESAs, Asbestos Surveys, Environmental Permits or Audit documents, Underground Storage Tank documents, Geotechnical Investigations, Site Surveys, Diagrams or Maps, or other relevant reports or documents.		
ASTM User Questionnaire			
To qualify for one of the <i>Landowner Liability Protections (LLPs)</i> offered by the Small Business Liability Relief and Brownfields Revitalization Act of 2001 (the " <i>Brownfields Amendments</i> "), the user must respond to the following inquiries required by 40 C.F.R. §§ 312.25, 312.28, 312.29, 312.30, and 312.31. These inquiries must also be conducted by EPA Brownfield Assessment and Characterization grantees. The user should provide the following information to the <i>environmental professional</i> . Failure to conduct these inquiries could result in a determination that " <i>all appropriate inquiries</i> " is not complete.			
1) Did a search of land title records (or judicial records where appropriate) identify any environmental liens filed or recorded against the site under federal, tribal, state, or local law (40 CFR 312.25)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.)			
2) Did a search of land title records (or judicial records where appropriate) identify any activity and use limitations (AULs), such as engineering controls, land use restrictions, or institutional controls that are in place at the site and/or have been filed or recorded against the site under federal, tribal, state, or local law (40 CFR 312.26)? <input type="checkbox"/> No <input checked="" type="checkbox"/> Yes (If yes, explain below and send Terracon a copy of the title records or judicial records reviewed.)			
3) Do you have any specialized knowledge or experience related to the site or nearby properties? For example, are you involved in the same line of business as the current or former occupants of the site or an adjoining property so that you would have specialized knowledge of the chemicals and processes used by this type of business (40 CFR 312-28)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes (If yes, explain below)			
4) Do you have actual knowledge of a lower purchase price because contamination is known or believed to be present at the site (40 CFR 312.29)? <input checked="" type="checkbox"/> No <input type="checkbox"/> Yes <input type="checkbox"/> Not applicable (If yes or Not applicable, explain below)			
5) Are you aware of commonly known or reasonably ascertainable information about the site that would help the environmental professional to identify conditions indicative of releases or threatened releases (40 CFR 312.30)? For example, (a.) Do you know the past uses of the site? (b.) Do you know of specific chemicals that are present or once were present at the site? (c.) Do you know of spills or other chemical releases that have taken place at the site? (d.) Do you know of any environmental cleanups that have taken place at the site? <input type="checkbox"/> No <input checked="" type="checkbox"/> Yes (If yes, explain below) Yes, as described in environmental reports and title search documents provided to Terracon			
6) Based on your knowledge and experience related to the site, are there any obvious indicators that point to the presence or likely presence of releases at the site (40 CFR 312.31)? <input type="checkbox"/> No <input checked="" type="checkbox"/> Yes (If yes, explain below)			
<u>Comments or explanations:</u> The site's former military use is well known and indicator of potential/actual releases at or near site. The adjacent Pantex site is listed on the National Priorities List (NPL). The title search documents, including groundwater and soil deed restrictions, were provided to Terracon.

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

Property Information:

Generator Status: LQG

Recycler Activity?: YES

Recycler Activity Note: This facility has been identified as a Recycler Facility with indication of Reclamation and Recovery in the RCRA Biennial Report Module for Management Methods
H010 - Metals recovery including retorting, smelting, chemical, etc.
H011 - Mercury recovery (includes mercury retorting, bulb/lamp crushing and mercury vapor recovery, thermostat recovery, mercury from medical equipment recovery, mercury car switch recovery, etc.)
H015 - Deployment/deactivation of airbag waste followed by metals recovery
H020 - Solvents recovery
H039 - Other recovery or reclamation for reuse including acid regeneration, organics recovery, etc.
H050 - Energy recovery at this site; used as fuel (includes on-site fuel blending before energy recovery)
H061 - Fuel blending prior to energy recovery at another site (waste generated on-site or received from off-site)

Violation/Evaluation Summary

Note: VIOLATION or UNDETERMINED: There are VIOLATION or UNDETERMINED details or records associated with this facility (EPA ID) in the Compliance Monitoring and Enforcement table dated Jan, 2025.

Hazardous Waste Handler Details

Seq No: 1
Receive Date: 19800818
Handler Name: US DOE PANTEX PLANT
Fed Waste Generator: 1
Generator Code Description: Large Quantity Generator
Tsd Activity: Y
Source Type: Notification

Waste Code Details

Waste Code: D001
Waste Code Desc: IGNITABLE WASTE

Waste Code: D003
Waste Code Desc: REACTIVE WASTE

Waste Code: F001
Waste Code Desc: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
Waste Code Desc: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR

Map Key	Number of Records	Direction	Distance (mi/ft)	Elev/Diff (ft)	Site	DB
					THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.	
	Waste Code:		F003			
	Waste Code Desc:		THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.			
	Waste Code:		F005			
	Waste Code Desc:		THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.			
	Waste Code:		F006			
	Waste Code Desc:		WASTEWATER TREATMENT SLUDGES FROM ELECTROPLATING OPERATIONS, EXCEPT FROM THE FOLLOWING PROCESSES: (1) SULFURIC ACID ANODIZING OF ALUMINUM; (2) TIN PLATING ON CARBON STEEL; (3) ZINC PLATING (SEGREGATED BASIS) ON CARBON STEEL; (4) ALUMINUM OR ZINC-ALUMINUM PLATING ON CARBON STEEL; (5) CLEANING/STRIPPING ASSOCIATED WITH TIN, ZINC, AND ALUMINUM PLATING ON CARBON STEEL; AND (6) CHEMICAL ETCHING AND MILLING OF ALUMINUM.			
	Waste Code:		K044			
	Waste Code Desc:		WASTEWATER TREATMENT SLUDGES FROM THE MANUFACTURING AND PROCESSING OF EXPLOSIVES.			
	Waste Code:		K045			
	Waste Code Desc:		SPENT CARBON FROM THE TREATMENT OF WASTEWATER CONTAINING EXPLOSIVES.			
	Waste Code:		K047			
	Waste Code Desc:		PINK/RED WATER FROM TNT OPERATIONS.			
	Waste Code:		P015			
	Waste Code Desc:		BERYLLIUM			
	Waste Code:		U002			
	Waste Code Desc:		2-PROPANONE (I) (OR) ACETONE (I)			
	Waste Code:		U158			
	Waste Code Desc:		4,4'-METHYLENEBIS(2-CHLOROANILINE) (OR) BENZENAMINE, 4,4'-METHYLENEBIS[2-CHLORO-			
	Waste Code:		U213			
	Waste Code Desc:		FURAN, TETRAHYDRO-(I) (OR) TETRAHYDROFURAN (I)			
	Waste Code:		U220			
	Waste Code Desc:		BENZENE, METHYL- (OR) TOLUENE			
	Waste Code:		U239			
	Waste Code Desc:		BENZENE, DIMETHYL- (I,T) (OR) XYLENE (I)

Hazardous Waste Handler Details

Seq No: 1
 Receive Date: 19800818
 Handler Name: US DOE PANTEX PLANT
 Fed Waste Generator: 1
 Generator Code Description: Large Quantity Generator
 Source Type: Notification

Waste Code Details

Waste Code: D001
 Waste Code Desc: IGNITABLE WASTE

Waste Code: D003
 Waste Code Desc: REACTIVE WASTE

Waste Code: F001
 Waste Code Desc: THE FOLLOWING SPENT HALOGENATED SOLVENTS USED IN DEGREASING: TETRACHLOROETHYLENE, TRICHLOROETHYLENE, METHYLENE CHLORIDE, 1,1,1-TRICHLOROETHANE, CARBON TETRACHLORIDE AND CHLORINATED FLUOROCARBONS; ALL SPENT SOLVENT MIXTURES/BLENDS USED IN DEGREASING CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F002
 Waste Code Desc: THE FOLLOWING SPENT HALOGENATED SOLVENTS: TETRACHLOROETHYLENE, METHYLENE CHLORIDE, TRICHLOROETHYLENE, 1,1,1-TRICHLOROETHANE, CHLOROBENZENE, 1,1,2-TRICHLORO-1,2,2-TRIFLUOROETHANE, ORTHO-DICHLOROBENZENE, TRICHLOROFLUOROMETHANE, AND 1,1,2, TRICHLOROETHANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE HALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F003
 Waste Code Desc: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: XYLENE, ACETONE, ETHYL ACETATE, ETHYL BENZENE, ETHYL ETHER, METHYL ISOBUTYL KETONE, N-BUTYL ALCOHOL, CYCLOHEXANONE, AND METHANOL; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONLY THE ABOVE SPENT NONHALOGENATED SOLVENTS; AND ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS, AND A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THOSE SOLVENTS LISTED IN F001, F002, F004, AND F005; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F005
 Waste Code Desc: THE FOLLOWING SPENT NONHALOGENATED SOLVENTS: TOLUENE, METHYL ETHYL KETONE, CARBON DISULFIDE, ISOBUTANOL, PYRIDINE, BENZENE, 2-ETHOXYETHANOL, AND 2-NITROPROPANE; ALL SPENT SOLVENT MIXTURES/BLENDS CONTAINING, BEFORE USE, A TOTAL OF TEN PERCENT OR MORE (BY VOLUME) OF ONE OR MORE OF THE ABOVE NONHALOGENATED SOLVENTS OR THOSE SOLVENTS LISTED IN F001, F002, OR F004; AND STILL BOTTOMS FROM THE RECOVERY OF THESE SPENT SOLVENTS AND SPENT SOLVENT MIXTURES.

Waste Code: F006

Violation Allegation:		Failure to prevent the unauthorized disposal of an industrial solid waste. On August 14, 2015 and on October 29, 2015, ten (four in August and six in October) 55-gallon containers of hazardous waste were shipped to a Class 1 non-hazardous waste disposal facility.				
Violation Resolution:		The Executive Director recognizes that on March 29, 2016 the Respondent developed and implemented procedures to prevent the disposal of IHW to an unauthorized facility, and to ensure that all waste generated at the Plant is disposed of at an authorized facility.

Unplottable Report

No unplottable records were found that may be relevant for the search criteria.

Appendix: Database Descriptions

Environmental Risk Information Services (ERIS) can search the following databases. The extent of historical information varies with each database and current information is determined by what is publicly available to ERIS at the time of update. ERIS updates databases as set out in ASTM Standard E1527-13 and E1527-21, Section 8.1.8 Sources of Standard Source Information:

"Government information from nongovernmental sources may be considered current if the source updates the information at least every 90 days, or, for information that is updated less frequently than quarterly by the government agency, within 90 days of the date the government agency makes the information available to the public."

Standard Environmental Record Sources

Federal

National Priority List:

NPL

The U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL) includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program, based primarily on the score a site receives from EPA's Hazard Ranking System. A site must be on the NPL to receive money from the Superfund Trust Fund for remedial action. This data includes NPL sites represented as polygons, where available, that can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. As site investigation and remediation progress, OUs may be added, modified or refined. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Dec 13, 2024

National Priority List - Proposed:

PROPOSED NPL

Sites proposed by the U.S. Environmental Protection Agency (EPA), the state agency, or concerned citizens for addition to the National Priorities List (NPL) due to contamination by hazardous waste and identified by the EPA as a candidate for cleanup because it poses a risk to human health and/or the environment. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Dec 13, 2024

Deleted NPL:

DELETED NPL

Sites deleted from the U.S. Environmental Protection Agency (EPA)'s National Priorities List (NPL). The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425(e), sites may be deleted from the NPL where no further response is appropriate. Sites represented as polygons, where available, can be sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). These site boundaries represent the footprint of a whole site, the sum of all the Operable Units (OUs) and the current understanding of the full extent of contamination; for Federal Facility sites, the total site polygon may be the Facility boundary. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes. Where there is no polygon boundary data available for a given site, the site is represented as a point.

Government Publication Date: Dec 13, 2024

SEMS List 8R Active Site Inventory:[SEMS](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Program has deployed the Superfund Enterprise Management System (SEMS), which integrates multiple legacy systems into a comprehensive tracking and reporting tool. This inventory contains active sites evaluated by the Superfund program that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The Active Site Inventory Report displays site and location information at active SEMS sites. An active site is one at which site assessment, removal, remedial, enforcement, cost recovery, or oversight activities are being planned or conducted. This data includes SEMS sites from the List 8R Active file as well as applicable sites from the EPA's Facility Registry Service map tool.

Government Publication Date: Feb 26, 2025

Inventory of Open Dumps, June 1985:[ODI](#)

The Resource Conservation and Recovery Act (RCRA) provides for publication of an inventory of open dumps. The Act defines "open dumps" as facilities which do not comply with EPA's "Criteria for Classification of Solid Waste Disposal Facilities and Practices" (40 CFR 257).

Government Publication Date: Jun 1985

SEMS List 8R Archive Sites:[SEMS ARCHIVE](#)

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) Archived Site Inventory displays site and location information at sites archived from SEMS. An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. This data includes sites from the List 8R Archived site file.

Government Publication Date: Feb 26, 2025

Comprehensive Environmental Response, Compensation and Liability Information System -[CERCLIS](#)**CERCLIS:**

Superfund is a program administered by the United States Environmental Protection Agency (EPA) to locate, investigate, and clean up the worst hazardous waste sites throughout the United States. CERCLIS is a database of potential and confirmed hazardous waste sites at which the EPA Superfund program has some involvement. It contains sites that are either proposed to be or are on the National Priorities List (NPL) as well as sites that are in the screening and assessment phase for possible inclusion on the NPL. The EPA administers the Superfund program in cooperation with individual states and tribal governments; this database is made available by the EPA.

Government Publication Date: Oct 25, 2013

EPA Report on the Status of Open Dumps on Indian Lands:[IODI](#)

Public Law 103-399, The Indian Lands Open Dump Cleanup Act of 1994, enacted October 22, 1994, identified congressional concerns that solid waste open dump sites located on American Indian or Alaska Native (AI/AN) lands threaten the health and safety of residents of those lands and contiguous areas. The purpose of the Act is to identify the location of open dumps on Indian lands, assess the relative health and environment hazards posed by those sites, and provide financial and technical assistance to Indian tribal governments to close such dumps in compliance with Federal standards and regulations or standards promulgated by Indian Tribal governments or Alaska Native entities.

Government Publication Date: Dec 31, 1998

CERCLIS - No Further Remedial Action Planned:[CERCLIS NFRAP](#)

An archived site is one at which EPA has determined that assessment has been completed and no further remedial action is planned under the Superfund program at this time. The Archive designation means that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list this site on the National Priorities List (NPL). This decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be a potential NPL site.

Government Publication Date: Oct 25, 2013

CERCLIS Liens:[CERCLIS LIENS](#)

A Federal Superfund lien exists at any property where EPA has incurred Superfund costs to address contamination ("Superfund site") and has provided notice of liability to the property owner. A Federal CERCLA ("Superfund") lien can exist by operation of law at any site or property at which EPA has spent Superfund monies. This database is made available by the United States Environmental Protection Agency (EPA). This database was provided by the United States Environmental Protection Agency (EPA). Refer to SEMS LIEN as the current data source for Superfund Liens.

Government Publication Date: Jan 30, 2014

RCRA CORRACTS-Corrective Action:[RCRA CORRACTS](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. At these sites, the Corrective Action Program ensures that cleanups occur. EPA and state regulators work with facilities and communities to design remedies based on the contamination, geology, and anticipated use unique to each site.

Government Publication Date: Jan 6, 2025

RCRA non-CORRACTS TSD Facilities:[RCRA TSD](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. This database includes Non-Corrective Action sites that have indicated engagement in the treatment, storage, or disposal of hazardous waste which requires a RCRA hazardous waste permit.

Government Publication Date: Jan 6, 2025

RCRA Generator List:[RCRA LQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Large Quantity Generators (LQGs) generate 1,000 kilograms per month or more of hazardous waste or more than one kilogram per month of acutely hazardous waste.

Government Publication Date: Jan 6, 2025

RCRA Small Quantity Generators List:[RCRA SQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Small Quantity Generators (SQGs) generate more than 100 kilograms, but less than 1,000 kilograms, of hazardous waste per month.

Government Publication Date: Jan 6, 2025

RCRA Very Small Quantity Generators List:[RCRA VSQG](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Very Small Quantity Generators (VSQG) generate 100 kilograms or less per month of hazardous waste, or one kilogram or less per month of acutely hazardous waste. Additionally, VSQG may not accumulate more than 1,000 kilograms of hazardous waste at any time.

Government Publication Date: Jan 6, 2025

RCRA Non-Generators:[RCRA NON GEN](#)

RCRA Info is the U.S. Environmental Protection Agency's (EPA) comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. RCRA Info replaces the data recording and reporting abilities of the Resource Conservation and Recovery Information System (RCRIS) and the Biennial Reporting System (BRS). A hazardous waste generator is any person or site whose processes and actions create hazardous waste (see 40 CFR 260.10). Non-Generators do not presently generate hazardous waste.

Government Publication Date: Jan 6, 2025

RCRA Sites with Controls:[RCRA CONTROLS](#)

List of Resource Conservation and Recovery Act (RCRA) facilities with institutional controls in place. RCRA gives the U.S. Environmental Protection Agency (EPA) the authority to control hazardous waste from the "cradle-to-grave." This includes the generation, transportation, treatment, storage, and disposal of hazardous waste. RCRA also set forth a framework for the management of non-hazardous solid wastes. The 1986 amendments to RCRA enabled EPA to address environmental problems that could result from underground tanks storing petroleum and other hazardous substances.

Government Publication Date: Jan 6, 2025

Federal Engineering Controls-ECs:[FED ENG](#)

List of Engineering controls (ECs) made available by the United States Environmental Protection Agency (EPA). ECs encompass a variety of engineered and constructed physical barriers (e.g., soil capping, sub-surface venting systems, mitigation barriers, fences) to contain and/or prevent exposure to contamination on a property. The EC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Mar 27, 2025

Federal Institutional Controls- ICs:

FED INST

List of Institutional controls (ICs) made available by the United States Environmental Protection Agency (EPA). ICs are non-engineered instruments, such as administrative and legal controls, that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Although it is EPA's expectation that treatment or engineering controls will be used to address principal threat wastes and that groundwater will be returned to its beneficial use whenever practicable, ICs play an important role in site remedies because they reduce exposure to contamination by limiting land or resource use and guide human behavior at a site. The IC listing includes remedy component data from Superfund decision documents for applicable sites on the final or deleted on the National Priorities List (NPL); and sites with a Superfund Alternative Approach (SAA) Agreement in place. The only sites included that are not on the NPL; proposed for NPL; or removed from proposed NPL, are those with an SAA Agreement in place.

Government Publication Date: Mar 27, 2025

Land Use Control Information System:

LUCIS

The LUCIS database is maintained by the U.S. Department of the Navy and contains information for former Base Realignment and Closure (BRAC) properties across the United States.

Government Publication Date: Sep 1, 2006

Institutional Control Boundaries at NPL sites:

NPL IC

These boundaries of Institutional Control areas at sites on the U.S. Environmental Protection Agency's (EPA) National Priorities List (NPL), or as Proposed or Deleted, are sourced from the EPA NPL Superfund Site Boundaries dataset, refreshed by the Shared Enterprise Geodata and Services (SEGS). The EPA's NPL includes the most serious uncontrolled or abandoned hazardous waste sites identified for possible long-term remedial action under the Superfund program. Institutional controls are non-engineered instruments such as administrative and legal controls that help minimize the potential for human exposure to contamination and/or protect the integrity of the remedy. Data provided by external parties is not independently verified by EPA. This boundary data is made available to the public strictly for informational purposes.

Government Publication Date: Nov 20, 2024

Emergency Response Notification System:

ERNS 1982 TO 1986

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1982-1986

Emergency Response Notification System:

ERNS 1987 TO 1989

Database of oil and hazardous substances spill reports controlled by the National Response Center. The primary function of the National Response Center is to serve as the sole national point of contact for reporting oil, chemical, radiological, biological, and etiological discharges into the environment anywhere in the United States and its territories.

Government Publication Date: 1987-1989

Emergency Response Notification System:

ERNS

Database of oil and hazardous substances spill reports made available by the United States Coast Guard National Response Center (NRC). The NRC fields initial reports for pollution and railroad incidents and forwards that information to appropriate federal/state agencies for response. These data contain initial incident data that has not been validated or investigated by a federal/state response agency.

Government Publication Date: Dec 31, 2024

The Assessment, Cleanup and Redevelopment Exchange System (ACRES) Brownfield Database:

FED BROWNFIELDS

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties protects the environment, reduces blight, and takes development pressures off greenspaces and working lands. This data is provided by the United States Environmental Protection Agency (EPA) and includes Brownfield sites from the Cleanups in My Community (CIMC) web application.

Government Publication Date: Feb 19, 2025

FEMA Underground Storage Tank Listing:

FEMA UST

The Federal Emergency Management Agency (FEMA) of the Department of Homeland Security maintains a list of FEMA owned underground storage tanks.

Government Publication Date: Dec 31, 2017

Facility Response Plan:

FRP

This listing contains facilities that have submitted Facility Response Plans (FRPs) to the U.S. Environmental Protection Agency (EPA). Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit FRPs. Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments. This listing includes FRP facilities from an applicable EPA FOIA file and Homeland Infrastructure Foundation-Level Data (HIFLD) data file.

Government Publication Date: Jan 9, 2024

Delisted Facility Response Plans:

DELISTED FRP

Facilities that once appeared in - and have since been removed from - the list of facilities that have submitted Facility Response Plans (FRP) to EPA. Facilities that could reasonably be expected to cause "substantial harm" to the environment by discharging oil into or on navigable waters are required to prepare and submit Facility Response Plans (FRPs). Harm is determined based on total oil storage capacity, secondary containment and age of tanks, oil transfer activities, history of discharges, proximity to a public drinking water intake or sensitive environments.

Government Publication Date: Jan 9, 2024

Historical Gas Stations:

HIST GAS STATIONS

This historic directory of service stations is provided by the Cities Service Company. The directory includes Cities Service filling stations that were located throughout the United States in 1930.

Government Publication Date: Jul 1, 1930

Petroleum Refineries:

REFN

This list of petroleum refineries is sourced from the U.S. Energy Information Administration (EIA), Refinery Capacity Report. The listing includes operating and idle petroleum refineries (including new refineries under construction) and refineries shut down during the previous year. The geographic area the report covers is the 50 States, the District of Columbia, Puerto Rico, the U.S. Virgin Islands, Guam, and other U.S. possessions. Per the EIA, the facility location data represents the approximate location based on research of publicly available information from sources such as Federal agencies, company websites, and satellite images on public websites.

Government Publication Date: Oct 31, 2024

Petroleum Product and Crude Oil Rail Terminals:

BULK TERMINAL

A list of petroleum product and crude oil rail terminals from the U.S. Energy Information Administration (EIA), as well as petroleum terminals sourced from Oak Ridge National Laboratory hosted by the Homeland Infrastructure Foundation-Level Database. Data includes operable bulk petroleum product terminals with a total bulk shell storage capacity of 50,000 barrels or more, and/or the ability to receive volumes from tanker, barge, or pipeline; also rail terminals handling the loading and unloading of crude oil with activity between 2017 and 2018. EIA petroleum product terminal data comes from the EIA-815 Bulk Terminal and Blender Report, which includes working, shell in operation, and shell idle for several major product groupings.

Government Publication Date: Oct 31, 2024

LIEN on Property:

SEMS LIEN

The U.S. Environmental Protection Agency's (EPA) Superfund Enterprise Management System (SEMS) provides Lien details on applicable properties, such as the Superfund lien on property activity, the lien property information, and the parties associated with the lien.

Government Publication Date: Jan 29, 2025

Superfund Decision Documents:

SUPERFUND ROD

This database contains a list of decision documents for Superfund sites. Decision documents serve to provide the reasoning for the choice of (or) changes to a Superfund Site cleanup plan. The decision documents include completed Records of Decision (ROD), ROD Amendments, Explanations of Significant Differences (ESD) for active and archived sites stored in the Superfund Enterprise Management System (SEMS), along with other associated memos and files. This information is maintained and made available by the U.S. Environmental Protection Agency.

Government Publication Date: Feb 26, 2025

State**Superfund Sites Boundaries:**

SUPERFUND

List of sites that may constitute an imminent and substantial endangerment to public health and safety or the environment due to a release or threatened release of hazardous substances into the environment provided by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Aug 10, 2021

State Superfund Registry:

SHWS

List of sites identified or evaluated by the Texas Commission on Environmental Quality (TCEQ) which may constitute an imminent and substantial endangerment to public health and safety or to the environment due to a release or threatened release of hazardous substances into the environment. The TCEQ updates the state Superfund sites list in accordance with the Texas Health and Safety Code (THSC). This database serves a purpose similar to that of the federal NPL, functioning as a state-level counterpart for prioritizing cleanup efforts at hazardous substance release sites.

Government Publication Date: Jan 14, 2025

Superfund Site Discovery and Assessment Program:

SDA

List of active and inactive Superfund Site Discovery and Assessment Program sites queried from the Texas Commission on Environmental Quality (TCEQ) Central Registry and IDA databases by the Remediation Division.

Government Publication Date: Mar 6, 2025

Delisted State Superfund Registry List:

DELISTED SHWS

List of sites that once appeared on - and have since been removed from - the State Superfund Registry made available by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Mar 7, 2025

Permitted Solid Waste Facilities:

SWF/LF

List of active, inactive, and post-closure Municipal Solid Waste landfills and processing facilities with issued permits and authorizations, as well as pending, withdrawn, or denied applications registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 330.

Government Publication Date: Feb 14, 2025

Closed Landfill Inventory:

CLI

Inventory of permitted and unauthorized closed or abandoned municipal solid waste landfills throughout Texas compiled by the Texas Commission on Environmental Quality (TCEQ), in collaboration with regional Councils of Government (COG).

Government Publication Date: Late 1990's

Houston-Galveston Closed Landfill Inventory:

HGAC CLI

List of closed or abandoned landfill sites which fall under the Houston-Galveston Area Council of Government (H-GAC). This Closed or Abandoned Municipal Solid Waste Landfill Inventory was prepared from information furnished by the Texas Commission on Environmental Quality (TCEQ), permitting records on file with TCEQ and the Texas Department of Health, and from aerial photography and GIS data developed by H-GAC. The inventory research occurred during the years 2000-2002.

Government Publication Date: Mar 14, 2025

AACOG Closed Landfill Inventory:

AACOG CLI

A list of permitted and unpermitted closed landfill sites made available by the Alamo Area Council of Governments (AACOG). Alamo Area Council of Governments (AACOG) is requested to maintain an inventory of closed municipal solid waste landfills for their regional solid waste management plans.

Government Publication Date: Feb 6, 2020

Commercial Management Facilities for Hazardous Waste and Industrial Solid Wastes:

IHW

This publication lists facilities that have permits or authorizations from the Texas Commission on Environmental Quality (TCEQ) to receive, on a commercial basis, and manage hazardous waste, industrial nonhazardous waste, or both.

Government Publication Date: Jan 1, 2025

Industrial and Hazardous Waste - Receivers:

IHW RECEIVER

List of active, inactive, and post-closure Industrial and Hazardous Waste Receiver Facilities permitted by or registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 335.

Government Publication Date: Dec 3, 2024

Radioactive Waste Sites:

RWS

This Texas Commission on Environmental Quality (TCEQ) database contains all sites in the State of Texas designated as Radioactive Waste sites as of 2006. The TCEQ no longer maintains this site listing.

Government Publication Date: Jul 11, 2006

Leaking Petroleum Storage Tank Database:

LPST

List of cleanup sites where contamination was caused by spills, leaks, or other releases of petroleum or hazardous substances from underground and/or aboveground storage tanks regulated by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Mar 3, 2025

Delisted Leaking Storage Tanks:

DELISTED LST

List of cleanup sites that once appeared on - and have since been removed from - the list of Leaking Petroleum Storage Tank Cleanups made available by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Mar 3, 2025

Underground Petroleum Storage Tanks:

UST

List of facilities that have one or more Underground Storage Tank (UST)s registered and regulated by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Jan 23, 2025

Aboveground Storage Tanks:

AST

List of facilities that have one or more Aboveground Storage Tank (AST)s registered and regulated by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Jan 23, 2025

Petroleum Storage Tanks Database:

PST

List of facilities included on the list of tank facilities made available by the Texas Commission on Environmental Quality (TCEQ) that have no association as either underground or aboveground tanks.

Government Publication Date: Jan 23, 2025

Historical Tank Construction Notification:

HIST TANK

A list of facilities with historic petroleum storage tank construction notification activity made available by the Texas Commission on Environmental Quality (TCEQ). Any person who intends either to install a new or replacement underground storage tank (UST), to remove a UST from the ground, to conduct a permanent abandonment in-place of a UST, or make any repairs or improvements of a UST must submit a Construction Notification Form.

Government Publication Date: Jan 23, 2025

Austin Underground Storage Tanks:

UST AUSTIN

This inventory of current and historical underground gas storage tanks is provided by the City of Austin's Open Data Portal.

Government Publication Date: Mar 20, 2025

Salt Caverns for Petroleum Storage:

PETROL CAVERN

Listing of salt caverns for petroleum storage, made available by the Railroad Commission of Texas. Salt caverns, constructed in naturally occurring salt domes or salt beds, are used as storage for hydrocarbons including crude oil and natural gases.

Government Publication Date: Sep 1, 2006

Delisted Storage Tanks:

DTNK

List of tank facilities that once appeared on - and have since been removed from - the Petroleum Storage Tanks Database made available by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Mar 20, 2025

Sites with Controls:

AUL

Sites under several Texas Commission on Environmental Quality (TCEQ) remediation programs which have institutional or engineering controls.

Government Publication Date: Jan 14, 2025

Voluntary Cleanup Program:

VCP

List of sites which have participated or are currently participating in the Voluntary Cleanup Program (VCP) administered by the Texas Commission on Environmental Quality (TCEQ). The VCP provides administrative, technical, and legal incentives to encourage the cleanup of contaminated sites in Texas.

Government Publication Date: Jan 27, 2025

Texas Railroad Commission Voluntary Cleanup Program:

VCP RRC

List of facilities which have participated in or are currently participating in the Voluntary Cleanup Program (VCP) operated by the Railroad Commission of Texas (RRC). The RRC VCP provides an incentive to remediate Oil & Gas related pollution.

Government Publication Date: Feb 14, 2025

Operator Cleanup Program:[OP CLEANUP](#)

A list of sites in the Texas Railroad Commission (RRC)'s Operator Cleanup Program (OCP). The OCP, under the Site Remediation Section, is tasked with oversight of complex pollution cleanups performed by the oil and gas industry. Complex sites include those that occur in sensitive environmental areas as defined by 16 TAC3.91 (SWR 91) and may require site specific cleanup levels based on risk. When cleanup activities are successfully completed by the operator, Commission staff may issue a "No Further Action" letter acknowledging completion.

Government Publication Date: Mar 7, 2025

Innocent Owner/Operator Program:[IOP](#)

A list of sites in the Innocent Owner/Operator Program (IOP) made available by Texas Commission of Environmental Quality (TCEQ). IOP provides certificates to innocent owners or operators whom their properties are contaminated as a result of a release or migration of contaminants from a source or sources not located on the property, and they did not cause or contribute to the source or sources of contamination.

Government Publication Date: Feb 10, 2025

Brownfields Site Assessments Database:[BROWNFIELDS](#)

The Texas Commission on Environmental Quality (TCEQ) Brownfields Site Assessment Program (BSA) layer is used to identify the geographic location of all "Active and Inactive BSA" sites within the State of Texas.

Government Publication Date: Mar 3, 2025

Texas Railroad Commission Brownfields:[BROWN RRC](#)

List of sites which have participated or are currently participating in the Railroad Commission of Texas (RRC) Brownfields Response Program (BRP). The RRC BRP provides technical and financial support for redevelopment of abandoned oil and gas sites.

Government Publication Date: Feb 14, 2025

Municipal Setting Designation:[MSD](#)

Municipal Setting Designations (MSD) list is maintained by Texas Commission on Environmental Quality (TCEQ). An MSD is an official state designation given to property within a municipality or its extraterritorial jurisdiction that certifies that designated groundwater at the property is not used as potable water, and is prohibited from future use as potable water because that groundwater is contaminated in excess of the applicable potable-water protective concentration level.

Government Publication Date: Feb 25, 2025

Tribal**Leaking Underground Storage Tanks (LUSTs) on Tribal/Indian Lands:**[INDIAN LUST](#)

This list of leaking underground storage tanks (LUSTs) on Tribal/Indian Lands in Region 6, which includes Texas, is made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Oct 6, 2017

Underground Storage Tanks on Tribal/Indian Lands:[INDIAN UST](#)

This list of underground storage tanks (USTs) on Tribal/Indian Lands in Region 6, which includes Texas, is provided by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 18, 2024

Delisted Tribal Leaking Storage Tanks:[DELISTED INDIAN LST](#)

Leaking Underground Storage Tank (LUST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian LUST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 18, 2024

Delisted Tribal Underground Storage Tanks:[DELISTED INDIAN UST](#)

Underground Storage Tank (UST) facilities which once appeared on - and have since been removed from - the Regional Tribal/Indian UST lists made available by the United States Environmental Protection Agency (EPA).

Government Publication Date: Nov 18, 2024

County

No County standard environmental record sources available for this State.

Additional Environmental Record Sources

Federal

PFAS Greenhouse Gas Emissions Data:

PFAS GHG

The U.S. Environmental Protection Agency's Greenhouse Gas Reporting Program (GHGRP) collects Greenhouse Gas (GHG) data from large emitting facilities (25,000 metric tons of carbon dioxide equivalent (CO₂e) per year), and suppliers of fossil fuels and industrial gases that results in GHG emissions when used. Includes GHG emissions data for facilities that emit or have emitted since 2010 chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures by DSSTox. PFAS emissions data has been identified for facilities engaged in the following industrial processes: Aluminum Production (GHGRP Subpart F), HCFC-22 Production and HFC-23 Destruction (Subpart O), Electronics Manufacturing (Subpart I), Fluorinated Gas Production (Subpart L), Magnesium Production (Subpart T), Electrical Transmission and Distribution Equipment Use (Subpart DD), and Manufacture of Electric Transmission and Distribution Equipment (Subpart SS). Over time, other industrial processes with required GHGRP reporting may include PFAS emissions data and the list of reportable gases may change over time.

Government Publication Date: Aug 5, 2024

On-Scene Coordinator Response Sites:

OSC RESPONSE

This list of On-Scene Coordinator (OSC) Response Sites is provided by the U.S. Environmental Protection Agency (EPA). OSCs are the federal officials responsible for monitoring or directing responses to all oil spills and hazardous substance releases reported to the federal government. OSCs coordinate all federal efforts with, and provide support and information to local, state, and regional response communities. An OSC is an agent of either EPA or the U.S. Coast Guard (USCG), depending on where the incident occurs. EPA's OSCs have primary responsibility for spills and releases to inland areas and waters. USCG OSCs have responsibility for coastal waters and the Great Lakes. In general, an OSC has the following key responsibilities during and after a response: Assessment, Monitoring, Response Assistance, and Evaluation.

Government Publication Date: Apr 4, 2024

Facility Registry Service/Facility Index:

FINDS/FRS

The Facility Registry Service (FRS) is a centrally managed database that identifies facilities, sites, or places subject to environmental regulations or of environmental interest. FRS creates high-quality, accurate, and authoritative facility identification records through rigorous verification and management procedures that incorporate information from program national systems, state master facility records, and data collected from EPA's Central Data Exchange registrations and data management personnel. This list is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Apr 23, 2025

Toxics Release Inventory (TRI) Program:

TRIS

The U.S. Environmental Protection Agency's Toxics Release Inventory (TRI) is a database containing data on disposal or other releases of toxic chemicals from U.S. facilities and information about how facilities manage those chemicals through recycling, energy recovery, and treatment. There are currently 770 individually listed chemicals and 33 chemical categories covered by the TRI Program. Facilities that manufacture, process or otherwise use these chemicals in amounts above established levels must submit annual reporting forms for each chemical. Note that the TRI chemical list does not include all toxic chemicals used in the U.S. One of TRI's primary purposes is to inform communities about toxic chemical releases to the environment. This database includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFOA/PFOS Contaminated Sites:

PFAS NPL

This list of Superfund Sites with Per- and Polyfluoroalkyl Substances (PFAS) detections is made available by the U.S. Environmental Protection Agency (EPA) in their PFAS Analytic Tools data, previously the list was obtained by EPA FOIA requests. EPA's Office of Land and Emergency Management and EPA Regional Offices maintain what is known about site investigations, contamination, and remedial actions under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA) where PFAS is present in the environment. Limitations: Detections of PFAS at National Priorities List (NPL) sites do not mean that people are at risk from PFAS, are exposed to PFAS, or that the site is the source of the PFAS. The information in the Superfund NPL and Superfund Alternative Agreement (SAA) PFAS detection site list is years old and may not be accurate today. Site information such as site name, site ID, and location has been confirmed for accuracy; however, PFAS-related information such as media sampled, drinking water being above the health advisory, or mitigation efforts has not been verified. For Federal Facilities data, the other Federal agencies (OFA) are the lead agency for their data and provided them to EPA.

Government Publication Date: Mar 31, 2025

Federal Agency Locations with Known or Suspected PFAS Detections:

PFAS FED SITES

This list of federal agency locations with known or suspected detections of Per- and Polyfluoroalkyl Substances (PFAS) is made available by the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools data. The EPA outlines that these data are gathered from several federal entities, such as the federal Superfund program, Department of Defense (DOD), National Aeronautics and Space Administration (NASA), Department of Transportation (DOT), and Department of Energy (DOE). The dates this data was extracted for the PFAS Analytic Tools range from 2022 to 2024. Sites on this list do not necessarily reflect the source/s of PFAS contamination and detections do not indicate level of risk or human exposure at the site. Agricultural notifications in this data are limited to DOD sites only. At this time, the EPA is aware that this list is not comprehensive of all Federal agencies.

SSEHRI PFAS Contamination Sites:

PFAS SSEHRI

This PFAS Contamination Site Tracker database is compiled by the PFAS Project Lab, part of the Social Science Environmental Health Research Institute (SSEHRI) at Northeastern University. According to the SSEHRI, the database records qualitative and quantitative data from each known site of PFAS contamination, including timeline of discovery, sources, levels, health impacts, community response, and government response. The goal of this database is to compile information and support public understanding of the rapidly unfolding issue of PFAS contamination. All data presented was extracted from government websites, news articles, or publicly available documents. Locations for the Known PFAS Contamination Sites are sourced from the PFAS Sites and Community Resources Map by the PFAS-REACH team, credited to PFAS Project Lab, Silent Spring Institute, and PFAS Exchange. Disclaimer: The source conveys the data undergoes regular updates as new information becomes available, some sites may be missing and/or contain information that is incorrect or outdated, as well as their information represents all contamination sites SSEHRI is aware of, not all possible contamination sites. This data is not intended to be used for legal purposes. Access the following source link for the most current information: <https://pfasproject.com/pfas-sites-and-community-resources/>

Government Publication Date: Jun 27, 2024

National Response Center PFAS Spills:

PFAS ERNS

This Per- and Poly-Fluoroalkyl Substances (PFAS) Spills dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The National Response Center (NRC), operated by the U.S. Coast Guard, is the designated federal point of contact for reporting all oil, chemical, and other discharges into the environment, for the United States and its territories. This dataset contains NRC spill information from 1990 to the present that is restricted to records associated with PFAS and PFAS-containing materials. Incidents are filtered to include only records with a "Material Involved" or "Incident Description" related to Aqueous Film Forming Foam (AFFF). The keywords used to filter the data included "AFFF," "Fire Fighting Foam," "Aqueous Film Forming Foam," "Fire Suppressant Foam," "PFAS," "PERFL," "PFOA," "PFOS," and "Genx." Limitations: The data from the NRC website contains initial incident data that has not been validated or investigated by a federal/state response agency. Keyword searches may misidentify some incident reports that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS spills/release incidents.

Government Publication Date: Mar 24, 2025

PFAS NPDES Discharge Monitoring:

PFAS NPDES

This list of National Pollutant Discharge Elimination System (NPDES) permitted facilities with required monitoring for Per- and Polyfluoroalkyl (PFAS) Substances is made available via the U.S. Environmental Protection Agency (EPA)'s PFAS Analytic Tools. Any point-source wastewater discharger to waters of the United States must have a NPDES permit, which defines a set of parameters for pollutants and monitoring to ensure that the discharge does not degrade water quality or impair human health. This list includes NPDES permitted facilities associated with permits that monitor for Per- and Polyfluoroalkyl Substances (PFAS), limited to the years 2007 - present. EPA further advises the following regarding these data: currently, fewer than half of states have required PFAS monitoring for at least one of their permittees, and fewer states have established PFAS effluent limits for permittees. For states that may have required monitoring, some reporting and data transfer issues may exist on a state-by-state basis.

Government Publication Date: Dec 16, 2024

Perfluorinated Alkyl Substances (PFAS) from Toxic Release Inventory:

PFAS TRI

List of Toxics Release Inventory (TRI) facilities at which the reported chemical is a per- or polyfluoroalkyl (PFAS) substance included in the U.S. Environmental Protection Agency's (EPA) consolidated PFAS Master List of PFAS Substances. Encompasses Toxics Release Inventory records included in the EPA PFAS Analytic Tools. The EPA's TRI database currently tracks information on disposal or releases of 770 individually listed toxic chemicals and 33 chemical categories from thousands of U.S. facilities and details about how facilities manage those chemicals through recycling, energy recovery, and treatment. This listing includes TRI Reporting Data for calendar years 1987 through 2021 and Preliminary Data for 2022.

Government Publication Date: Sep 20, 2023

PFAS Water Quality Portal Sampling Data:

PFAS WATER

This Per- and Poly-Fluoroalkyl Substances (PFAS) Environmental Media Sampling Data is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The Water Quality Portal (WQP), as a cooperative service sponsored by the United States Geological Survey, the EPA, and the National Water Quality Monitoring Council, is part of a modernized repository storing ambient sampling data for all environmental media and tissue samples. A wide range of federal, state, tribal and local governments, academic and non-governmental organizations, and individuals submit project details and sampling results to this public repository. Limitations: EPA did not carry out the sampling or testing of a majority of the data in the WQP PFAS dataset. EPA can only speak to the accuracy and completeness of the data from projects like the National Aquatic Resource Surveys for which EPA is the data owner/organization. Data may exist within the file on Quality Assurance Project Plans (QAPPs) and the approving agency of the QAPP, if a QAPP is entered.

Government Publication Date: Jan 13, 2025

PFAS TSCA Manufacture and Import Facilities:

PFAS TSCA

The U.S. Environmental Protection Agency (EPA) issued the Chemical Data Reporting (CDR) Rule under the Toxic Substances Control Act (TSCA) and requires chemical manufacturers and facilities that manufacture or import chemical substances to report data to EPA. This list is specific only to TSCA Manufacture and Import Facilities with reported per- and poly-fluoroalkyl (PFAS) substances. Data file is sourced from EPA's PFAS Analytic Tools TSCA dataset which includes CDR/Inventory Update Reporting data from 1998 up to 2020. Disclaimer: This data file includes production and importation data for chemicals identified in EPA's CompTox Chemicals Dashboard list of PFAS without explicit structures and list of PFAS structures in DSSTox. Note that some regulations have specific chemical structure requirements that define PFAS differently than the lists in EPA's CompTox Chemicals Dashboard. Reporting information on manufactured or imported chemical substance amounts should not be compared between facilities, as some companies claim Chemical Data Reporting Rule data fields for PFAS information as Confidential Business Information.

Government Publication Date: Jan 5, 2023

PFAS Waste Transfers from RCRA e-Manifest :

[PFAS E-MANIFEST](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Waste Transfers dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. Every shipment of hazardous waste in the U.S. must be accompanied by a shipment manifest, which is a critical component of the cradle-to-grave tracking of wastes mandated by the Resource Conservation and Recovery Act (RCRA). According to the EPA, currently no Federal Waste Code exists for any PFAS compounds. To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: • PFAS • PFOA • PFOS • PERFL • AFFF • GENX • GEN-X (plus the Vermont state-specific waste codes). Limitations: Amount or concentration of PFAS being transferred cannot be determined from the manifest information. Keyword searches may misidentify some manifest records that do not contain PFAS. This dataset should also not be considered to be exhaustive of all PFAS waste transfers.

Government Publication Date: Mar 23, 2025

PFAS Industry Sectors:

[PFAS IND](#)

This Per- and Poly-Fluoroalkyl Substances (PFAS) Industry Sectors dataset is made available via the U.S. Environmental Protection Agency's (EPA) PFAS Analytic Tools. The EPA developed the dataset from various sources that show which industries may be handling PFAS including: EPA's Enforcement and Compliance History Online (ECHO) records restricted to potential PFAS-handling industry sectors; ECHO records for Fire Training Sites identified where fire-fighting foam may have been used in training exercises; and 14 CFR Part 139 Airports compiled from historic and current records from the FAA Airport Data and Information Portal. Since July 2006, all certificated Part 139 Airports are required to have fire-fighting foam onsite that meet certain military specifications, which to date have been fluorinated (Aqueous Film Forming Foam). Limitations: Inclusion in this dataset does not indicate that PFAS are being manufactured, processed, used, or released by the facility. Listed facilities potentially handle PFAS based on their industrial profile, but are unconfirmed by the EPA. Keyword searches in ECHO for Fire Training sites may misidentify some facilities and should not be considered to be an exhaustive list of fire training facilities in the U.S.

Government Publication Date: Mar 24, 2025

Hazardous Materials Information Reporting System:

[HMIRS](#)

The Hazardous Materials Incident Reporting System (HMIRS) database contains unintentional hazardous materials release information reported to the U.S. Department of Transportation, Pipeline and Hazardous Materials Safety Administration.

Government Publication Date: May 29, 2024

National Clandestine Drug Labs:

[NCDL](#)

The U.S. Department of Justice ("the Department"), Drug Enforcement Administration (DEA), provides this data as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy.

Government Publication Date: Nov 30, 2023

Toxic Substances Control Act:

[TSCA](#)

The U.S. Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule. The CDR enables EPA to collect and publish information on the manufacturing, processing, and use of commercial chemical substances and mixtures (referred to hereafter as chemical substances) on the TSCA Chemical Substance Inventory (TSCA Inventory). This includes current information on chemical substance production volumes, manufacturing sites, and how the chemical substances are used. This information helps the Agency determine whether people or the environment are potentially exposed to reported chemical substances. EPA publishes submitted CDR data that is not Confidential Business Information (CBI). EPA CDR collections occur approximately every four years and reporting requirements change per collection.

Government Publication Date: May 12, 2022

Hist TSCA:

[HIST TSCA](#)

The Environmental Protection Agency (EPA) is amending the Toxic Substances Control Act (TSCA) section 8(a) Inventory Update Reporting (IUR) rule and changing its name to the Chemical Data Reporting (CDR) rule.

The 2006 IUR data summary report includes information about chemicals manufactured or imported in quantities of 25,000 pounds or more at a single site during calendar year 2005. In addition to the basic manufacturing information collected in previous reporting cycles, the 2006 cycle is the first time EPA collected information to characterize exposure during manufacturing, processing and use of organic chemicals. The 2006 cycle also is the first time manufacturers of inorganic chemicals were required to report basic manufacturing information.

Government Publication Date: Dec 31, 2006

FTTS Administrative Case Listing:

[FTTS ADMIN](#)

An administrative case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

FTTS Inspection Case Listing:

[FTTS INSP](#)

An inspection case listing from the Federal Insecticide, Fungicide, & Rodenticide Act (FIFRA) and Toxic Substances Control Act (TSCA), together known as FTTS. This database was obtained from the Environmental Protection Agency's (EPA) National Compliance Database (NCDB). The FTTS and NCDB was shut down in 2006.

Government Publication Date: Jan 19, 2007

Potentially Responsible Parties List:

[PRP](#)

Early in the site cleanup process, the U.S. Environmental Protection Agency (EPA) conducts a search to find the Potentially Responsible Parties (PRPs). The EPA looks for evidence to determine liability by matching wastes found at the site with parties that may have contributed wastes to the site. This listing contains PRPs, Noticed Parties, at sites in the EPA's Superfund Enterprise Management System (SEMS).

Government Publication Date: Nov 20, 2024

State Coalition for Remediation of Drycleaners Listing:

[SCRD DRYCLEANER](#)

The State Coalition for Remediation of Drycleaners (SCRD) was established in 1998, with support from the U.S. Environmental Protection Agency (EPA) Office of Superfund Remediation and Technology Innovation. Coalition members are states with mandated programs and funding for drycleaner site remediation. Current members are Alabama, Connecticut, Florida, Illinois, Kansas, Minnesota, Missouri, North Carolina, Oregon, South Carolina, Tennessee, Texas, and Wisconsin. Since 2017, the SCRd no longer maintains this data, refer to applicable state source data where available.

Government Publication Date: Nov 08, 2017

Integrated Compliance Information System (ICIS):

[ICIS](#)

The Integrated Compliance Information System (ICIS) database contains integrated enforcement and compliance information across most of U.S. Environmental Protection Agency's (EPA) programs. The vision for ICIS is to replace EPA's independent databases that contain enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions and a subset of the Permit Compliance System (PCS), which supports the National Pollutant Discharge Elimination System (NPDES). This information is maintained by the EPA Headquarters and at the Regional offices. A future release of ICIS will completely replace PCS and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities that support compliance and enforcement programs, including incident tracking, compliance assistance, and compliance monitoring.

Government Publication Date: Apr 13, 2024

Drycleaner Facilities:

[FED DRYCLEANERS](#)

A list of drycleaner facilities from Enforcement and Compliance History Online (ECHO) data as made available by the U.S. Environmental Protection Agency (EPA), sourced from the ECHO Exporter file. This EPA source file tracks facilities that possess NAICS and SIC codes that classify businesses as drycleaner establishments.

Government Publication Date: Jan 6, 2025

Delisted Drycleaner Facilities:

[DELISTED FED DRY](#)

List of sites removed from the list of Drycleaner Facilities (sites in the EPA's Integrated Compliance Information System (ICIS) with NAIC or SIC codes identifying the business as a drycleaner establishment).

Government Publication Date: Jan 6, 2025

Formerly Used Defense Sites:

[FUDS](#)

Formerly Used Defense Sites (FUDS) are properties that were formerly owned by, leased to, or otherwise possessed by and under the jurisdiction of the Secretary of Defense prior to October 1986, where the Department of Defense (DOD) is responsible for an environmental restoration. The FUDS Annual Report to Congress (ARC) is published by the U.S. Army Corps of Engineers (USACE). This data is compiled from the USACE's Geospatial FUDS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) FUDS dataset which applies to the Fiscal Year 2021 FUDS Inventory.

FUDS Munitions Response Sites:

[FUDS MRS](#)

Boundaries of Munitions Response Sites (MRS), published with the Formerly Used Defense Sites (FUDS) Annual Report to Congress (ARC) by the U.S. Army Corps of Engineers (USACE). An MRS is a discrete location within a Munitions response area (MRA) that is known to require a munitions response. An MRA means any area on a defense site that is known or suspected to contain unexploded ordnance (UXO), discarded military munitions (DMM), or munitions constituents (MC). This data is compiled from the USACE's Geospatial MRS data layers and Homeland Infrastructure Foundation-Level Data (HIFLD) MRS dataset.

Government Publication Date: May 15, 2023

Former Military Nike Missile Sites:

[FORMER NIKE](#)

This information was taken from report DRXTH-AS-IA-83A016 (Historical Overview of the Nike Missile System, 12/1984) which was performed by Environmental Science and Engineering, Inc. for the U.S. Army Toxic and Hazardous Materials Agency Assessment Division. The Nike system was deployed between 1954 and the mid-1970's. Among the substances used or stored on Nike sites were liquid missile fuel (JP-4); starter fluids (UDKH, aniline, and furfuryl alcohol); oxidizer (IRFNA); hydrocarbons (motor oil, hydraulic fluid, diesel fuel, gasoline, heating oil); solvents (carbon tetrachloride, trichloroethylene, trichloroethane, stoddard solvent); and battery electrolyte. The quantities of material a disposed of and procedures for disposal are not documented in published reports. Virtually all information concerning the potential for contamination at Nike sites is confined to personnel who were assigned to Nike sites. During deactivation most hardware was shipped to depot-level supply points. There were reportedly instances where excess materials were disposed of on or near the site itself at closure. There was reportedly no routine site decontamination.

Government Publication Date: Dec 2, 1984

PHMSA Pipeline Safety Flagged Incidents:

[PIPELINE INCIDENT](#)

This list of flagged pipeline incidents is made available by the U.S. Department of Transportation (US DOT) Pipeline and Hazardous Materials Safety Administration (PHMSA). PHMSA regulations require incident and accident reports for five different pipeline system types. Accidents reported on hazardous liquid gravity lines (§195.13) and reporting-regulated-only hazardous liquid gathering lines (§195.15) and incidents reported on Type R gas gathering (§192.8(c)) are not included in the flagged incident file data.

Government Publication Date: May 6, 2024

Material Licensing Tracking System (MLTS):

[MLTS](#)

A list of sites that store radioactive material subject to the Nuclear Regulatory Commission (NRC) licensing requirements. This list is maintained by the NRC. As of September 2016, the NRC no longer releases location information for sites. Site locations were last received in July 2016.

Government Publication Date: May 11, 2021

Historic Material Licensing Tracking System (MLTS) sites:

[HIST MLTS](#)

A historic list of sites that have inactive licenses and/or removed from the Material Licensing Tracking System (MLTS). In some cases, a site is removed from the MLTS when the state becomes an "Agreement State". An Agreement State is a State that has signed an agreement with the Nuclear Regulatory Commission (NRC) authorizing the State to regulate certain uses of radioactive materials within the State.

Government Publication Date: Jan 31, 2010

Mines Master Index File:

[MINES](#)

The Master Index File (MIF) is provided by the United States Department of Labor, Mine Safety and Health Administration (MSHA). This file, which was originally created in the 1970's, contained many Mine-IDs that were invalid. MSHA removes invalid IDs from the MIF upon discovery. MSHA applicable data includes the following: all Coal and Metal/Non-Metal mines under MSHA's jurisdiction since 1/1/1970; mine addresses for all mines in the database except for Abandoned mines prior to 1998 from MSHA's legacy system (addresses may or may not correspond with the physical location of the mine itself); violations that have been assessed penalties as a result of MSHA inspections beginning on 1/1/2000; and violations issued as a result of MSHA inspections conducted beginning on 1/1/2000.

Government Publication Date: Feb 5, 2024

Surface Mining Control and Reclamation Act Sites:

[SMCRA](#)

This inventory of land and water impacted by past mining (primarily legacy coal mining operations) is maintained by the U.S. Department of the Interior's Office of Surface Mining Reclamation and Enforcement (OSMRE), as it provides information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). This inventory contains information on the type and extent of Abandoned Mine Land (AML) Problems, as well as information on the cost associated with the reclamation of those problems. The data is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed. Disclaimer: Per the OSMRE, States and tribes who enter their data into e-AMLIS (AML Inventory System) may truncate their latitude and longitude so the precise location of usually dangerous AMLs is not revealed in an effort to protect the public from searching for these AMLs, most of which are on private property. If more precise location information is needed, please contact the applicable state/tribe of interest.

Government Publication Date: May 20, 2024

Mineral Resource Data System:**MRDS**

The Mineral Resource Data System (MRDS) is a collection of reports describing metallic and nonmetallic mineral resources throughout the world. Included are deposit name, location, commodity, deposit description, geologic characteristics, production, reserves, resources, and references. This database contains the records previously provided in the Mineral Resource Data System (MRDS) of USGS and the Mineral Availability System/Mineral Industry Locator System (MAS/MILS) originated in the U.S. Bureau of Mines, which is now part of USGS. The USGS has ceased systematic updates of the MRDS database with their focus more recently on deposits of critical minerals while providing a well-documented baseline of historical mine locations from USGS topographic maps.

Government Publication Date: Mar 15, 2016

DOE Legacy Management Sites:**LM SITES**

The U.S. Department of Energy (DOE) Office of Legacy Management (LM) currently manages radioactive and chemical waste, environmental contamination, and hazardous material at over 100 sites across the U.S. The LM manages sites with diverse regulatory drivers (statutes or programs that direct cleanup and management requirements at DOE sites) or as part of internal DOE or congressionally-recognized programs, such as but not limited to: Formerly Utilized Sites Remedial Action Program (FUSRAP), Uranium Mill Tailings Radiation Control Act (UMTRCA Title I, Title II), Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA), Resource Conservation and Recovery Act (RCRA), Decontamination and Decommissioning (D&D), Nuclear Waste Policy Act (NWPA). This site listing includes data exported from the DOE Office of LM's Geospatial Environmental Mapping System (GEMS). GEMS Data disclaimer: The DOE Office of LM makes no representation or warranty, expressed or implied, regarding the use, accuracy, availability, or completeness of the data presented herein.

Government Publication Date: Dec 12, 2023

Alternative Fueling Stations:**ALT FUELS**

This list of alternative fueling stations is sourced from the Alternative Fuels Data Center (AFDC). The U.S. Department of Energy's Office of Energy Efficiency & Renewable Energy launched the AFDC in 1991 as a repository for alternative fuel vehicle performance data, which provides a wealth of information and data on alternative and renewable fuels, advanced vehicles, fuel-saving strategies, and emerging transportation technologies. The data includes Biodiesel (B20 and above), Compressed Natural Gas (CNG), Electric, Ethanol (E85), Hydrogen, Liquefied Natural Gas (LNG), Propane (LPG), and Renewable Diesel (R20 and above) fuel type locations.

Government Publication Date: Aug 29, 2024

Superfunds Consent Decrees:**CONSENT DECREES**

This list of Superfund consent decrees is provided by the Department of Justice, Environment & Natural Resources Division (ENRD) through a Freedom of Information Act (FOIA) applicable file. This listing includes Cases filed since 2010 limited to the following: Consent Decrees for CERCLA or Superfund Sites filed and/or as proposed within the ENRD's Case Management System (CMS); and applicable ENRD's Environmental Defense Section (EDS) CERCLA Cases with "Consent" in History Note. CMS may not reflect the latest developments in a case, nor can the agency guarantee the accuracy of the data. ENRD Disclaimer: Congress excluded three discrete categories of law enforcement and national security records from the requirements of the FOIA; response is limited to those records that are subject to the requirements of the FOIA; however, this should not be taken as an indication that excluded records do, or do not, exist.

Government Publication Date: Jun 26, 2024

Air Facility System:**AFS**

This EPA retired Air Facility System (AFS) dataset contains emissions, compliance, and enforcement data on stationary sources of air pollution. Regulated sources cover a wide spectrum; from large industrial facilities to relatively small operations such as dry cleaners. AFS does not contain data on facilities that are solely asbestos demolition and/or renovation contractors, or landfills. ECHO Clean Air Act data from AFS are frozen and reflect data as of October 17, 2014; the EPA retired this system for Clean Air Act stationary sources and transitioned to ICIS-Air.

Government Publication Date: Oct 17, 2014

Registered Pesticide Establishments:**SSTS**

This national list of active EPA-registered foreign and domestic pesticide and/or device-producing establishments is based on data from the Section Seven Tracking System (SSTS). The Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Section 7 requires that each producing establishment must place its EPA establishment number on the label or immediate container of each pesticide, active ingredient or device produced. An EPA establishment number on a pesticide product label identifies the EPA registered location where the product was produced. The list of establishments is made available by the U.S. Environmental Protection Agency (EPA).

Government Publication Date: Feb 29, 2024

Polychlorinated Biphenyl (PCB) Transformers:**PCBT**

Locations of Transformers Containing Polychlorinated Biphenyls (PCBs) registered with the United States Environmental Protection Agency. PCB transformer owners must register their transformer(s) with EPA. Although not required, PCB transformer owners who have removed and properly disposed of a registered PCB transformer may notify EPA to have their PCB transformer de-registered. Data made available by EPA.

Government Publication Date: Oct 15, 2019

Polychlorinated Biphenyl (PCB) Notifiers:

PCB

Facilities included in the national list of facilities that have notified the United States Environmental Protection Agency (EPA) of Polychlorinated Biphenyl (PCB) activities. Any company or person storing, transporting or disposing of PCBs or conducting PCB research and development must notify the EPA and receive an identification number.

Government Publication Date: May 23, 2024

Power Plants:

POWER PLANTS

This list of power plants is provided by the U.S. Energy Information Administration (EIA). The listing includes operable electric generating plants in the United States by energy source, originating from the EIA-860, Annual Electric Generator Report; EIA-860M, Monthly Update to the Annual Electric Generator Report; and EIA-923, Power Plant Operations Report. It includes all operable plants by energy source with a combined nameplate capacity of 1 megawatt or more that are operating, are on standby, or out of service for short- or long-term.

Government Publication Date: Apr 15, 2024

State**Dry Cleaner Remediation Program Prioritization List:**

PRIORITY CLEAN

The Texas Commission on Environmental Quality (TCEQ) implements environmental standards for dry cleaners. The Dry Cleaner Remediation Program (DCRP) establishes a prioritization list of dry cleaner sites and administers the Dry Cleaning Remediation fund to assist with remediation of contamination caused by dry cleaning solvents. Includes prioritized sites identified under the DCRP, as well as sites closed under the DCRP.

Government Publication Date: Sep 30, 2024

Registered Dry Cleaning Facilities:

DRYCLEANERS

The Texas Commission of Environment Quality (TCEQ) maintains a statewide registration list of current dry cleaners.

Government Publication Date: Mar 17, 2025

Delisted Drycleaning Facility List:

DELISTED DRYCLEANERS

A list of sites which were have been removed from the list of dry cleaning facilities registered with the Texas Commission of Environment Quality (TCEQ). Sites are removed when they are no longer used as dry cleaning facilities.

Government Publication Date: Mar 17, 2025

Groundwater Contamination Cases:

GWCC

List of sites present in the Texas Commission on Environmental Quality (TCEQ) Groundwater Contamination Viewer, which represent groundwater contamination cases in Texas as per TCEQ publication SFR-056 (current and some previous years). The Joint Groundwater Monitoring and Contamination Report (SFR-056) was designed and produced by the Texas Groundwater Protection Committee in fulfillment of requirements given in Section 26.406 of the Texas Water Code. The information does not represent an on-the-ground survey and represents only the approximate relative location of property boundaries.

Government Publication Date: Dec 31, 2023

Historical Groundwater Contamination Cases:

GWCC HIST

List of sites from a Joint Groundwater Monitoring and Contamination Report provided by the Texas Commission on Environmental Quality (TCEQ) with the Railroad Commission of Texas (RRC). The annual report describes the status of groundwater monitoring activities conducted or required by each agency at regulated facilities or associated with regulated activities. The report provides a general overview of groundwater monitoring by participating members on a program by program basis. Groundwater contamination is broadly defined in the report as any detrimental alteration of the naturally occurring quality of groundwater.

Government Publication Date: Dec 31, 2018

Affected Property Assessment Reports:

APAR

List of sites for which an Affected Property Assessment Report has been submitted to the Texas Commission on Environmental Quality (TCEQ). An APAR is required when a person is addressing a release of COCs under 30 TAC Chapter 350, the Texas Risk Reduction Program (TRRP). The purpose of the APAR is to document all relevant affected property information to identify all release sources and chemicals of concern (COCs), determine the extent of all COCs, identify all transport/exposure pathways, and to determine if any response actions are necessary.

Government Publication Date: Oct 30, 2024

Spills Database:

SPILLS

List of Spills reported to Emergency Response Division of the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Jan 17, 2025

Industrial and Hazardous Waste Sites with Corrective Actions:

IHW CORR ACTION

This list of active and inactive Industrial and Hazardous Waste Sites with Corrective Actions is made available by the Texas Commission of Environmental Quality (TCEQ). The mission of TCEQ's Industrial and Hazardous Waste Corrective Action Program (IHWCA) is to oversee the cleanup of sites contaminated from industrial and municipal hazardous and industrial nonhazardous wastes.

Government Publication Date: Sep 25, 2024

Per- and Polyfluoroalkyl Substances (PFAS):

PFAS

A list of sites from the Central Registry and ARTS databases where Per- and Polyfluoroalkyl substances (PFAS) containing materials may be of concern. This list is made available by the Remediation Division of the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Feb 3, 2025

Land Application Permits:

LAND APPL

Texas Land Application Permits are a requirement from the Texas Commission on Environmental Quality for any domestic facility that disposes of treated effluent by land application such as surface irrigation, evaporation, drainfields or subsurface land application.

Government Publication Date: Dec 17, 2024

Notice of Violation:

NOV

List of sites that have been sent a Notice of Violation (NOV) by the Texas Commission on Environmental Quality (TCEQ) Office of Compliance and Enforcement. A Notice of Violation is sent out when a site falls out of compliance and has a prescribed time period to return to compliance.

Government Publication Date: Sep 17, 2024

Notices of Enforcement:

NOE

Listing of investigations resulting in a Notice of Enforcement (NOE), made available by the Texas Commission on Environmental Quality, Office of Compliance & Enforcement. Multiple violations may be due to identified noncompliance with different regulatory requirements (citations).

Government Publication Date: Dec 30, 2024

Environmental Liens Listing:

LIENS

List of sites/facilities against which the Texas Commission on Environmental Quality (TCEQ) has placed liens to recover cleanup costs associated with Federal or State Superfund cleanup activities.

Government Publication Date: Jan 14, 2025

Court Orders & Administrative Orders:

ORD

List of sites that have been sent an Administrative Order or Court Order by the Texas Commission on Environmental Quality (TCEQ) Office of Compliance and Enforcement.

Government Publication Date: Oct 2, 2024

Inactive RCRA and Non-RCRA Facilities:

HIST RCRA NONRCRA

A list of inactive or no longer registered Resource Conservation and Recovery Act (RCRA) and non-RCRA facilities, provided by the Texas Commission on Environmental Quality (TCEQ). This list includes both hazardous and non-hazardous waste generators, transporters, and receivers. If an unregistered/inactive industrial site generates less than 220 pounds of hazardous or Class 1 industrial waste, it does not have to notify or report to the TCEQ.

Government Publication Date: Mar 26, 2025

Recycle Texas Online Program:

RTOL

A list of recycling facilities under the Recycle Texas Online service/program made available by the Texas Commission of Environmental Quality (TCEQ). This program allowed facilities to self-report and post their own company/facility information. This program is no longer maintained and these data will not be updated.

Government Publication Date: Oct 10, 2011

Underground Injection Control:

UIC

List of underground injection control (UIC) permits in the Texas Commission on Environmental Quality (TCEQ) Central Registry database. Includes Class I, Class III, Class IV, Class 5, and non permitted UICs; does not include injection wells regulated by the Railroad Commission of Texas.

Government Publication Date: Jan 24, 2025

Industrial and Hazardous Waste - Generators:

IHW GENERATOR

List of active, inactive, and post-closure Industrial and Hazardous Waste Generator Facilities permitted by or registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 335.

Government Publication Date: Dec 3, 2024

Industrial and Hazardous Waste - Transporters:**IHW TRANSPORT**

List of active, inactive, and post-closure Industrial and Hazardous Waste Transporter Facilities permitted by or registered with the Texas Commission on Environmental Quality (TCEQ) under the Texas Administrative Code (TAC) Title 30 Chapter 335.

Government Publication Date: Dec 3, 2024

New Source Review (NSR) Permits:**AIR PERMITS**

A list of facilities that have applied for New Source Review air permits made available by the Texas Commission on Environmental Quality (TCEQ).

Government Publication Date: Dec 19, 2024

Point Source Emissions Inventory:**EMISSIONS**

A list of Texas Commission on Environmental Quality (TCEQ) Point Source Emissions Inventory sites. The Point Source Emissions Inventory is an annual survey of chemical plants, refineries, electric utility plants and other industrial sites that meet the reporting criteria in the TCEQ emissions inventory rule (30 TAC §101.10 Exit the TCEQ).

Government Publication Date: Dec 31, 2023

Tier 2 Report:**TIER 2**

Historical listing of facilities in Texas that store hazardous chemicals and are required to report them under the Emergency Planning and Community Right-to-Know Act (EPCRA) of 1986. This data was provided by the Department of State Health Services (DSHS) and contains facility reports for the 2005 through the 2012 calendar years. Since 2012, agencies are unable to release this listing, as Tier II information is confidential under Texas Government Code Chapter 418, the Texas Disaster Act (TDA). Site specific inquiries can be made to the Texas Commission on Environmental Quality Tier II Chemical Reporting Division.

Government Publication Date: Dec 31, 2012

Edwards Aquifer Permits:**EDWARDS AQUIFER**

Listing of Edwards Aquifer permits made available by the Texas Commission on Environmental Quality (TCEQ). The Edwards Aquifer is home to diverse fauna and is a drinking water source for the city of San Antonio and surrounding central Texas communities. Before building on the recharge, transition, or contributing zones of the Edwards Aquifer, a plan must first be reviewed and approved by the TCEQ Edwards Aquifer Protection Program.

Government Publication Date: Jul 18, 2024

Tribal

No Tribal additional environmental record sources available for this State.

County

No County additional environmental record sources available for this State.

Definitions

Database Descriptions: This section provides a detailed explanation for each database including: source, information available, time coverage, and acronyms used. They are listed in alphabetic order.

Detail Report: This is the section of the report which provides the most detail for each individual record. Records are summarized by location, starting with the project property followed by records in closest proximity.

Distance: The distance value is the distance between plotted points, not necessarily the distance between the sites' boundaries. All values are an approximation.

Direction: The direction value is the compass direction of the site in respect to the project property and/or center point of the report.

Elevation: The elevation value is taken from the location at which the records for the site address have been plotted. All values are an approximation. Source: Google Elevation API.

Executive Summary: This portion of the report is divided into 3 sections:

'Report Summary'- Displays a chart indicating how many records fall on the project property and, within the report search radii.

'Site Report Summary'-Project Property'- This section lists all the records which fall on the project property. For more details, see the 'Detail Report' section.

'Site Report Summary-Surrounding Properties'- This section summarizes all records on adjacent properties, listing them in order of proximity from the project property. For more details, see the 'Detail Report' section.

Map Key: The map key number is assigned according to closest proximity from the project property. Map Key numbers always start at #1. The project property will always have a map key of '1' if records are available. If there is a number in brackets beside the main number, this will indicate the number of records on that specific property. If there is no number in brackets, there is only one record for that property.

The symbol and colour used indicates 'elevation': the red inverted triangle will dictate 'ERIS Sites with Lower Elevation', the yellow triangle will dictate 'ERIS Sites with Higher Elevation' and the orange square will dictate 'ERIS Sites with Same Elevation.'

Unplottables: These are records that could not be mapped due to various reasons, including limited geographic information. These records may or may not be in your study area, and are included as reference.

APPENDIX E

CREDENTIALS

Rachelle K. Christian, P.G.

Senior Associate

Environmental Department Manager

PROFESSIONAL EXPERIENCE

Mrs. Christian is an environmental geologist in Terracon's Lubbock, Texas office. She is responsible for managing environmental services in Terracon's Lubbock office including environmental site assessments, subsurface investigations, remedial services, asbestos services and lead-based paint services. She has 28 years of experience in environmental consulting.

Mrs. Christian is responsible for the management and overview of over 470 environmental site assessments per year throughout the U.S., and has participated in more than 3,100 Phase I projects. She has experience with projects ranging from agricultural, residential and commercial properties to industrial manufacturing, EPA Brownfield sites, PST facilities, LPST facilities, RCRA hazardous waste generators, oil and gas field properties, to wind and solar properties.

Mrs. Christian has experience in client interaction and marketing with numerous clients including private landowners, developers, local municipalities, major retail chains and large scale lending institutions. She is proficient in the coordination of site activities with local, state and federal regulatory agencies.

PROJECT EXPERIENCE

TRANSPORTATION

High-Five TXDOT Development – Dallas, Texas

Project Manager for the High-Five TXDOT ESA at the intersection of I.H. 635 and U.S. 75 in Dallas, Texas.

Professional Services Completed: 2000

Construction Completed: May 2005

DFW Connector Development – Grapevine, Texas

Project Manager and overview for the DFW Connector 56 ESAs at the interchange of S.H. 114 and S.H. 121 in Grapevine, Texas.

Professional Services Completed: 2010

Construction Completed: March 2014

COMMERCIAL/RETAIL/FINANCIAL/TELECOMMUNICATIONS

ESA Portfolios

Project Manager for numerous ESAs conducted in conjunction with the acquisition of numerous convenience store/gasoline service stations, vehicle/equipment dealerships, light industrial office/warehouses, industrial manufacturing facilities, newspaper/printing facilities, apartment complexes, medical office buildings, agricultural facilities, vacant land, and telecommunication tower sites, etc. in Texas and the U.S.

Professional Services Completed: 1996-2023

EDUCATION

Bachelor of Science, Geology,
1995, University of Texas at
Arlington

REGISTRATIONS/ CERTIFICATIONS

Professional Geoscientist:
Texas, No. 222

TDSHS Licensed Asbestos
Inspector (License No. 60-
1732)

TDSHS Licensed Lead Risk
Assessor (License No. 2070466)

TDLR Licensed Mold
Assessment Technician (License
No. MAT1059)

PROFESSIONAL TRAINING

40-Hour OSHA Hazardous
Waste Operations Training

8-Hour OSHA Hazardous Waste
Operations Training
(HAZWOPER)

University of Houston/TCEQ
Texas Risk Reduction Program
(TRRP) Modules 1 and 2

PEC Safeland USA Training
Course

H2S Safety Awareness

CPR and First Aid

8-Hour NORM Surveyor
Training

Rachelle K. Christian, P.G. (continued)

Ranch and Large-Scale Properties – Texas and New Mexico

Project Manager and overview of ESAs on multiple ranch and large-scale properties ranging in size from 1,000 acres to 170,000 acres.

Professional Services Completed: 2009-2023

PUBLIC ENTITIES

Brownfields Redevelopment

Project Manager for numerous downtown Dallas and Fort Worth ESAs, including sites for the American Airlines Center (AAC), as well as in Greenville and Arlington, Texas, for West Central Texas Council of Governments (WCTCOG), and for West Texas/Panhandle and Eastern New Mexico cities.

Professional Services Completed: 1999-2022

Utilities

Project Manager for proposed utility corridors for both water and sewer line ESAs.

Professional Services Completed: 2012-2015

ENERGY

Oil & Gas Due Diligence – Texas and New Mexico

Assisted in multiple Phase I ESAs on over 1,500 oil and gas well production locations, injection and disposal wells, tank batteries, compressor stations, gas plants, field offices, pipe yards in Southwest Texas, West Texas and New Mexico. Duties included field reconnaissance, regulatory records and historical review, and reporting. The projects included reviews of available RRC regulatory documentation, Notices of Violations, Air permits, and Spill Prevention, Control and Countermeasure (SPCC) plans associated with each of the sites. Additionally, Mrs. Christian has aided in the management of project managers conducting due diligence of oil and gas properties.

Professional Services Completed: 2009-2023

Wind and Solar Power

Project Manager and overview for ESAs on proposed wind and solar power properties in Texas. Duties included field reconnaissance of acreage, associated oil/gas fields, historical review and reporting.

Professional Services Completed: 2009-2023

Power Plants

Manager Overview for several ESAs on mothballed power plants in West Texas and Project Manager for several active power plants in Texas, New York and Massachusetts.

Professional Services Completed: 2007-2023

Erin L. Loyd, P.G.

PRINCIPAL / OFFICE MANAGER

PROFESSIONAL EXPERIENCE

Mr. Loyd is a licensed geoscientist and operates as the Office and Environmental Department Manager in the Lubbock, Texas office. Mr. Loyd has over 10-years' experience performing/managing Environmental Site Investigations (ESIs) in Colorado, Texas, Louisiana, and New Mexico. Mr. Loyd operates as a Senior Project Manager and provides the technical review of Phase I Environmental Site Assessments, Phase II site investigations, risk-based corrective action, and remediation projects conducted in the Amarillo, El Paso, Midland and Lubbock markets.

Mr. Loyd has successfully worked with oil and gas operators including upstream and midstream organizations, commercial/real estate representatives, developers, municipalities, and lending institutions and is proficient in the coordination of site activities with local, state and federal regulatory agencies.

PROJECT EXPERIENCE HEALTHCARE

Crow Campus Development – Old Parkland Hospital Revitalization – Dallas, Texas
Managed environmental services for the acquisition of 26 individual parcels including the Historic Old Parkland Hospital facility which are utilized as corporate headquarters for Crow Holdings and TRT Holdings. Services included Phase I ESAs, Limited Site Investigations, Waste Management, Voluntary Cleanup Program Closures, Underground Storage Tank Removal and Closure, and Municipal Setting Designation Implementation.

Professional Services Completed: 2009

Construction Completed: 2013

Construction Cost: \$350 million

Terracon Fee: \$265,000

OIL AND GAS

Pipeline Releases – West Texas and New Mexico

Mr. Loyd provides the technical review of quarterly monitoring reports for nine on-going product removal and groundwater monitoring sites associated with releases from crude oil product lines located in West Texas around Midland, Texas and the eastern portions of New Mexico. Services included Spill Response, Remedial Action, and Regulatory Reporting.

Professional Services Completed: 2013 through Present

Terracon Fee: Approximately \$400,000+ annually

Crude Oil, Condensate and Produced Water Management Program – West Texas

Mr. Loyd provides the technical review monthly portfolios of oil and gas facilities impacted by releases of reportable and non-reportable spill volumes. Monthly portfolios range in number from 25 to 45 investigation sites per month and his team has successfully remediated and closed over 250 releases during 2015. Services included Spill Response, Remedial Action, and Regulatory Reporting.

Professional Services Completed: 2015 through Present

Terracon Fee: Approximately \$300,000+ annually
