SUBJECT: TERMINATION OF RADIOACTIVE MATERIALS LICENSE FOR CSG TESTING,  
U.S. NRC MATERIALS LICENSE NO. 21-35407-01

Dear Mr. Cooper:

In NRC Form 314, "Certificate of Disposition of Materials," dated June 4, 2025, and letter dated June 20, 2025, you requested the termination of U.S. NRC Materials License No. 21-35407-01. Your correspondence is available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession Nos. ML25156A074 and ML25171A138.

An environmental assessment for this action is not required because this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (CFR) Section 51.22(c).

I have reviewed your requests and the accompanying documentation of the completed transfer of licensed material and leak test results demonstrating no evidence of leakage. Based on my review, it appears that all licensable radioactive material has been removed from the facility and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.

Based on these conclusions, no further remediation or actions are required with respect to U.S. NRC-regulated material. Your facilities are suitable for unrestricted use, and U.S. NRC Materials License No. 21-35407-01 is hereby terminated.

In accordance with 10 CFR §2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

If you have questions, please contact me at (630) 829-9737 or [Jason.Kelly@nrc.gov](mailto:Jason.Kelly@nrc.gov).

Sincerely,
