Subject: RE: Framatome SF Building - 10wt.% LEU+ LAR - Electrical RSI Observations
Date: Friday, March 28, 2025 4:11:00 PM
Attachments: NRC Staff Observations to RSI 3 Electrical IC Response SL edits.docx

Good afternoon,

The purpose of our electrical RSI meeting next week is to clarify the basis for our RSIs and resolve the issue as quickly as possible. For the electrical staff to begin its review of the LAR, they need to understand both the proposed design basis for the new modification and process equipment and the current design bases of the existing SF building.

Let me know if you have any questions.

Thanks,

Steve
