RE: University of Michigan NRC Materials License No. 21-00215-04

To Whom It May Concern:

Research and medical uses of radioactive materials at the University of Michigan (U-M) are conducted under Materials License No. 21-00215-04, which is issued to the U-M by the Nuclear Regulatory Commission (NRC) - Region III (expiration date September 30, 2026). This is a Type A Specific License of Broad Scope (10 CFR 33.13); therefore, individual physicians are approved by the U-M Radiation Policy Committee (RPC) / Subcommittee on the Human Use of Radioisotopes (SHUR) and are not individually named on the license.

Benjamin L. Viglianti, M.D., Ph.D., is a Clinical Associate Professor of Radiology, Service Chief of the Division of Nuclear Medicine, and certified by the American Board of Nuclear Medicine (2014). He has been an RPC/SHUR-approved Authorized User physician since June 2021, for medical uses under 10 CFR 35.100, 35.200, and 35.300. He was previously an approved Authorized User physician at the Veterans Health Administration Ann Arbor Healthcare System, for medical uses under 35,100, 35.200, and 35.300.

I trust this information is adequate for your needs. Please contact me [(734) 647-2251 or kfish@umich.edu] should you have any questions regarding Dr. Viglianti's standing as an approved Authorized User physician at U-M.

Sincerely,

Digitally signed by Karl W. Fischer
