Date: Thursday, June 5, 2025 12:59:19 PM

Good Morning Jeff/Chris,

James Waskom was the GOHSEP Director years ago. Unless there is a reason for GOHSEP to be the primary I feel like it is more fitting to have an LDEQ Emergency and Radiological Services Division contact. I am happy to fill that role as Division Administrator.

My Radiological Emergency Preparedness and Response (REPR) group gets notified of shipments from the LSP Hotline and tracks the shipments as they travel through the state.

My information is below.

Kevin M. Borne

Administrator - Emergency and Radiological Services Division
Louisiana Dept. of Environmental Quality
225-219-3616 - office
337-212-2251 – cell

Does (did) James Waskom work for LDEQ? If so, can you provide the needed info below

Chris Adams
Emergency Services Unit-Commander
Louisiana State Police
(318) 308-4269

Thanks Chris.

Yes...please try to find out who the primary contact is now.

Jeff

My apologies. I replied to this a few weeks ago but apparently I didn’t reply to
you but to a representative from Montana. My information as alternate is
correct.

James Waskom is showing inactive on my end and that’s normally what it
shows when someone retires or separates from state service. Do you want

me to try to find who is now the primary?

James and Chris,

I am following up on my May 19th email, announcing I was kicking-off the 2025 annual audit of the U.S. Nuclear Regulatory Commission's (NRC's) Advance Notification of Radioactive Material and Nuclear Material Shipments Designee List.

You are currently listed as the point of contact or alternate contact for Louisiana to receive advance notification of radioactive material and nuclear material shipments transiting through your State, as required by Public Law 96-295 (Section 301) and implemented in Title 10 of the Code of Federal Regulations, Parts 37, 71, and 73.

Please verify that your designee information (such as, name, phone, fax, address, and email) as well as the other contact information you previously provided is still correct. If you are no longer the point of contact or alternate contact for your State, please let me know that as well.

Your contact information on file can be found at:
<https://www.nrc.gov/materials/adv-notification-designees.html>.

Should you have any questions regarding this confirmation check, please feel free to contact me or your NRC Region IV Regional State Liaison Officer, Ryan Alexander (who is copied on this email). Ryan can be reached at Ryan.Alexander@nrc.gov or 817-200-1267.

Thanks, and I look forward to your timely reply.

Subject: 2025 Annual Audit – U.S. Nuclear Regulatory Commission's (NRC)
Advance Notification of Radioactive Material and Nuclear Material
Shipments Designee List - NRC Region IV States

Importance: High

Dear Advanced Notification Designees,

I am conducting the annual audit of the U.S. Nuclear Regulatory Commission's (NRC's) Advance Notification of Radioactive Material and Nuclear Material Shipments Designee List ([designee.pdf](#) [\(nrc.gov\)](#)).

You are currently listed as the point of contact or alternate contact for your respective State to receive advance notification of radioactive material and nuclear material shipments transiting through your State, as required by Public Law 96-295 (Section 301) and implemented in Title 10 of the Code of Federal Regulations, Parts 37, 71, and 73.

Specific advance notifications are as follows:

1. **10 CFR 37.77**, "Advance Notification of Shipment of Category 1 Quantities of Radioactive Material," requires advance written notification be provided to the licensing agency (i.e., the NRC or an Agreement State) and to affected States for shipment of licensed material in a Category 1 quantity, as established in Appendix A to 10 CFR Part 37, "Category 1 and Category 2 Radioactive Materials," before transport of the material outside the confines of the licensee's facility or other place of use or storage.
1. **10 CFR 71.97**, "Advance Notification of Shipment of Irradiated Reactor Fuel and Nuclear Waste," requires advance written notification be provided to States, participating Federally recognized Tribes, and the NRC for irradiated reactor fuel and for large quantity shipments of radioactive waste outside the confines of the licensee's facility or other place of use or storage.
1. **10 CFR 73.35**, "Requirements for Physical Protection of Irradiated Reactor Fuel (100 grams or less) in Transit," requires that small shipments of irradiated reactor fuel (100 grams or less) be subject to the physical protection requirements in 10 CFR Part 37. Accordingly, per 10 CFR 37.77, advanced written notification must be provided to States and the NRC for these shipments before transport outside the confines of the

licensee's facility or other place of use or storage.

1. **10 CFR 73.37**, "Requirements for Physical Protection of Irradiated Reactor Fuel in Transit," requires advance written notification be provided to States, participating Federally recognized Tribes, and the NRC for larger shipments of irradiated reactor fuel (greater than 100 grams) outside the confines of the licensee's facility or other place of use or storage.

Please verify that your designee information (such as, name, phone, fax, address, and email) is still correct. If you are no longer the point of contact or alternate contact for your State, please let me know that as well.

Your contact information on file can be found at: <https://www.nrc.gov/materials/adv-notification-designees.html>.

Should you have any questions regarding this confirmation check, please feel free to contact me or your NRC Region IV Regional State Liaison Officer, Ryan Alexander (who is copied on this email). Ryan can be reached at Ryan.Alexander@nrc.gov or 817-200-1267.

Thanks.

Jeff Lynch
