Subject: RE: RE: Re: FW: Notification of the Scoping Process for the Environmental Review of the H.B. Robinson Steam Electric Plant, Unit 2, Subsequent License Renewal Application
Date: Tuesday, July 15, 2025 2:24:09 PM
Attachments: image001.png

Chief Collins,

Thank you for your response to the NRC staff's notification of the environmental scoping process for the proposed subsequent license renewal (SLR) of the renewed facility operating license for the H.B. Robinson Steam Electric Plant, Unit No. 2 (Robinson) for an additional 20 years of operation. Your comments have been recorded and will be incorporated into the NRC staff's environmental analysis, as applicable.

This website,

<https://www.nrc.gov/reactors/operating/licensing/renewal/applications/robinson-subsequent.html>, provides information about the Robinson SLR review, including the current schedule. Also, publicly available documents and other records, such as records of consultation with state and federally recognized Tribes, can be found by searching the NRC's Agencywide Documents Access and Management System (ADAMS) at <https://adams-search.nrc.gov/home> or <https://adams.nrc.gov/wba/>. ADAMS holds publicly available records pertinent to all NRC projects.

If there is additional information that you would like to share with the NRC staff regarding any of your comments, such as for Traditional Ecological Knowledge, please let me know how this could best be accomplished. If you have any additional follow-up questions, please feel free to reach out to Karen Loomis, Robinson Environmental Program Manager, at karen.loomis@nrc.gov or 301-415-5142 or myself at beau.goldstein@nrc.gov or 301-415-1765.

Regards,

Beau J. Goldstein, RPA
Environmental Project Manager
U.S. Nuclear Regulatory Commission
Office of Nuclear Materials Safety and Safeguards
