Bryan Greenwood,

I'm flagging for your attention my email sent on June 3rd (see below).

For clarity purposes this pertains to this year's (2024 annual audit) of NRC's Advanced Notification Designee program. Details related to the program are outlined in the below June 3rd email.

Once again, I'm confirming that you are still the appropriate contact for the State of Rhode Island, and your contact information is still correct. If you are no longer the appropriate point of contact for Rhode Island, please let me know that as well.

Your contact information on file can be found at: [designee.pdf \(nrc.gov\)](#) [[scp.nrc.gov](#)]. I have also copied your contact information below...

Subject: 2024 Annual Audit - NRC's Advance Notification of Radioactive Material and Nuclear Material Shipments Designee List - NRC Region I States

Importance: High

Dear Advanced Notification Designees,

I am conducting the annual audit of the U.S. Nuclear Regulatory Commission's (NRC's) Advance Notification of Radioactive Material and Nuclear Material Shipments Designee List ([designee.pdf \(nrc.gov\)](#) [[scp.nrc.gov](#)]).

You are currently listed as the point of contact or alternate contact for your respective State to receive advance notification of radioactive material and nuclear material shipments transiting through your State, as required by Public Law 96-295 (Section 301) and implemented in Title 10 of the Code of Federal Regulations, Parts 37, 71, and 73.

Specific advance notifications are as follows:

- **10 CFR 37.77**, "Advance Notification of Shipment of Category 1 Quantities of Radioactive Material," requires advance written notification be provided to the licensing agency (i.e., the NRC or an Agreement State) and to affected States for shipment of licensed material in a Category 1 quantity, as established in Appendix A to 10 CFR Part 37, "Category 1 and Category 2 Radioactive Materials," before transport of the material outside the confines of the licensee's facility or other place of use or storage.
- **10 CFR 71.97**, "Advance Notification of Shipment of Irradiated Reactor Fuel and Nuclear Waste," requires advance written notification be provided to States, participating Federally recognized Tribes, and the NRC for irradiated reactor fuel and for large quantity shipments of radioactive waste outside the confines of the licensee's facility or other place of use or storage.
- **10 CFR 73.35**, "Requirements for Physical Protection of Irradiated Reactor Fuel (100 grams or less) in Transit," requires that small shipments of irradiated reactor fuel (100 grams or less) be subject to the physical protection requirements in 10 CFR Part 37. Accordingly, per 10 CFR 37.77, advanced written notification must be provided to States and the NRC for these shipments before transport outside the confines of the licensee's facility or other place of use or storage.
- **10 CFR 73.37**, "Requirements for Physical Protection of Irradiated Reactor Fuel in Transit," requires advance written notification be provided to States, participating Federally recognized Tribes, and the NRC for larger shipments of irradiated reactor fuel (greater than 100 grams) outside the confines of the licensee's facility or other place of use or storage.

Please verify that your designee information (such as, name, phone, fax, address, and email) is still correct. If you are no longer the point of contact or alternate contact for your State, please let me know that as well.

Your contact information on file can be found at: [designee.pdf \(nrc.gov\)](#) [[scp.nrc.gov](#)].

Should you have any questions regarding this confirmation check, please feel free to contact me or one of your NRC Region I Regional State Liaison Officers, Doug Tifft. Doug can be reached at Doug.Tifft@nrc.gov or 610-337-6918.

Thanks.

Best,

Jeff
