Form 2.3-2 Operating Test Quality Checklist

Facility: CCNPP		Date of Examination: June 23, 2025 Operating Test Number: 2025		
General Criteria		(Y)es / (N)o		
		a	b*	c#
a.	The operating test meets the criteria on the associated test outline.	MP	ON	TCS
b.	There are enough test items so that test items will not be repeated on more than 1 day of the operating test.	MP	ON	TCS

d.	Overlap with the written examination and between different parts of the operating test is minimized.	MP	ON	TCS
e.	It appears that the operating test will differentiate between competent and less-than-competent applicants at the designated license level.	MP	ON	TCS
Walkthrough Criteria				
a.	Each job performance measure (JPM) includes the following, as applicable: - task standard - initial conditions - initiating cues - references and tools, including associated procedures - reasonable and validated time limits (average time allowed for completion) and specific designation if the facility licensee deems it to be time critical - alternate path JPMs are labeled as "alternate path" - operationally important specific performance criteria that include the following: - detailed expected actions with exact criteria and nomenclature - system response and other examiner cues - statements describing important observations to be made by the applicant - criteria for successful completion of the JPM task standard - identification of critical steps and their associated performance standards - restrictions on the sequence of steps, if applicable	MP	ON	TCS
b.	Ensure that any changes from the previously approved JPM outlines (Forms 3.2-1 and 3.2-2) have not caused the test to deviate from any of the acceptance criteria (e.g., item distribution, bank use, repetition from the last two NRC examinations) specified on those forms.	MP	ON	TCS
Simulator Scenario Set Criteria for Scenario Numbers: 1 / 2 / 3 / 4				
QUALITATIVE ATTRIBUTES				
1.	The initial conditions are realistic in that some equipment and/or instrumentation may be out of service, but it does not cue the operators into expected events.	MP	ON	TCS
2.	The scenarios consist mostly of related events.	MP	ON	TCS
3.	Each event description consists of the following: - the point in the scenario when it is to be initiated - the malfunction(s) or conditions that are entered to initiate the event - the symptoms/cues that will be visible to the crew - the expected operator actions (by shift position) - the event termination point (if applicable)	MP	ON	TCS
