Subject: Isotopia USA Inc. NRC RAM License 13-35729-01MD – Amendment Request

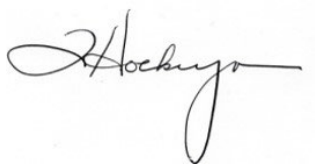

Dear Ms. Cender,

Isotopia USA Inc. is currently authorized to possess up to 1 Ci of Ga-68 “for use in calibration and checking of the licensee’s instruments”. In order to assist with the research and development efforts of our Israeli colleagues, we are looking to increase this limit up to 5 Ci so that we can receive cyclotron produced Ga-68 in sufficient quantities to have 2.5 Ci available for testing on our instruments in house, given this material’s short half-life (approximately 68 minutes).

This material will not be distributed outside of our facility once received.

Thank you in advance for your review. We look forward to hearing from you.

Sincerely,

Todd Hockemeyer
CEO
