SUBJECT: Request for Additional Information – Norton Clark Hospital

License No. 13-12367-01

Docket No. 030-01658

Control No. 645377

Dr. Mr. Hill,

In your letter dated August 5, 2025, you indicated that Norton Clark needed to respond with additional evidence that demonstrates Norton Clark Hospital will satisfy training requirements outlined in 10 CFR 35.27 and 10 CFR 35.310. Norton Clark Hospital does not do any radiopharmaceutical therapies and/or brachytherapy that would not allow patients to be released per 10 CFR 35.75. Regarding compliance with 10 CFR 35.27, all personnel directly involved with radioactive materials receive initial and annual training. This training ensures they understand and follow the instructions of the supervising authorized user, adhere to the licensee's written radiation protection and directive procedures, and comply with applicable regulations and license conditions related to the medical use of byproduct material.

The initial and annual training is performed in our LMS Module in the Norton Healthcare system. Please see attached "Radiation Safety Handbook" that lists all Norton Healthcare policy numbers associated with radiation safety.

Feel free to reach out if you have any further questions.

Sincerely,

*Jodi Daves M.S. dABR*
