Subject: FYI - Revised Estimate - Vogtle 3 and 4 - LAR to Change Entry Requirements for Condition B of TS 3.8.2, "DC Sources - Shutdown"

Ken,

By letter dated March 31, 2025 (Agencywide Documents and Access Management System Accession No. ML25090A305), Southern Nuclear Operating Company (SNC, the licensee) submitted a license amendment request (LAR) for Vogtle Electric Generating Plant (Vogtle), Units 3 and 4. The proposed LAR for Vogtle, Units 3 and 4, would change the entry requirements for Condition B of technical specification (TS) 3.8.2, "DC [Direct Current] Sources – Shutdown."

By email dated April 11, 2025 (ML25101A074), the NRC accepted the LAR for review and estimated that this LAR would take approximately 375 hours to complete and be completed by April 11, 2026.

The NRC staff was able to realign staff assignments and readjust workloads; therefore, the revised completion date is February 13, 2026, and the revised estimated hours is 320 hours.

Thanks.
John
