

**Enclosure 3**  
**Environmental Assessment Information**

Environmental Assessment Information for LEU+ was previously provided as part of UUSA letter dated November 30, 2023, License Amendment Request (LAR) 23-02 (Enclosure 8 - Environmental Information), in support of requesting U.S. NRC approval to increase the enrichment limit in special nuclear material license SNM-2010 from 5.5 weight (wt.) percent uranium-235 ( $^{235}\text{U}$ ) to less than 10.0 w/o percent  $^{235}\text{U}$  (ML23334A122 and ML23334A130).

The Environmental Assessment (ML24331A260) associated with this license amendment was published in the Federal Register on December 10, 2024:

“Environmental Assessment for Proposed License Amendment to Allow Urenco USA to Enrich Uranium to Less than 10 Weight Percent  $^{235}\text{U}$ ,” Lea County, New Mexico, December 2024 (ML24331A260)

The Environmental Assessment is addressed in NRC Safety Evaluation Report for UUSA Request for Less Than 10 Weight Percent Uranium 235 dated 12/11/2024 (ML24318C240).
