Subject: Submittal of Westinghouse proprietary review on the audit report and draft Safety Evaluation for “Nuclear Design Methodology Topical Report”

Westinghouse Electric Company, LLC (Westinghouse) has completed its proprietary review of the U.S. Nuclear Regulatory Commission’s (NRC’s) audit report and draft Safety Evaluation (SE) on the following Westinghouse Topical Report for the **eVinci™** microreactor program:

- EVR-LIC-RL-002-P/NP, Revision 0, “Nuclear Design Methodology Topical Report”

In review of the audit report and draft SE, Westinghouse has developed markups of both the audit report and draft SE to share with NRC. These markups are captured in the following enclosures to this letter:

- Enclosure 2: Marked-up audit report
 - Westinghouse has identified additional proprietary information in the audit report. This proprietary information is highlighted in blue and double bracketed ([[]]) in this enclosure. Westinghouse has reviewed the double bracketed information that NRC already identified as Westinghouse proprietary information and agrees that information is correctly identified as proprietary. The blue highlighted information is additional Westinghouse proprietary information to be withheld from public disclosure.
- Enclosure 3: Marked-up draft SE
 - Westinghouse has identified additional proprietary information in the draft SE. This proprietary information is highlighted in blue and double bracketed ([[]]) in this enclosure. Westinghouse has reviewed the double bracketed information that NRC already identified as Westinghouse proprietary information and agrees that information is correctly identified as proprietary. The blue highlighted information is additional Westinghouse proprietary information to be withheld from public disclosure.
 - Westinghouse also has two editorial comments on the draft SE. The text that these comments apply to is highlighted green in Enclosure 3.
- Enclosure 4: Draft SE Comments
 - The two editorial comments on the draft SE are included in Enclosure 4.

This submittal contains proprietary information of Westinghouse. In conformance with the requirements of 10 CFR Section 2.390, as amended, of the Nuclear Regulatory Commission's (Commission's) regulations, we are enclosing with this submittal an Affidavit (Enclosure 1). The Affidavit sets forth the basis on which the information identified as proprietary may be withheld from public disclosure by the Commission.

Correspondence with respect to the proprietary aspects of this submittal or the Westinghouse Affidavit should reference AW-25-067 and should be addressed to Anthony J. Schoedel, Director, eVinci Licensing & Regulatory Affairs, Westinghouse Electric Company, 1000 Westinghouse Drive, Building 1, Cranberry Township, PA 16066.
