NUCLEAR REGULATORY COMMISSION

REGION III
2056 WESTINGS AVENUE, SUITE 400
NAPERVILLE, IL 60563-2657

November 25, 2025

David Nestle, CHP
Radiation Safety Officer
H3D, Inc.
812 Avis Dr.
Ann Harbor, MI 48108

SUBJECT: H3D, Inc. - Amendment no. 9

Dear David Nestle:

This correspondence refers to your license amendment request dated September 2, 2025. Please find enclosed Amendment No. 9 to your U.S. Nuclear Regulatory Commission (NRC) License No. 21-35314-01 in accordance with your request.

Please review the enclosed document carefully and be sure that you understand and fully implement all the conditions incorporated into the amended license. If there are any errors or questions, please contact me at 630-829-9875 or via electronic mail at Magdalena.Gryglak@nrc.gov so that appropriate corrections or answers can be provided.

An environmental assessment for this action was not required because this action is categorically excluded under Title 10 *Code of Federal Regulations* (CFR) 51.22(c).

In your request dated September 2, 2025, you provided the close-out survey and leak test results for a former restricted area at 812 Avis Dr., Ann Harbor, Michigan. You also confirmed that all residual licensed material used in this area of use had been removed – such that any remaining residual radioactivity is within the limits of 10 CFR Part 20, Subpart E.

Based on its review of close-out survey and leak test results, the staff has concluded that all licensable radioactive material has been removed and residual radioactive material attributable to licensed activities in this area of use does not exceed current NRC criteria. Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required. The former area of use at 812 Avis Dr., Ann Harbor, Michigan is suitable for unrestricted use.

You will be periodically inspected by the NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action(s) against you. This could include issuance of a Notice of Violation, or Imposition of a Civil Penalty, or an Order Suspending, Modifying or Revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available at: <http://www.nrc.gov/reading-rm/doc-collections/enforcement/>.

An electronic version of the NRC's regulations is available on the NRC Web Site at: www.nrc.gov. Additional information regarding medical uses of radioactive materials may be obtained on the NRC Web Site at: <http://www.nrc.gov/materials/miau/med-use-toolkit.html>. This site also provides the updated Training and Experience NRC Form 313A series of forms and guidance, as well as information on the revised regulations for naturally occurring and accelerator-produced radioactive materials (NARM).

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web Site at: <http://www.nrc.gov/about-nrc/safety-culture.htm>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web Site at: <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

Magdalena R. Gryglak
