Good afternoon, Mr. Mogili,

This email is in response to the amendment request dated July 8, 2025, to amend U.S. Nuclear Regulatory Commission (NRC) Materials License No. 21-04127-06.

Upon reviewing your request, the following area was identified and requires additional information:

1. In accordance with [NUREG 1556 Volume 9 Rev. 3 Section 8.9.1](#), please submit your facility diagram for the 35.200 use. Please provide the following:
 - Indicate the address of this location on the diagram and direction of north.
 - Identify all rooms where byproduct material is prepared, used, stored (e.g., hot lab, imaging rooms, injection areas, stress/treadmill rooms etc.) and principal use of adjacent rooms (e.g., closets, hallways, toilets etc.)
 - For the hot lab description, describe and label details of the waste and receiving areas, sinks, fume hoods, L-block, and dose calibrator.
 - Describe measures to ensure security of radioactive material such as labeling locking doors and cabinets/containers.
2. Please provide a statement that there is no intended use of PET radiopharmaceuticals.

If you do decide you want to use PET radiopharmaceuticals additional facility diagrams and description of shielding, including shielding calculations, will need to be submitted.

Please submit your signed response letter by September 8, 2025. If you need more time or have any questions, please don't hesitate to contact me. As you will not receive a hard copy of this request for additional information, please confirm that you have received this email.

Thank you,
