DISCUSS THE DOMINION ENERGY EARLY SITE PERMIT  
RENEWAL APPROACH AND STAFF QUESTIONS

**Background:** On May 23, 2025, the U.S. Nuclear Regulatory Commission (NRC) staff held a public meeting with Dominion Energy Services, Inc. (Dominion Energy) to discuss its draft white paper describing its North Anna early site permit (ESP) renewal approach.<sup>1</sup> On September 5, 2025, Dominion Energy submitted its final white paper.<sup>2</sup>

The NRC held an observation public meeting on December 11, 2025, with Dominion Energy, to discuss NRC staff questions and Dominion Energy responses, regarding Dominion Energy's North Anna ESP renewal approach, following the submission of its final white paper.<sup>3</sup> This virtual observation preapplication meeting had attendees from Dominion Energy, NRC staff, and members of the public.

Preapplication engagements, including this meeting, provide an opportunity for the NRC staff to engage in early discussions with a prospective applicant to offer licensing guidance and to identify potential licensing issues early in the licensing process. No decisions or commitments were made during the preapplication meeting.
