SUBJECT: TRISO-X – OAK RIDGE – INSPECTION SCHEDULE FOR TX-1 PHASE 2A

Dear Jennifer Wheeler:

Enclosed is the schedule of inspections to be performed by the U.S. Nuclear Regulatory Commission (NRC) inspectors at the TRISO-X facility for the proposed TX-1 building Phase 2a, only. The inspection schedule is provided in advance to minimize the resource impact on your staff and allow for the resolution of any scheduling conflicts and personnel availability issues, well in advance of inspector arrival onsite.

Please note that any regional initiative, reactive inspections, or additional inspections needed to support changes in construction schedule, licensing actions, new processes or technologies are not included in the schedule and will be added as detailed schedule information becomes available. If circumstances arise which cause the NRC inspectors to change the dates of the planned inspections, we will contact you to discuss the change as early as possible. Please contact Cynthia Taylor (404) 997-4480 with any questions or concerns you may have regarding this letter or the inspection schedule.

This letter and its enclosure will be made available for public inspection and copying at <http://www.nrc.gov/reading-rm/adams.html>, and at the NRC Public Document Room, in accordance with Title 10 of the Code of Federal Regulations 2.390, "Public Inspections, Exemptions, Requests for Withholding."

Sincerely,

A handwritten signature in blue ink, appearing to read "EC Michel".
