Dear Mr. Coffey:

The U.S. Nuclear Regulatory Commission (NRC) has issued Subsequent Renewed Facility Operating License Nos. These licenses were issued following the completion of the NRC staff's safety and environmental reviews of FPL's application dated August 3, 2021 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML21215A314), as supplemented by letters dated April 7, 2022 (ML22097A202), April 13, 2022 (ML22103A014), May 19, 2022 (ML22139A083), September 22, 2022 (ML22265A134), June 14, 2023 (ML23165A114), July 13, 2023 (ML23194A211), and February 3, 2025 (ML25034A029). The subsequent renewed licenses expire on March 1, 2056 (Unit 1) and April 6, 2063 (Unit 2).

The NRC staff documented the results of its safety review in the "Safety Evaluation Related to the Subsequent License Renewal of St. Lucie Plant, Units 1 and 2," dated July 2023 (ML23200A146), as revised in September 2023 (ML23219A003), and determined that FPL had met the requirements of 10 CFR 54.29(a). The NRC staff documented the results of its environmental review in the "Generic Environmental Impact Statement for License Renewal of Nuclear Plants, Supplement 11, Second Renewal, Regarding Subsequent License Renewal for St. Lucie Plant, Units 1 and 2, Final Report," dated March 2026 (ML26070A148), and determined that FPL had met the requirements of 10 CFR 54.29(b).

Enclosed with this letter are the St. Lucie Plant, Units 1 and 2 Subsequent Renewed Facility Operating Licenses and Technical Specifications, the Record of Decision, and a copy of the *Federal Register* notice of issuance. The renewed licenses include new license conditions and changes to Appendix B for Units 1 and 2 as discussed in the Record of Decision.
