4. PART II OF THE FORECAST OF CONTRACT OPPORTUNITIES: CURRENT ACTIVE CONTRACT LISTING.....	18

## FOREWORD

Public Law 100-656, the Business Opportunity Development Reform Act of 1988, requires agencies to compile and make available projections of contracting and/or subcontracting opportunities that small businesses (throughout this document the term “small business” includes small businesses owned by economically disadvantaged individuals, women, veterans, service-disabled veterans and those located in Historically Underutilized Business Zones (HUBZone)) may be able to provide products and services supporting acquisition needs. This U.S. Nuclear Regulatory Commission (NRC) agency-wide “Forecast of Contract Opportunities” (**Forecast**) is intended to assist small businesses in their business development activities. Contracting opportunity descriptions are based on the best information available from agency program offices at the time of publication.

Part I of the NRC **Forecast** includes projections of all anticipated commercial contract opportunities exceeding \$25,000 and Parts II include a list of agency current and active contracts organized by North American Industrial Classification System (NAICS). Note: Part I and Part II of the **Forecast** are derived from data entered by the Program Office and confirmed by the agency's Acquisition Management Division.

The NRC purchases a wide variety of goods and services, from administrative support to engineering, environmental support to construction, and research and development. We are committed to providing maximum practicable acquisition opportunities at the prime and subcontract level for small businesses. We hope that this **Forecast** will assist you in conducting business with the NRC.

## DISCLAIMER

The acquisitions described in this **Forecast** are expected to have a solicitation released in fiscal year 2026. The acquisition descriptions are based on the best information available at the time of publication and is updated or revised throughout the year.

All projected acquisitions are subject to revision or cancellation. Final decisions on the extent of competition, acquisition method, estimated contract range, or any aspect of the acquisition action will not be made until each acquisition is initiated. The **Forecast** data is for planning purposes and does not represent a pre-solicitation synopsis, does not constitute an invitation for bid or request for proposal, and is not a commitment by the Government to purchase the described products and/or services. Businesses are reminded that only contracting officers have the authority to contractually bind the Government and authorize the release of acquisition information.

The purpose of publishing the **Forecast** to the general public is to make the reader aware of:

- 1) the scope and depth of the agency's dependence upon the private sector for products and/or services,
- 2) those new initiatives where the agency intends to seek participation of private sector firms for product(s) and/or services, and
- 3) the identification of acquisitions for participation in Federal small business-related socioeconomic programs (i.e., set-asides)

In addition, the **Forecast** contains information regarding both the timing and range of estimated costs of the agency's planned acquisition actions. The dynamics of change in governmental operations and in the implementation of the annual budget process are likely to result in significant changes during the fiscal year. As a result, the agency will examine the elements of the **Forecast** throughout the year where necessary.

**PART I:**
