Duane Arnold Energy Center  
Docket Nos. 50-331, 72-32  
Renewed Facility License No. DPR-49

Supplement to License Amendment Request (TSCR-194): Application to Revise the Physical Security Plan to Support Resumption of Power Operation

References:

1. Letter from NextEra Energy Duane Arnold, LLC to USNRC, "License Amendment Request (TSCR-194): Application to Revise the Physical Security Plan to Support Resumption of Power Operation," dated December 17, 2025 (ADAMS Accession No. ML25363A083)

In Reference 1, NextEra Energy Duane Arnold, LLC (NEDA) submitted a license amendment request (LAR) to revise the Duane Arnold Energy Center (DAEC) Renewed Facility License (RFL). This LAR would revise the DAEC Physical Security Plan (PSP) to reflect the requirements associated with the security changes necessary for the resumption of receipt of nuclear fuel and resumption of power operation. NEDA submitted Revision 18 of the DAEC PSP with the LAR.

Subsequent to the submittal, your staff identified editorial changes for the PSP. This information has now been included in the attached PSP.

Enclosure 1 of this letter is a CD that contains the PSP.

NEDA requests that Enclosure 1, which contains Safeguards Information and Security Related Information, be withheld from public-disclosure pursuant to 10 CFR 73.22 and 10 CFR 2.390, respectively.

This letter does not alter the conclusions in Reference 1 that the proposed change does not involve a significant hazards consideration pursuant to 10 CFR 50.92, and there are no significant environmental impacts associated with the change.

In accordance with 10 CFR 50.91, a copy of this application with the enclosure is being provided to the designated State of Iowa official.

This letter contains no new and no revised regulatory commitments.
