

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

March 24, 2026

Jeffrey Semancik, Director
Radiation Division
Bureau of Air Management
Connecticut Department of Energy and
Environmental Protection
79 Elm Street
Hartford, CT 06106-5127

SUBJECT: CONNECTICUT'S NON-STANDARD LICENSE CONDITION REQUEST

Dear Jeffrey Semancik:

We have reviewed the Connecticut Department of Energy and Environmental Protection's (the Department's) non-standard license condition request, which was received by our office on February 5, 2026. The Department submitted a proposed legally binding requirement in the form of a non-standard license condition to explicitly authorize, in the Department's radioactive materials license, the Department's possession of licensed materials impounded or removed for public safety and protection of the environment, in accordance with Connecticut General Statutes §§ 22a-158b and 22a-157a. We discussed our review of the non-standard license condition requirement with you on March 5, 2026.

As a result of our review, we have no comments. We have determined that the non-standard license condition meets the compatibility and health and safety categories established in the Office of Nuclear Material Safety and Safeguards (NMSS) Procedure SA-200, "Compatibility Categories and Health and Safety Identification for NRC Regulations and Other Program Elements."

The SRS Data Sheet summarizes our knowledge of the status of other Connecticut regulations, as indicated. Please let us know if you note any inaccuracies or have any comments on the information contained in the SRS Data Sheet. This letter, including the SRS Data Sheet, is posted on:

<https://www.nrc.gov/agreement-states>.

If you have any questions regarding the review, the compatibility and health and safety categories, or any of the NRC regulations used in the review, please contact my staff at AgreementStateRegs.Resource@nrc.gov.

Sincerely,

 Signed by Giantelli, Adelaide
on 03/24/26
