SUBJECT: DONALD C. COOK NUCLEAR PLANT, UNIT NO. 2 - CORRECTION TO PAGES ISSUED FOR AMENDMENT NO. 346 REGARDING ADOPTION OF 10 CFR 50.69, "RISK-INFORMED CATEGORIZATION AND TREATMENT OF STRUCTURES, SYSTEMS AND COMPONENTS FOR NUCLEAR POWER REACTORS" (EPID L-2024-LLA-0025)

Dear Ms. Ferneau:

By letter dated April 9, 2025 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML25071A389), the U. S. Nuclear Regulatory Commission (NRC) issued Amendment No. 346 to Renewed Facility Operating License No. DPR-74, for the Donald C. Cook Nuclear Plant (CNP), Unit No. 2. The amendment revised the CNP Renewed Facility Operating License (RFOL) No. DPR-74 to add a new license condition to allow for implementation of Title 10 of the *Code of Federal Regulations* Section 50.69, "Risk-informed categorization and treatment of structures, systems and components for nuclear power reactors."

The NRC inadvertently issued a page of RFOL No. DPR-74 that had an error on page 11 for CNP, Unit No. 2. Specifically:

- the last in license condition 2.D says:

The Donald C. Cook Nuclear Plant CSP was approved by License Amendment No. 315 as supplemented by changes approved by License Amendment Nos. 303, 308, and 315.

- the last in license condition 2.D should say:

The Donald C. Cook Nuclear Plant CSP was approved by License Amendment No. 299 as supplemented by changes approved by License Amendment Nos. 303, 308, and 315.

The error was introduced during the issuance of License Amendment No. 346 for CNP, Unit No. 2.

The NRC staff has determined that these were inadvertent typographical errors and are entirely editorial in nature. The correction does not change any of the conclusions in the safety

evaluation associated with Amendment No. 346 for CNP, Unit No. 2, and does not affect the associated notice to the public.

The corrected pages are enclosed and should be replaced as follows:

Sincerely,

/RA/
