April 13, 2026

Andrew M. Clark  
Radiation Safety Officer  
Reitz & Jens, Inc.  
10151 Corporate Square Dr.  
St. Louis, MO 63132

SUBJECT: AMENDMENT NO. 7 TO RADIOACTIVE MATERIALS LICENSE FOR  
REITZ & JENS, INC., U.S. NRC MATERIALS LICENSE NO. 24-26114-01

Dear Mr. Clark:

Enclosed is Amendment No. 7 to your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 24-26114-01, in accordance with your request dated March 26, 2026, and the application dated March 31, 2026, signed by Jeffrey D. Bertel, President.

This amendment reflects the addition of the permanent storage site at 10151 Corporate Square Dr., St. Louis, Missouri. Further, I have corrected Item 6, 7, 8 and 9, Part B, of your license to reflect that the authorized radionuclide is americium-241/beryllium and updated the associated sealed source model number to read AMN.V997. Finally, I have updated the license conditions to conform with the standard license condition format in our Web-based Licensing (WBL) System, including the deletion of former Condition 19 which is not applicable to your licensed device.

After you have completed the transfer of your portable gauging devices to your new permanent storage sites, please submit a separate request to remove the former location from your license. Please include documentation of the transfer and current leak test reports with the request.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III office at (630) 829-9887 so that we may provide appropriate corrections and answers.

An environmental assessment for this action is not required because this action is categorically excluded under [Title 10 of the Code of Federal Regulations \(10 CFR\) §51.11\(c\)\(14\)](#).

You will be periodically inspected by the U.S. NRC. Failure to conduct your program in accordance with U.S. NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with U.S. NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the U.S. NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with U.S. NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that U.S. NRC expects of its licensees.

The U.S. NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on U.S. NRC's safety culture website at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. I encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in U.S. NRC-regulated activities.

In accordance with [10 CFR §2.390](#) of the U.S. NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the U.S. NRC Public Document Room or from the U.S. NRC's ADAMS, accessible from the U.S. NRC website at <https://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Jason M. Kelly, MPH, CPH  
Health Physicist  
Materials Licensing Branch
