PART I.D -- COMMENTS

Upon receiving your three FOIA requests on December 23, 2024, we contacted you to request clarification and to inform you that the NRC proactively discloses Event Notification Reports and Licensee Event Reports. In your reply, you explained that “drones” refers to identified objects and “unidentified” refers to unidentified objects (e.g., UAP, UFO). You also confirmed that you wished to exclude Event Notification Reports and Licensee Event Reports after we informed you that these records are publicly available at: https://www.nrc.gov/reading-rm/doc-collections/event-status/index.

Although your response asked that we task the Offices of Nuclear Material Safety and Safeguards (NMSS) and Investigations (OI) due to their respective responsibilities, those offices would not reasonably be expected to maintain records responsive to your requests. We therefore tasked the Office of Nuclear Security and Incident Response (NSIR) and Region I; both offices located responsive records.

Within the records are screenshots of publicly available links that also relate to the subject matter of your requests and are accessible through social media platforms:

After obtaining disclosure recommendations from NSIR and Region I staff, and consulting with Public Service Enterprise Group (PSEG), the licensee for the Salem and Hope Creek plants, we completed our processing of your requests. The responsive records are enclosed; please refer to Part II for the exemptions applied.

This concludes our processing of FOIA-2025-000265, FOIA-2025-000266, and FOIA-2025-000272.
