General Comment

I oppose finalization of Interim Staff Guidance DANU-ISG-2026-XX, Docket ID NRC-2026-0760. This guidance provides NRC staff no methodology, no evidentiary threshold, and no criteria to evaluate DOE or DOW authorization information. It is unfit for finalization and must be substantially revised. I incorporate by reference the public comments submitted by Fred Schofer on this docket. I urge the NRC to withdraw this guidance and reissue it with adequate criteria before any licensing actions proceed. Anna Rondon
