Category: This is an Observation Meeting. This is a meeting in which attendees will have an opportunity to observe the NRC performing its regulatory function or discussing regulatory issues. Attendees will have an opportunity to ask questions of the NRC staff or make comments about the issues discussed following the business portion of the meeting; however, the NRC is not actively soliciting comments towards regulatory decisions at this meeting.

Purpose: The purpose of this meeting is for Nuclear Energy Institute (NEI) and industry to go through tabletop exercises for discussions related to implementation of the U.S. Nuclear Regulatory Commission (NRC) draft graded approach for power uprate reviews (specifically binning), for planned power uprate applications for a pressurized water reactor (PWR) and boiling water reactor (BWR). NRC staff will also discuss proposed revisions and refinements to the graded approach for power uprate review guidance based on external stakeholder feedback.
