Category: This is an Information Meeting with a Question and Answer Session. The purpose of this meeting is for the NRC staff to meet directly with individuals to discuss regulatory and technical issues. Attendees will have an opportunity to ask questions of the NRC staff or make comments about the issues discussed throughout the meeting; however, the NRC is not actively soliciting comments towards regulatory decisions at this meeting.

Purpose: Discuss the significance of a preliminary finding with low safety significance (White) and an associated apparent violation of NRC requirements to restore safety chiller 2-06 to operable status in accordance with technical specifications following a refrigerant leak on August 14, 2025. This discussion is part of the process the NRC uses before making a final determination. The finding and apparent violation are discussed in NRC Inspection Report 05000446/2026090, dated April 10, 2026 (NRC's Agencywide Documents Access and Management System [ADAMS] Accession No. ML26096A393).
