SUBJECT: ERRATA FOR BRAIDWOOD STATION - NRC INITIAL LICENSE  
EXAMINATION REPORT 05000456/2025301 AND 05000457/2025301

Dear Christopher Mudrick:

By two letters dated February 11, 2026, and February 12, 2026, two Braidwood Station initial license examination applicants requested an Informal Review to be performed on the written examination for the 2025 Braidwood Station initial license written examination. This informal review was to be performed by the Operator Licensing and Human Factors branch (IOLB), Division of Reactor Oversight (DRO). On May 6, 2026, IOLB concluded with their informal review and determined that the answer key should be changed from keyed answer B to answer A for Question 59.

Based upon the results of the informal review, one applicant who requested the informal review received a passing grade on the written examination, thus resulting in the issuance of an additional senior operator license.

However, this creates an error in Nuclear Regulatory Commission (NRC) Initial License Examination Report 05000456/2025301; 05000457/2025301 (ML26029A447). With the change in grading of Question 59, the revised examination results in fifteen applicants passing all sections of their respective examinations and receiving operator licenses. One applicant was issued a Denial Letter. Nine applicants were issued senior operator licenses and six applicants were issued operator licenses.

Sincerely,

Signed by Zurawski, Paul  
on 05/07/26

Paul J. Zurawski, Chief  
Operations Branch  
Division of Operating Reactor Safety
