ATTN: Document Control Desk  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001

Subject: Oklo Inc.  
Submittal of Oklo Inc. "Product-Based Operator Licensing Framework" Topical  
Report, Revision 1

The purpose of this letter is to submit Revision 1 of the Oklo Inc. (Oklo) "Product-Based Operator Licensing Framework" topical report to the U.S. Nuclear Regulatory Commission (NRC).

Oklo is developing a product line of Aurora powerhouses to support a rapidly growing customer base with a variety of end uses. To deliver, Oklo has designed the Aurora to have a robust safety profile and to be able to ensure the health and safety of the public without the reliance on human operators. These intentional design choices result in simple operation of the Aurora, which is fundamental to minimizing the reliance upon, or full elimination of, human involvement to uphold safety. Key Aurora design aspects include the use of fast reactor technology, inherent and passive design features, and the use of automatic controls to the extent possible.

Oklo requests NRC review and approval of Oklo's product-based operator licensing framework. This revision reflects discussions held with the NRC staff regarding this report. The subject topical report contains proprietary information. As such, Oklo requests Enclosure 2 be withheld, in part, from public disclosure pursuant to 10 CFR 2.390. Also enclosed is Oklo's affidavit attesting to the proprietary nature of this information. Enclosure 3 is a redacted version of this topical report.

If you have any questions or need any additional information, please contact me at [andrew@oklo.com](mailto:andrew@oklo.com) or (650) 550-0127.

Sincerely,

*Andrew Brenner*

Andrew Brenner  
Director of Powerhouse Licensing  
Oklo Inc.

Enclosures: (1) Affidavit and Request for Withholding  
(2) "Product-Based Operator Licensing Framework" Topical Report, Revision 1  
(Proprietary)  
(3) "Product-Based Operator Licensing Framework" Topical Report, Revision 1  
(Non-proprietary)

CC (with enclosures):
