SUBJECT: PERRY NUCLEAR POWER PLANT, REQUEST FOR INFORMATION FOR NRC
POST-APPROVAL SITE INSPECTION FOR LICENSE RENEWAL, PHASE 2,
INSPECTION REPORT 05000440/2026011

Dear Terry Brown:

On August 17, 2026, the U.S. Nuclear Regulatory Commission (NRC) will begin a Post-Approval Site Inspection for License Renewal, Phase 2, at Perry Nuclear Power Plant. This inspection will be performed in accordance with NRC Inspection Procedure (IP) 71003. This inspection will focus on verifying that license conditions added as part of your renewed license and a sample of license renewal commitments have been implemented.

To minimize the inspection impact on the site and to ensure a productive inspection for both parties, we have enclosed a request for information needed for the inspection. It is important that all these documents are up-to-date and complete to minimize the number of additional documents requested during the preparation and/or the on-site portions of the inspection. Information should be provided electronically. This information request has been divided into two groups:

- The first group lists information necessary for our initial inspection scoping and in-office preparation activities. During the in-office preparation activities, the inspector will identify as much as possible the information and activities to be reviewed during the inspection. This information should be provided to the inspector by July 20, 2026.
- The second group includes the additional information required for the inspector to review the selected activities. This information should be available to the inspector 1 week before arriving onsite or August 10, 2026. It is also requested that corrective action documents and/or questions developed during the inspection be provided to the inspector as the documents are generated.

The lead inspector for this license renewal inspection is Joon Park. If there are any questions about the inspection or the material requested in the enclosure, please contact the lead inspector at 630-829-9715 or via email at Joon.Park@nrc.gov.

This letter does not contain new or amended information collection requirements subject to the Paperwork Reduction Act of 1995 (44 U.S.C. 3501 et seq.). Existing information collection requirements were approved by the Office of Management and Budget, Control Number 3150-0011. The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a currently valid Office of Management and Budget Control Number.

This letter and its enclosure will be made available for public inspection and copying at <http://www.nrc.gov/reading-rm/adams.html> and at the NRC Public Document Room in accordance with Title 10 of the *Code of Federal Regulations*, Part 2.390, "Public Inspections, Exemptions, Requests for Withholding."

Sincerely,

Signed by Park, Joon
on 05/26/26

I. Information Requested Prior to the Inspection Preparation Week

The following information is requested by July 20, 2026, or sooner, to facilitate inspection preparation. If you have any questions regarding this information, please contact the team leader. (Please provide the information electronically in “PDF” files, Excel, or other searchable formats, preferably on station/corporate online portal for document sharing. The electronic information should be identified by unit, contain descriptive names, and be indexed and hyperlinked to facilitate ease of use. Information in “lists” should contain enough information to be easily understood by someone who has knowledge of light-water reactor technology.)

1. Provide a list of your license renewal commitments with an approximate completion status of each.
2. Provide a list of your Aging Management Programs (AMPs), copies of associated program basis documents, and a listing of the action tracking items for each.
3. For AMPs that are one-time inspection programs, provide a list of completed work order numbers for inspections that have been completed. This may be incorporated with the previous item and should include identification of the inspected component.
4. Provide current management and license renewal organizational charts.
5. Provide electronic copies of any internal/external self-assessments and associated corrective action documents generated in preparation for the inspection.

II. Information Requested to Be Available One Week Prior to Inspectors’ Arrival On-Site, or August 10, 2026

1. Documentation demonstrating completion of license renewal commitments completed as of the inspection date. For example, this may be in the form of a binder for each commitment which includes the implementing documentation and references.

Enclosure

DOCUMENT REQUEST FOR POST-APPROVAL SITE INSPECTION FOR LICENSE RENEWAL

III. Information Requested to Be Provided Throughout the Inspection

1. Copies of any corrective action documents generated from inspector questions or queries during this inspection.
2. Copies of the list of questions submitted by the team members and the status/resolution of the information requested (provide daily during the inspection to each team member).

If you have any questions regarding the information requested, please contact the lead inspector.
