

UNITED STATES
NUCLEAR REGULATORY COMMISSION
REGION III
2056 WESTINGS AVENUE, SUITE 400
NAPERVILLE, IL 60563-2657

May 20, 2026

Wallace O. Fuhrman, CNMT
Radiation Safety Officer
SSM Health St. Clare Hospital-Fenton
1015 Bowles Ave.
Fenton, MO 63026

SUBJECT: RENEWAL OF RADIOACTIVE MATERIALS LICENSE FOR SSM HEALTH ST.
CLARE HOSPITAL-FENTON, NRC LICENSE NO. 24-11858-01, CN 647143

Dear Wallace Furman:

Enclosed is Amendment No. 64 renewing SSM Health St. Clare Hospital-Fenton's (your) U.S. Nuclear Regulatory Commission (NRC) Materials License No. 24-11858-01 in accordance with your April 29, 2025, renewal application, which is available electronically from NRC's Agencywide Documents Access and Management System (ADAMS) at accession number ML25154A459. NRC's ADAMS is accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

Please review the enclosed document carefully, and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. NRC Region III office at 630-829-9892 so that we may provide appropriate corrections and answers. For the quickest response to general questions, or for submission future amendment requests, please contact our office via email at R3-DRSSMail.Resource@nrc.gov.

An environmental assessment for this action is not required since this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (10 CFR) Section 51.22(a)(10).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation; or imposition of a civil penalty; or an Order suspending, modifying, or revoking your license as specified in the NRC Enforcement Policy. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance that NRC expects of its licensees. The NRC Enforcement Policy is available at: <http://www.nrc.gov/reading-rm/doc-collections/enforcement/>.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <https://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>.

We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS.

Sincerely,

Sara A. Forster, MS, Senior Health Physicist
Materials Licensing Branch
Division of Radiological Safety and Security
Region III
