Gagandeep Singh Rawal, M.D.
Radiation Safety Officer
Hurley Medical Center
Department of Radiology
One Hurley Plaza
Flint, MI 48503

SUBJECT: RENEWAL OF RADIOACTIVE MATERIALS LICENSE FOR HURLEY MEDICAL CENTER, NRC MATERIALS LICENSE NO. 21-00338-02

Dear Dr. Rawal:

Enclosed is Amendment No. 144 renewing your U.S. Nuclear Regulatory Commission (NRC) Materials License No. 21-00338-02, in accordance with the application dated February 11, 2026.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify me at 630-829-9861 or via email at Nathan.Bryant@nrc.gov so that we may provide appropriate corrections and answers.

An environmental assessment for this action was not required, since this action is categorically excluded under [Title 10 of the Code of Federal Regulations \(CFR\) §51.22\(a\)\(10\)](#).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a Notice of Violation, or Imposition of a Civil Penalty, or an Order Suspending, Modifying or Revoking your license as specified in the NRC Enforcement Policy. The NRC Enforcement Policy is available at: <http://www.nrc.gov/reading-rm/doc-collections/enforcement/>.

An electronic version of the NRC's regulations is available on the NRC Web Site at: www.nrc.gov. Additional information regarding medical uses of radioactive materials may be obtained on the NRC Web Site at: <http://www.nrc.gov/materials/miau/med-use-toolkit.html>. This site also provides the updated Training and Experience NRC Form 313A series of forms and guidance, as well as information on the revised regulations for naturally-occurring and accelerator-produced radioactive materials (NARM).

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's expectations for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web Site at: <http://www.nrc.gov/about-nrc/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

Nathan Bryant, Health Physicist
Materials Licensing Branch
Division of Radiological Safety and Security
Region III
