U.S. Department of Energy
1000 Independence Avenue, S.W.
Washington, D.C. 20585

Dear Director Fox:

The U.S. Nuclear Regulatory Commission received the enclosed export license amendment application, XSNM3846/01, on May 14, 2026. TN Americas LLC requests authorization to export 673 kg uranium (U), containing 134.26 kg of U-235 enriched up to 19.95 WGT% maximum, in the form of metal fragments. Framatome will use the uranium to manufacture fuel elements to be used for neutron production in the High Flux Reactor at the Institut Laue Langevin in Grenoble, France.

The purpose of the amendment is to: 1) increase the total quantity of U, including increasing the amount of U-235 from 29.53 kg to 134.26 kg; 2) update the addresses for two intermediate foreign consignees, and 3) update the address for one other U.S. party to export.

Assurances are required from EURATOM that the material will be subject to all the terms and conditions of the agreement for nuclear cooperation. The NRC requests your assistance in obtaining the necessary assurances.

If you have any questions, please contact Madelyn Nagel at madelyn.nagel@nrc.gov. Please ensure your response is also sent to ecnp_ebresponse.resource@nrc.gov.

Sincerely,

ANDREA
