Subject: [External_Sender] Request to Amend Licenses 19-00296-10, 19-00296-17, and 19-00296-21

To whom it may concern:

The NIH is requesting to amend our broad scope license (19-00296-10), irradiator license (19-00296-17), and cyclotron production license (19-00296-21) to update our mailing address. Additionally, we are requesting an amendment to our irradiator license (19-00296-17) to lower our overall possession limit to reflect a transfer of an irradiator to another licensee. Included in this request is management approval to proceed with the amendment request. Please let me know if you need anything additional.

Best regards,

Teresa E. Fisher, MS
NIH Radiation Safety Officer
Radiation Safety, Division of Safety, ORS, OD

King of Prussia, PA 19406

Dear Sir or Madam,

This is a request to amend our Broad Scope License (19-00296-10), Irradiator License (19-00296-17), and Cyclotron License (19-00296-21) with a new mailing address.

Most of the staff of the NIH Radiation Safety Program have relocated to another building on the NIH campus. The new location's address should be updated as follows:

13 South Drive, MSC 5760
Building 13, Room 3K04
Bethesda, MD 20892-5760

If there are any questions concerning this amendment request, please contact Teresa Fisher, RSO, at 301-496-2253 or via e-mail at teresa.fisher@mail.nih.gov.

Sincerely,

Digitally signed by TERESA E. FISHER -S

Teresa Fisher, M.S.
Radiation Safety Officer, NIH

cc: Dr. Liza Lindenberg, Chair, Radiation Safety Committee, NIH

DATE: **07/29/2026**

TO: Roland Owens, Ph.D.
Deputy Director (A), Office of Intramural Research
National Institutes of Health

THROUGH: **NIH Radiation Safety Committee**

FROM: Teresa Fisher

SUBJECT: **Amendments to NRC Licenses**

ISSUES: Most Radiation Safety personnel have relocated to Building 13; however, the correspondence address on NIH's three NRC licenses still lists Building 21. In addition, following the removal and transfer of the Building 14C irradiator, the irradiator license must be amended to reflect the removal of the device and the associated cesium-137 possession limit.

DISCUSSION: NIH's three NRC radioactive materials licenses require amendment to update the correspondence address from 21 Wilson Drive to 13 South Drive, Building 13, Room 3K04. The NRC Irradiator License also requires amendment to remove the irradiator formerly located in Building 14C, which has been transferred to another NRC licensee, and to reduce NIH's authorized possession limit for cesium-137 to reflect the transfer.

RECOMMEND: Approval of submission of the attached NRC license amendment requests for processing.

As the NIH Radiation Safety Officer, I recommend submitting the NRC amendments.

Teresa E. Fisher
