SUBJECT: REQUEST FOR REVALIDATION OF CANADIAN CERTIFICATE OF
APPROVAL CDN/2094/B(U) FOR THE 2018 UPGRADE TO THE F-522
PACKAGE – REQUEST FOR ADDITIONAL INFORMATION DOCKET NO.
71-3091

Dear Ryan Vierling:

By letter dated September 3, 2025 (Agencywide Documents Access and Management System Accession No. ML25246C202), the U.S. Department of Transportation requested that the U.S. Nuclear Regulatory Commission staff perform a review of the Canadian Certificate of Approval CDN/2094/B(U), Revision 6, for the Model No. F-522 transport package and make a recommendation concerning the revalidation of the package for import and export use. This review was performed against the 2018 edition of the International Atomic Energy Agency (IAEA) Safety Standards Review Series 6 (SSR-6). Specifically, this review covers the aging portion of the upgrade to SSR-6, 2018 Edition.

In connection with our review, this letter is to advise you that the information needed to continue our review, described as a request for additional information, is in the enclosure of this letter. Addressing the request for additional information does not preclude the staff from issuing further requests for additional information during the detailed technical review of this application.

To complete our technical review on schedule, your response should be provided within 30 days of the date of this letter.

The enclosure transmitted herewith contains proprietary information. When separated from the sensitive conditions in the enclosure, this document is decontrolled.

R. Vierling
