Re: Notice of Change of Information: Medical Faculty Associates, Inc. (Lic. No. 08-31160-01)

To Whom It May Concern:

Please accept this letter as notification of an anticipated change of information regarding Medical Faculty Associates, Inc. (“MFA”), a physician group practice serving patients in the District of Columbia. MFA holds the above-referenced radioactive materials license issued by the U.S. Nuclear Regulatory Commission (the “Agency”).

On May 26, 2026, the MFA entered into an Asset Transfer Agreement with Foggy Bottom Physician Group, Inc. d/b/a Capital Medical Group (“CMG”), a new physician group practice located in the District of Columbia, to transition MFA’s clinical platform to CMG and provide certain ongoing support for The George Washington University’s academic missions, among other obligations (collectively, the “Transaction”). The parties anticipate this transaction will close on or around July 31, 2026.

Following the Transaction, MFA will continue to exist while moving to wind down its operations, with CMG taking on the role of serving patients in the community. The Transaction is expected to ensure continuity of high quality care for patients in the District of Columbia. To ensure continuity of care, MFA seeks to transfer its radioactive materials license to CMG. CMG will continue to provide health care services at the same location and in the same manner as provided by MFA, under its own legal entity name and federal tax identification number. The majority of the equipment, personnel, services, and operations that exist under MFA and are applicable to the transferred assets are anticipated to transition to CMG under the Transaction are not expected to materially change or be altered. Additional information regarding the absence of

material changes associated with the transfer of assets to CMG under the Transaction is attached as **Exhibit A**.

We respectfully request the expedited review and approval of the transfer of the abovementioned Materials License related to the Transaction in order to ensure the seamless transition of patient coverage from MFA to CMG. We recognize that this is a compressed timeframe for the agency to review this request, but an expedited review will allow CMG to continue much needed healthcare operations without any interruptions to patient care. We greatly appreciate your time and consideration. Please do not hesitate to contact Joanne Green at [REDACTED] or [REDACTED] if you have any questions or if we can provide any additional information in the interim.

Sincerely,

Signed by:

9A5842256069433...

William Elliott, CEO
Medical Faculty Associates, Inc.

Exhibit A

Additional Information

- 1. Provide a complete description of the transaction. Describe any planned changes in the organization, including but not limited to, transfer of stocks or assets and mergers, change in members on Board of Directors, etc. Provide the new licensee name, mailing address, and contact information, including phone numbers. Clearly identify when the amendment request is due to a name change only.**

MFA is a 501(c)(3) nonprofit organization entering into the Transaction to transfer the majority of its clinical assets to CMG. Upon the closing date of the Transaction, CMG will possess all assets held by MFA used in conducting the activities covered by the license identified in the attached letter (the “**Licensed Program**”). CMG will continue to conduct the Licensed Program at the same location as conducted under MFA, while maintaining the same material personnel, equipment, and operational infrastructure used by MFA to conduct the Licensed Program. MFA will begin to wind down operations and no longer continue to exist as a legal entity following this transfer of assets. CMG possesses the following information:

Foggy Bottom Physician Group, Inc. d/b/a Capital Medical Group

2150 Pennsylvania Ave. NW

Washington, DC 20037

Attn: Bruno Petinaux, MD, CEO

Phone: [REDACTED]

- 2. Describe any changes in personnel or duties that relate to the licensed program, including training and experience for new personnel and any changes in the training program. Include any changes in personnel having control over licensed activities (e.g., officers of a corporation) and any changes in personnel named in the license such as radiation safety officer (RSO), authorized users, or any other persons identified in previous license applications as responsible for radiation safety or use of licensed material. The licensee should include information concerning the qualifications, training, and responsibilities of new individuals.**

CMG will retain the same management for the Licensed Program as is present under MFA. There will be no changes in personnel named in the License or the duties that relate to the Licensed Program as a result of the Transaction.

- 3. Describe any changes in the organization, location, facilities, equipment, radiation safety program, use, possession, storage, waste management, or other procedures that**

relate to the licensed program, including any that would require a license amendment without a transferring control.

There will be no changes in the organization, location, facilities, equipment, radiation safety program, use, possession, waste management, or procedures relating to the Licensed Program.

- 4. Describe the status of the surveillance program at the present time and the expected status at the time that control is to be transferred, including the status of calibrations, leak tests, surveys, wipe tests, training, quality control, inventories, accountability requirements and related records.**

The Transaction will not result in any change to the surveillance program, as presently implemented by MFA. All required surveillance has been performed, documented, and reviewed, and all current conditions and surveillance practices will be maintained following the Transaction. The surveillance program will continue to be completed with daily and monthly quality control evaluations, and information documenting those evaluations will be shared at quarterly meetings and reviewed by the physicist. Wipe tests and surveys are, and will continue to be, completed per the guidelines and documented within the quality program. All calibration, leak tests, and surveys are documented and retained, and the process will not be altered as a result of the Transaction.

- 5. Describe the status of the licensee's facilities, equipment, and radiation safety program, including any known contamination and whether decontamination will occur prior to transfer.**

None. The relevant Licensed Program's facilities, equipment, and radiation safety program are currently in compliance and are expected to remain in compliance after the Transaction. There will be no changes to the relevant Licensed Program's facilities, equipment, and radiation safety program as a result of the Transaction, as acquired by CMG from MFA. There is no known contamination of Licensee's to-be acquired facilities or equipment. No decontamination is necessary prior to the Transaction.

- 6. If current decommissioning funding plans (DFP) will be changed as a result of the transfer, the revised DFP should be submitted. If other financial assurance documents will be changed as a result of the transfer, confirm that all financial assurance instruments associated with the license will be held in the transferee's name before the license is transferred, and as required by 10 CFR 30.35(f), the licensee must, within 30 days, submit financial instruments reflecting such changes.**

This item is not applicable to the Licensed Program. CMG is not required to maintain decommissioning funding plans or provide financial assurance under the licenses identified in the attached letter.

- 7. Confirm that all records concerning the safe and effective decommissioning of the facility will be transferred to the transferee or to NRC, as appropriate. These records**

include documentation of surveys of ambient radiation levels and fixed and/or removable contamination, including methods and sensitivity.

The records concerning the safe and effective decommissioning of the facility will be transferred to CMG.

- 8. Confirm that the transferee agrees to abide by all commitments and representations previously made to the regulating body by the transferor.**

Confirmed.

- 9. Confirm that both transferor and transferee agree to transferring control of the licensed material and activity, and the conditions of transfer, and that the transferee has been made aware of any open inspection items and its responsibility for possible resulting enforcement actions.**

Confirmed.

- 10. Confirm that the transferee will abide by all constraints, conditions, requirements, representations, and commitments of the transferor or that the transferee will submit a complete description of the proposed licensed program.**

Confirmed. CMG will continue to abide by the same constraints, conditions, requirements and commitments on the Licensed Program that existed prior to the Transaction.

- 11. The transferee, in the case of fuel cycle facilities, shall provide documentation showing that it is financially qualified to conduct normal operations. The information can be in the form of income statements and balance sheet forecasts.**

This is not applicable to CMG because CMG does not hold a license for a fuel cycle facility.
