NUCLEAR REGULATORY COMMISSION
WASHINGTON, D.C. 20555-0001

August 26, 2026

Laura Luna
Radiation Safety Officer
Oakland Imaging Diagnostic Center
27650 Dequindre Rd.
STE 1000
Warren, MI 48092

SUBJECT: AMENDMENT NO. 24 TO RADIOACTIVE MATERIALS LICENSE FOR OAKLAND
IMAGING DIAGNOSTIC CENTER, NRC LICENSE NO. 21-25929-01

Dear RSO Luna:

Enclosed is Amendment No. 24 to your NRC Materials License No. 21-25929-01 in accordance with your April 9, 2026 request. This amendment removes the requested location and updates the suite number of the remaining location. Your application is available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML26103A189.

The NRC staff has reviewed the information provided. Based on its review, the NRC staff has concluded that all licensable radioactive material has been removed from your facility located at 27483 Dequindre Rd, STE 101, Madson Heights, MI. The NRC staff has also concluded that residual radioactive material attributable to licensed activities does not exceed current NRC criteria at this location. Based on these conclusions, no further remediation or actions are required with respect to NRC-related material. Your facility is suitable for unrestricted use.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U. S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

An environmental assessment for this action is not required since this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (10 CFR) Section 51.22(a)(10).

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

The NRC's Safety Culture Policy Statement became effective in June 2011. While a policy statement and not a regulation, it sets forth the agency's *expectations* for individuals and organizations to establish and maintain a positive safety culture. You can access the policy statement and supporting material that may benefit your organization on NRC's safety culture Web site at <http://www.nrc.gov/about-nrc/regulatory/enforcement/safety-culture.html>. We strongly encourage you to review this material and adapt it to your particular needs in order to develop and maintain a positive safety culture as you engage in NRC-regulated activities.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

KEITH LASSMAN
