TRAINING: No special training is required for documents issued with this Change Notice.

REMARKS: IP 71111.13, "Maintenance Risk Assessments and Emergent Work Control." Revised footnote 1 to clarify that deeper reviews of the licensee's PRA configuration control program should be performed for select 03.01 samples as warranted by plant changes and inspection circumstances, rather than specifying a recommended fixed number of samples, and added a reference to Appendix B for additional risk management insights.

IP 71152, "Problem Identification and Resolution (PI&R)." Triennial Team Inspection sample hours updated to reflect a one-week inspection.

TG SGTUBELK, "Steam Generator Tube Primary-To-Secondary Leakage." This Technical Guide was deleted because TG9900 was converted to IMC 0327 on 7/14/2023.

IMC 0612 Appendix E, "Examples of Minor Issues." Deleted because examples are not used in new more-than-Minor process.

IMC 0612 Appendix G, "Emergency Planning Cornerstone - Specific Supplemental Guidance for Appendix B Screening Figures 1 and 2." Deleted: Guidance was moved to IMC 0609 Appendix B.

The following document is now designated **Reference Only**

IP 71151, "Performance Indicator Verification." Samples are no longer part of the baseline inspection program; it is now optional to inspect using plant status hours.
