COMPANY, LLC, NRC LICENSE NO. 13-18945-01

Dear Kyle Foli:

In application dated September 3, 2026, Kyle Foli, Radiation Safety Officer, notified the U.S. Nuclear Regulatory Commission (NRC) of a request to terminate NRC Materials License No. 13-18945-01. Your letter is available electronically from the Agencywide Documents Access and Management System (ADAMS) at Accession No. ML26251A323.

An environmental assessment for this action is not required since this action is categorically excluded under Title 10 of the *Code of Federal Regulations* (10 CFR) Section 51.22(a)(10).

In your application dated September 3, 2026, you submitted information stating that the licensed radioactive material is generally licensed per 10 CFR 31.5. The NRC staff have reviewed your final status surveys. Based on its review, the NRC staff has concluded that all specifically licensable radioactive material has been removed from the facility and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice and Procedure," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's ADAMS, accessible from the NRC Web site at <https://www.nrc.gov/reading-rm/adams.html>.
