Dear Dr. Pagan-Lisboa and Dr. Quinones Feliciano:

This is in reference to your letter dated July 1, 2026, requesting to amend your NRC License No. 52-01946-07. In order to continue our review, please provide the following additional information.

1. You have requested to add an area of use at the School of Health Professions Building on Ing. Carmelo Galindez Street, Rio Piedras, Puerto Rico. Please provide the following:
 - a. Please confirm that the "Simulation Hot Laboratory Room" will only be used for sealed sources and not for unsealed byproduct material.
 - b. Please provide a description (e.g., manufacturer and model number) of any instrumentation that will be used in this room. This would include any survey instruments (including probe information), well counter, dose calibrator, etc.
 - c. Since the sealed sources will be used for training purposes, please provide the isotope, the manufacturer and model number, and the maximum possession limit for each sealed source used in this room.
 - d. Please confirm that all previously made commitments (e.g., surveys, leak tests, etc.) in renewal application dated December 23, 2021, will apply to this area.

We will continue our review upon receipt of the requested information. You may respond to my attention in writing by letter or email (if letter is signed by senior management and scanned into a pdf format), referencing mail control number 659925. Please submit a reply by October 5, 2026. If you have any technical questions regarding this deficiency letter, please call me at (610) 337-5006.

Current NRC regulations and guidance are included on the NRC's website at www.nrc.gov; select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits, see our toolkit index page**. Sincerely,

Jan
