Subject: NRC Approval of U. S. Department of Transportation Request to Withhold Information from Public Disclosure for the Submittal of the Request for Revalidation of Model No. TN-106 (Docket No. 71-3075)
Date: Friday, September 25, 2026 10:42:43 AM

Dear Ryan Vierling:

By letter dated August 20, 2026, (Agencywide Documents Access and Management System [ADAMS] Accession Number ML26245A156), the U. S. Department of Transportation submitted a statement of proprietary information dated July 30, 2026 (ML26245A158), signed by Vincent Masdupuy, Director Transport Operations & Business, Orano Nuclear Packages and Services, as supplemented by e-mail dated August 6, 2026 (ML26245A159), requesting that the information contained in the following documents be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR), Part 2, Section 2.390.

- Enclosure 4, Safety Analysis Report (SAR) Chapter 5A Appendix 2 – Ref. DOS-08-00126114-502-1.0
- Enclosure 5, SAR for the Model TN-106 Packaging – DOS-18-012446-000 Version 2.0 (all files as listed in the statement of proprietary information)

The statement of proprietary information stated that the submitted information should be considered exempt from mandatory public disclosure for the following reasons:

- The information sought to be withheld is owned and has been held in confidence by Orano NPS.
- The information is of a type customarily held in confidence by Orano NPS and not customarily disclosed to the public.
- Public disclosure of the information is likely to cause substantial harm to the competitive position of Orano NPS because the information consists of descriptions of the design and analysis of the TN-106 Packaging, as well as company business sensitive information, the application of which provides a competitive economic advantage. The availability of such information to competitors would enable them to modify their product to better compete with Orano NPS, take marketing or other actions to improve their product's position or impair the position of Orano NPS's product, and avoid developing similar data and analyses in support of their processes, methods, or apparatus.

We have reviewed your submittal and the material in accordance with the requirements of 10 CFR 2.390 and, on the basis of your statements, have determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Therefore, Enclosures 4 and 5 will be withheld from public disclosure pursuant to 10 CFR 2.390(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended. Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC. You also should understand that the NRC may have cause to review this determination in the future, for example, if the scope of a FOIA request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified of the date of public disclosure, in advance which will be a reasonable time thereafter.

Note that this email will be placed in ADAMS as publicly available to document the approval of your request to withhold information from public disclosure.

If you have any questions regarding this communication, please contact me at (301)415-7295, or via email to Daneira.Melendez-Colon@nrc.gov.

Sincerely,

Daneira Meléndez Colón
